

Program: Diploma in Hotel Management and Catering Technology	
Course Code: 2471	Course Title: Fundamentals of Computer
Semester: 2	Credits: 3
Course Category: Basic Technology Course	
Periods per week: 3 (L:3 T:0 P:0)	Periods per semester: 45

Course Objectives:

- Develop a foundational understanding of computer fundamentals, covering topics such as the definition of computers, block diagrams, components, the evolution of computer generations, programming languages, and storage devices. Gain comprehensive knowledge of operating systems, including their introduction, functions, types, components, with specific case studies on DOS and Windows, as well as an understanding of computer networks, covering characteristics, network cables, distributors, routers, and network cards. Acquire a thorough understanding of computer memory components such as RAM, ROM, memory units, different computer ports, hardware components including the motherboard, and be introduced to the Internet, including its definition, network concepts, WWW, search engines, email, websites, and the basics of e-commerce.

Course Prerequisites: Nil

Course Outcomes:

On completion of the course, the student will be able to:

CO_n	Description	Duration (Hours)	Cognitive Level
CO1	Understand the fundamental concepts of computers, including their definition, block diagrams, components, the evolution of computer, generations, programming languages, and storage devices.	10	Understanding
CO2	Gain comprehensive knowledge of operating systems, including their introduction, functions, types, components, with specific case studies on DOS and Windows	10	Understanding

CO3	Understand computer networks, including characteristics, network cables, distributors, routers, and network cards. Acquire a thorough understanding of computer memory components such as RAM, ROM, memory units, different computer ports, hardware components including the motherboard.	15	Understanding
CO4	Gain knowledge on Internet, including its definition, network concepts, WWW, search engines, email, websites, and the basics of e-commerce.	10	Understanding

CO – PO Mapping

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3						
CO2	3						
CO3					3		
CO4				3			

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	Students will understand the fundamental concepts of computers, including their definition, block diagrams, components, the evolution of computer generations, programming languages, and storage devices.		
M1.01	Introduction To Computers - What is a computer, Evolution of Computers, Block Diagram, Components of a computer system, generation of computers	3	Understanding
M1.02	Programming languages, generation of languages	3	Understanding
M1.03	Storage Devices	3	Understanding

Contents : Introduction to Computers, Programming languages, generation of languages, Storage Devices			
CO2	Students will gain comprehensive knowledge of operating systems, including their introduction, functions, types, components, with specific case studies on DOS and Windows		
M2.01	Operating Systems - Introduction, Functions, types, Components,	5	Understanding
M2.02	Case Studies - DOS, Windows	4	Understanding
Contents : Operating Systems , Case studies on DOS and Windows			
CO3	Understand computer networks, including characteristics, network cables, distributors, and routers and network cards. Acquire a thorough understanding of computer memory components such as RAM, ROM, memory units, different computer ports, hardware components including the motherboard.		
M3.01	Computer Networks – Characteristics, Network Cables, Distributors, Router, Network Card	5	Understanding
M3.02	Computer memory components such as RAM, ROM, Memory Units	4	Understanding
Contents: Computer Networks , Computer Memory, Ports, Hardware Components			
CO4	Gain knowledge on Internet, including its definition, network concepts, WWW, search engines, email, websites, and the basics of e-commerce..		
M4.01	Introduction to Internet, Definition, Network Concepts	5	Understanding
M4.02	WWW, Search Engines, Email, Websites and Basics of e-commerce	4	Understanding
Contents: Internet, Search engine, Browsers
