

Program: Diploma in Fire Technology and Safety	
Course Code: 5467	Course Title: Safety Infrastructure & Planning Lab
Semester: 5	Credits: 1.5
Course Category: Program Core	
Periods per week: 3 (L:0, T:0, P:3)	Periods per semester: 45

Course Objectives:

- To develop an understanding of safety infrastructure planning in various environments.
- To analyze fire protection systems, evacuation plans, and risk assessment techniques.
- To apply safety regulations and standards in infrastructure planning.

Course Outcomes:

On completion of the course, the student will be able to:

COn	Description	Duration (Hours)	Cognitive Level
CO1	Analyze fire safety and evacuation planning for various structures.	9	Applying
CO2	Assess and implement fire protection systems in buildings.	10	Applying
CO3	Evaluate risk factors and safety measures in different industries.	11	Analyzing
CO4	Design safety layouts and conduct safety audits.	11	Creating
	Lab Exam	4	

CO – PO Mapping:

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1			2				
CO2						2	
CO3							2
CO4						2	1

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline:

Module outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Analyze fire safety and evacuation planning for various structures.		
M1.01	Study of fire safety codes and regulations	4	Understanding
M1.02	Designing evacuation plans for different buildings	5	Applying
CO2	Assess and implement fire protection systems in buildings.		
M2.01	Inspection of fire hydrants, sprinklers, and alarms	6	Applying
M2.02	Analysis of fire suppression systems	4	Applying
	Lab Exam I	2	
CO3	Evaluate risk factors and safety measures in different industries.		
M3.01	Hazard identification and risk mitigation techniques	6	Analyzing
M3.02	Case study on industrial safety hazards	5	Analyzing
CO4	Design safety layouts and conduct safety audits.		
M4.01	Design of fire safety layouts for buildings	6	Creating
M4.02	Conducting safety audits and reporting findings	5	Evaluating
	Lab Exam – II	2
