### Course Objectives:

- To provide a thorough knowledge in Information Systems used by managers.

### Course Outcomes:

On completion of the course, students will be able to:

| CON | Description                                                                      | Duration (Hours) | Cognitive Level |
|-----|----------------------------------------------------------------------------------|------------------|-----------------|
| CO1 | Explain the process of information generation and communication in organisations | 13               | Understanding   |
| CO2 | Illustrate the role of MIS within the company and list the advantages            | 10               | Understanding   |
| CO3 | Interpret the process of IT application development and its use in organisations | 10               | Understanding   |
| CO4 | Utilize information systems for decision making and for emerging technologies    | 10               | Applying        |
|     | Series Exam                                                                      | 2                |                 |
