

Program : Diploma in Computer Hardware Engineering	
Course Code :	Course Title: Web Programming Lab
Semester : 5	Credits: 1.5
Course Category: Program Elective	
Periods per week: 3 (L:0 T:0 P:3)	Periods per semester: 45

Course Objectives:

- To impart skills to design, develop simple web pages
- To develop static and dynamic web pages.
- Understand the development of websites with database support.

Course Prerequisites:

Topic	Course Code	Course Name	Semester
Basic Knowledge of IT skills and basic problem solving		Introduction to IT systems Lab	1
Object Oriented Programming concepts		Object Oriented Programming	4

Course Outcomes:

On completion of the course student will be able to:

COn	Description	Duration (Hours)	Cognitive Level
CO1	Develop simple web pages using HTML	8	Applying
CO2	Develop web pages using JavaScript & CSS	10	Applying
CO3	Construct dynamic web pages using PHP	10	Applying
CO4	Design and develop simple websites using HTML, CSS, JavaScript, PHP & Database	14	Applying
	Lab Test	3	

CO – PO Mapping

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3			3			
CO2	3			3			
CO3	3			3			
CO4	3			3			

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

	Description	Duration (Hours)	Cognitive Level
CO1	Design simple web pages using HTML		
M1.01	Develop simple HTML pages using Basic HTML & formatting tags	2	Applying
M1.02	Make use of HTML lists, embedding hyperlinks and multimedia objects in a web page.	2	Applying
M1.03	Demonstrate the use of Tables & Frames in HTML page	2	Applying
M1.04	Develop web pages with Forms and its controls	2	Applying
CO2	Develop web pages using JavaScript & CSS		
M2.01	Develop web pages using Inline, Embedded and External Style Sheets	3	Applying
M2.02	Apply CSS properties – font, color, background, list, link, text, border in web pages	2	Applying
M2.03	Implement JavaScript in web page & event handling using JavaScript	2	Applying
M2.04	Implement form validation using JavaScript	3	Applying
	Lab Test – I	1½	
CO3	Construct dynamic web pages using PHP		

M3.01	Develop simple web applications using control structures in PHP	3	Applying
M3.02	Make use arrays to develop web applications	2	Applying
M3.03	Illustrate Form Data Retrieval using PHP	3	Applying
M3.04	Implement session & cookie management using PHP	2	Applying
CO4	Design and develop simple websites using HTML, CSS, JavaScript, PHP & Database		
M4.01	Implement PHP script to establish connection with Database	2	Applying
M4.02	Implement PHP script to execute SQL statements	2	Applying
M4.03	Implement PHP script to process record sets.	2	Applying
M4.04	Design and develop a complete database driven web application using HTML, CSS, JavaScript, PHP & Database.	2	Applying
M4.05	**Open ended project	6	
	Lab Test II	1½	

**** Sampled open Ended Projects**

(Not for End Semester Examination but compulsory to be included in Continuous Internal Evaluation. Students can do open ended experiments as a group of 2-3. There is no duplication in experiments between groups. Open ended experiments should include the concepts of HTML, CSS ,JavaScript &PHP)

Example : Develop a Web Site for your College
