

Program : Diploma in Communication and Computer Networking	
Course Code : 6329A	Course Title: Android Programming Lab
Semester : 6	Credits: 1.5
Course Category: Programme elective course	
Periods per week: 3 (L:0 T:0 P:3)	Periods per semester: 45

Course Objectives:

- Acquire knowledge of basic android application
- To understand basic structure of android and relation with database
- Learn how to develop mobile application
- Develop knowledge about user

Course Prerequisites:

Topic	Program / Course Name
DATABASE MANAGEMENT LAB	SEMESTER 4

Course Outcomes:

On completion of the course, the student will be able to:

CO	Description	Duration (Hours)	Cognitive Level
CO1	Acquire knowledge of basic android application	6	Applying
CO2	To understand basic structure of android and relation with database	8	Applying
CO3	Learn how to develop mobile application	11	Applying
CO4	Develop knowledge about user interfaces	12	Applying
	Series Test	4	
	Open Ended Experiments / micro projects	4	

CO – PO Mapping

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3		3		2		
CO2	3		3		2		
CO3	3		3		2		
CO4	3		3		2		

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Acquire knowledge of basic android application		
M1.01	Create a simple Android application that displays "Hello, World!" when launched.	3	Applying
M1.02	Write a program to create a button that changes the text of a TextView when clicked.	3	Applying
CO2	To understand basic structure of android and relation with database		
M2.01	Create an application that shows a list of items and allows users to add new items to the list.	4	Applying
M2.02	Build an app that uses a database to store user information, such as name, age, and email address	4	
	Series Test– I	2	
CO3	Learn how to d develop mobile application .		
M3.01	Create a program that displays a map and allows users to add markers to it.	3	Applying
M3.02	Build an app that uses GPS to track the user's location and displays it on a map.	4	Applying
M4.03	Create a program that allows users to send text messages to each other within the app.	4	Applying
CO4	Develop knowledge about user interfaces		

M4.01	Write a program that uses a camera to take a picture and save it to the device's storage.	4	Applying
M4.02	Write an application that plays music or videos when a button is clicked.	4	Applying
M4.03	Build an app that uses Bluetooth to connect to another device and exchange data.	4	Applying
	Series Test –II	2	
	Open Ended Experiments / micro projects	4	

Note: Experiments shall be conducted such that all COs are attained.

Compulsory for CIA

The CIA shall be arranged in third semester by the faculty in charge. The ESE need to be conducted at the end of the third semester.
