

Program : Diploma in Communication and Computer Networking	
Course Code : 5322A	Course Title: WEB TECHNOLOGIES
Semester : 5	Credits: 4
Course Category: Program Elective Course	
Periods per week: 4 (L:4 T:0 P:0)	Periods per semester: 60

Course Objectives:

- Students understand about the technologies used in internet.
- Students will learn to create more dynamic and interactive websites using html and CSS
- Understand webpage validation JavaScript.
- Understand DOM object and interface.

Course Prerequisites:

Topic	Course code	Course name	Semester
Web page creation using html	3326	HTML & CSS LAB	3

Course Outcomes:

On completion of the course, the student will be able to:

CO n	Description	Duration (Hours)	Cognitive Level
CO1	To understand about the current internet Technologies.	14	Understanding
CO2	To design more dynamic and interactive websites using CSS	12	Applying
CO3	To Understand JavaScript and validation using JavaScript	16	Applying
CO4	To Understand DOM object and interface.	16	Applying
	Series Test	2	

CO – PO Mapping

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	2			3			1
CO2	3		2	3		1	1
CO3	2			2			1
CO4	3			3	2		

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Students understand about the technologies used in internet.		
M1.01	To learn the basics of web technologies	4	Understand
M1.02	Learn http request and response	3	Understand
M1.03	Learn about html tags and form	4	Apply
M1.04	To learn about GET and POST attribute	3	Apply
Contents: Web technologies introduction Introduction to web programming- Protocols and programs, secure connections, web browser, Web server, WebPages, MIME, http request and response, url, GET and POST , Link and URL in Html, working with multimedia in html, HTML forms, form attributes, form method attributes-GET and POST , form action attribute, div and span tags			
CO2	To illustrate database design		
M2.01	To understand the basic of CSS	5	Understanding
M2.02	To understand the different types of style sheet	3	Applying
M2.02	To understand basics of CSS2	4	Applying
	Series Test –I	1	

Contents: CSS- Need for CSS, basic syntax and structure of CSS, inline, internal and external style sheet, , using CSS, background images, colors and properties, manipulating texts, using fonts, borders and boxes, margins, padding lists, positioning using CSS, CSS2			
CO3	To write queries in SQL		
M3.01	To learn the basic concepts of Client side scripting and basics of JavaScript.	4	Understanding
M3.02	To learn the Arrays & functions	4	Applying
M3.03	To learn about loops and repetition	4	Applying
M3.04	To understand form validation using JavaScript	4	Applying
Contents: Java script Client side scripting- JavaScript, features of JavaScript, simple JavaScript, using JavaScript in html, Arrays & String , variables, functions, conditions, loops and repetition, popup boxes, form validation using JavaScript			
CO4	To relate emerging technologies		
M 4.01	To learn about DOM	8	Understanding
M 4.02	To learn about node manipulation	4	Applying
M 4.03	To learn about traversing DOM tree.	4	Applying
	Series Test – II	1	
Contents: Advance Javascript, JavaScript and objects, DOM – DOM levels, DOM interfaces, DOM node and trees, node manipulation using JS, traversing and modifying DOM tree, event handling.
