

Program : Diploma in Computer Application and Business Management	
Course Code : 2254	Course Title: Management Information System
Semester : 2	Credits: 3
Course Category: Program Core	
Periods per week: 3 (L:3, T:0, P:0)	Periods per semester: 45

Course Objectives:

- To provide a thorough knowledge in Information Systems used by managers.

Course Prerequisites: Nil

Course Outcomes:

On completion of the course, students will be able to:

CO n	Description	Duration (Hours)	Cognitive Level
CO1	Explain the process of information generation and communication in organizations	13	Understanding
CO2	Illustrate the role of MIS within the company and list the advantages	10	Understanding
CO3	Interpret the process of IT application development and its use in organizations	10	Understanding
CO4	Utilize information systems for decision making and for emerging technologies	10	Applying
	Series Exam	2	

CO – PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1			3				
CO2			3				
CO3				3			
CO4		3	3				

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Explain the process of information generation and communication in organisations		
M1.01	Explain system concepts and features	4	Understanding
M1.02	Understand the concept of information and information overload.	4	Understanding
M1.03	Learn the framework for understanding and designing MIS in an organization	5	Understanding
Contents: System concept; definition, types and characteristics of system - input, process and output, Concept of information; definition, features, types, process of generation and communication; quality and value of information; information overload; techniques for managing overload; summarizing; filtering; inferences and message routing. Evolution of MIS: Concepts; framework for understanding and designing MIS in an organization;			
CO2	Illustrate the role of MIS within the company and benefits		
M2.01	Understand the role of MIS within the company and the need of information management	4	Understanding
M2.02	Categories of Management Information Systems, Benefits of Using Management Information Systems, Types of MIS Reports	6	Understanding
	Series Test – I	1	

Contents: The role of MIS within the company - the need of information management - Categories of Management Information Systems, Benefits of using Management Information Systems, Types of MIS Reports			
CO3	Interpret the process of IT application development and use in organizations		
M3.01	Understand TPS ,OAS and KWS	2	Understanding
M3.02	Understand DSS, intranets and extranets	4	Understanding
M3.03	Understand Executive Support Systems, Enterprise Resource Planning Systems. Relationship of systems.	4	Understanding
Contents: Information systems: Transaction Processing Systems, Office Automation Systems, Decision Support Systems, Executive Support Systems, and Enterprise Resource Planning Systems. Relationship of systems to one another			
CO4	Utilize the information systems for decision making and for emerging technologies		
M4.01	Understand System development methodologies	3	Understanding
M4.02	Understand system analysis and system design	3	Understanding
M4.03	Understand system implementation and system documentation	3	Understanding
M4.04	Explain the emerging technologies in Management Information Systems and use them	1	Applying
	Series Test – II	1	
Contents: Systems Development and Implementation: System development methodologies; SDLC approach; prototyping approach and user development approach- Systems Analysis; systems Design system implementation; system documentation, Recent Developments and The Future of Management Information Systems (emerging technologies).
