

Program : Diploma in Hotel Management and Catering Technology	
Course Code: 1474	Course Title: Food Production-I
Semester: 1	Credits: 0
Course Category: Foundation course	
Periods per week: 4 (L:4 T:0 P:0)	Periods per semester: 60

Course Objectives:

- Understand culinary history, modern cookery equipment developments, and the hierarchy of professional kitchens, while grasping the layout and organization of commercial kitchens for efficient workflow.
- Demonstrate proficiency in handling culinary equipment and applying various cooking techniques to prepare dishes with precision and consistency, analyzing the effects of heat on food ingredients and evaluating dish quality.
- Develop innovative recipes that showcase creativity and culinary expertise, incorporating diverse ingredients and cooking methods to enhance culinary skills and creativity.

Course Prerequisites: Nil

Course Outcomes:

On completion of the course, the student will be able to:

CO n	Description	Duration (Hours)	Cognitive Level
CO1	Students will demonstrate knowledge of culinary history, modern developments in cookery equipment, and the hierarchy and staffing dynamics of professional kitchens.	10	Understanding
CO2	Learners will understand the layout and organization of commercial kitchens, including the efficient use of space and the flow of work from receiving to service areas.	9	Understanding

CO3	Participants will demonstrate proficiency in handling a variety of culinary equipment, including knives, utensils, and specialized cooking appliances.	8	Applying
CO4	Students will apply various cooking techniques, such as roasting, grilling, frying, and baking, to prepare a range of dishes with precision and consistency and Learners will analyze the effects of heat on food ingredients and evaluate the quality of prepared dishes based on taste, texture, and presentation.	24	Applying
CO5	Participants will develop innovative recipes that showcase creativity and culinary expertise, incorporating diverse ingredients and cooking methods.	9	Understanding

CO – PO Mapping

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3						
CO2			3				
CO3		3					
CO4		3					2

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Students will demonstrate knowledge of culinary history, modern developments in cookery equipment, and the hierarchy and staffing dynamics of professional kitchens.		
M1.01	Introduction to professional Cookery	2	Understanding
M1.02	Culinary history	2	
M1.03	Hierarchy and kitchen staffing	3	

M1.04	Classical brigade –modern staffing in various categories of hotels – role of executive chef – duties and responsibilities of various chef – cooperation with other departments	3	
Contents: Knowledge of culinary history, modern cookery equipment, hierarchy in professional kitchen.			
CO2	Learners will understand the layout and organization of commercial kitchens, including the efficient use of space and the flow of work from receiving to service areas.		
M2.01	General layout of kitchen in various organisations- receiving and preparation area- storage area- cooking areas-service and washing areas-obtaining supplies	9	Understanding
Contents : General layout of kitchen			
CO3	Participants will demonstrate proficiency in handling a variety of culinary equipment, including knives, utensils, and specialized cooking appliances.		
M3.01	Heat production equipment - cold production equipment- ancillary equipment	3	Understanding
M3.02	Knives- utensils- pots and pans - pastry and bakery equipment	3	Understanding
M3.03	Cleaning fixed and portable equipment- various fuels used- advantages and disadvantages of each	2	Understanding
Contents: Proficiency in handling a variety of culinary equipment including knives, utensils and various cooking appliances. Heat production equipment and cold production equipment.			
CO4	Students will apply various cooking techniques, such as roasting, grilling, frying, and baking, to prepare a range of dishes with precision and consistency and Learners will analyze the effects of heat on food ingredients and evaluate the quality of prepared dishes based on taste, texture, and presentation.		
M4.01	Aims and objectives of cooking food- various textures- various consistencies- Techniques used in preparation.	6	Understanding
M4.02	Methods of cooking - roasting -grilling-frying,baking-broiling- poaching -boiling-principles of each of the above-care and precautions to be taken with each method.	6	Understanding
M4.03	Vegetables and fruit cookery- classification of vegetables- effects of heat on vegetables	3	Understanding
M4.04	Cuts of vegetables- classification of fruits-	3	Applying

M4.05	Uses of fruits in cookery- salads and salad dressing. Stocks - definition of stock	3	Understanding
M4.06	Types of stocks- preparation of stock-recipes- storage of stocks- uses-care and precautions in stock making	3	Applying
Contents: Students will be familiarized with cooking techniques such as roasting, grilling, frying, baking etc. Students also learn to make different kinds of soups and sauces. Meat cookery, fish cookery and Egg cookery.			
CO5	Participants will develop innovative recipes that showcase creativity and culinary expertise, incorporating diverse ingredients and cooking methods		
M4.01	Basic principles of food production: Soups and Sauces Shortenings Fats and oils-role, varieties, advantages and disadvantages Raising agents-Classification, Role (actions and Reactions) Thickening agents-Classification, Role Sugar-Importance, Types and Cooking	3	Understanding
M4.02	Basic principles of Food production: Meat Cookery Introduction to meat cookery- cuts of beef/ veal - cuts of lamb/ mutton- cuts of pork- variety meats Fats &Oils ---Types, Varieties	2	Understanding
M4.03	Basic Principles of food production: Fish Cookery Introduction to fish Cookery - classification of fish-cuts of fish- selection of fish- shell fish-cooking of fish (effects of heat)	2	Understanding
M4.04	Basic principles of food production: Egg Cookery Introduction to egg cookery- structure of an egg - selection of egg- uses of egg cookery- methods of cooking egg.	2	Understanding
