CO – PO Mapping

CO _n	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3				3	3	3
CO2	3				3		
CO3	3						
CO4					3		3
3-Strongly mapped		2-Moderately mapped			1-Weakly mapped		

Course Outline:

The course is organized in two phases

Phase1: Creating an industrial environment within the institute.

5S Implementation: Students are trained in the industry practices such as workplace maintenance, safety, reduction of wastage, teamwork, and maintenance of tools and equipments. 5S standardization as part of lean manufacturing shall be followed. The entire workplace including laboratories, classrooms, faculty rooms, etc. shall be maintained under 5S.

Phase2: Utilizing discipline knowledge acquired to solve real time problems of social, industrial or academic significance.

Identify problems of social significance or with day to day applications: Students shall be provided with problems of social significance which can be solved by applying skills acquired so far. The students can also take one industry as per his/her interest for analysis and study. Preference should be given on the application of emerging technologies in the selected industry. It may consist of Business / Management / Banking / Commerce / Computer areas, Social Entrepreneurship or any other suitable area of interest. This course promotes learning through experience.

Analysis and study can be done on topics like

1. Goals of the organization
2. Work values
3. Character Ethics
4. Working Conditions
5. Decision Making Strategies
6. Goal Setting process
7. Customer Satisfaction
8. Any other relevant topic chosen by the student.

* Case study can be chosen by the students in this respective area of interest.

Minor projects in the following domain may also be undertaken:

- Maintenance of UPS
- Machine/equipment maintenance
- Repairing
- Networking
- DTP
- Configuring software
- Maintenance of building/infrastructure
- Furniture repair
- Maintenance of equipment public educational institutions, hospitals public offices
- Repairing and maintenance of public facilities
- Involvement in manufacturing activities of in-house production center

Additions of any activities of relevance are permitted. The minor project shall integrate available resources for solving any problem strictly adhering to the quality and safety standards. Only problems with social significance or day to day applications shall be selected as a minor project.

Batch Size:

Students are encouraged to take up problems individually. The maximum allowed batch size is 5.

Guidance:

Implementation of minor projects is through guided efforts. HOD shall allocate one guide,

not below the rank of Demonstrator per batch for the minor project. Even if the minor project is individual, there shall be a guide allocated. The guide shall observe, whether the allocated work does not require prior mandatory licensing for the undertaking. Students shall submit report on the completed minor project and get it corrected by the guide.
