

Program: Diploma in Hotel Management and Catering Technology	
Course Code: 2475	Course Title: Food Production II
Semester: 2	Credits: 3
Course Category: Foundation course	
Periods per week: 4 (L:4 T:0 P:0)	Periods per semester: 60

Course Objectives:

- Provide students with a comprehensive understanding of basic menu planning principles, including the types of menus and essential elements for effective menu design.
- Delve into bakery production, covering pastry recipes, ingredient care, baking techniques, and the role of pastry creams in confectionery.
- Explore fundamental commodities like rice, cereals, pulses, and flour, focusing on classification, cooking methods, wheat flour processing, and the use of shortenings, raising agents, and sugar. Investigate dairy product processing, types, nutritional values, and culinary applications of milk, butter, cream, and cheese.
- Examine basic Indian cookery, emphasizing spices, masala blending, regional variations, and the role of thickening agents in Indian cuisine.

Course Prerequisites: Nil

Course Outcomes:

On completion of the course, the student will be able to:

COn	Description	Duration (Hours)	Cognitive Level
CO1	The course provides an understanding of basic menu planning, covering different types of menus and the principles essential for effective menu design.	12	Understanding
CO2	It offers in-depth knowledge of bakery production, including pastry recipes and preparation methods, the role and care of ingredients, baking temperatures, principles of bread making, and the uses of pastry creams in confectionery.	12	Understanding

CO3	The course explores basic commodities such as rice, cereals, pulses, and flour, focusing on their classification, cooking methods, and the processing and uses of wheat flour, alongside the roles and types of shortenings, raising agents, and different kinds of sugar.	12	Understanding
CO4	It covers the processing, types, nutritional values, and culinary uses of dairy products like milk, butter, cream, and cheese, along with techniques for cooking with these ingredients. The course delves into basic Indian cookery, highlighting the role of spices and condiments, blending and using masalas, regional variations, and the types and roles of thickening agents in Indian cuisine.	12	Understanding

CO – PO Mapping

CO1	3						
CO2			3				
CO3		3					
CO4		3					

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline

Module Outcomes	Description	Duration (Hours)	Cognitive Level
CO1	The course provides an understanding of basic menu planning, covering different types of menus and the principles essential for effective menu design.		
M1.01	Basic Menu Planning, Types of Menu	6	Understanding
M1.02	Menu Design	6	

Contents: Basic Menu Planning. Types of Menu and Principles of Menu Planning.			
CO2	It offers in-depth knowledge of bakery production, including pastry recipes and preparation methods, the role and care of ingredients, baking temperatures, principles of bread making, and the uses of pastry creams in confectionery.		
M2.01	Pastry recipes and methods of preparation Different types	2	Understanding
M2.02	Uses of each pastry Care to be taken while preparing pastry Role of each ingredient Temperature of baking pastry Role of each ingredient Temperature of baking pastry Icings and Toppings Frozen desserts Ice creams Meringues Chocolate makings	6	Understanding
M2.03	Simple breads Principles of bread making Simple yeast breads Role of ingredient in bread making	2	Understanding
M2.04	Baking temperature and its importance Pastry Creams-basic pastry creams in Confectionery-preparation and care in production.	2	Understanding
Contents: Principles of Bread making.			
CO3	The course explores basic commodities such as rice, cereals, pulses, and flour, focusing on their classification, cooking methods, and the processing and uses of wheat flour, alongside the roles and types of shortenings, raising agents, and different kinds of sugar.		
M3.01	Basic commodities: Rice, Cereals, Pulses Classification and identification-cooking of rice, cereals and pulses-varieties of rice and other cereals	3	Understanding
M3.02	Flour-Structure of wheat-types of flour-processing of wheat flour-uses of flour in food production-cooking of flour.	3	Understanding
M3.03	Shortenings (Fats and Oils) and Raising agents Role of shortenings-varieties of shortenings, advantages and disadvantages of using different shortening-fats and oil-types and varieties.	3	Understanding

M3.04	Classification of raising agents-role of raising agents-action and reactions, Sugar-importance of sugar-types of sugar-cooking of sugar –uses	3	Understanding
Contents: Cooking of Rice, Cereals and Pulses			
CO4	It covers the processing, types, nutritional values, and culinary uses of dairy products like milk, butter, cream, and cheese, along with techniques for cooking with these ingredients. The course delves into basic Indian cookery, highlighting the role of spices and condiments, blending and using masalas, regional variations, and the types and roles of thickening agents in Indian cuisine. Aviation and Cruise Line Catering. Menu Planning and Packing criteria for Aviation Catering		
M4.01	Basic commodities: Milk, Butter, Cream, Cheese " Introduction to larder, layout and equipment Brief understanding of Sausages, Force meats, Appetizers and garnishes, Wines and herbs in cooking, Sandwiches, Roulades, Pâté, Chaud-froid	6	Understanding
M4.02	Processing of milk-pasteurization-homogenization	2	Understanding
M4.03	Types of milk-skimmed, condensed Nutritive value	2	Understanding
M4.04	Butter-Processing of butter – types of butter Cream-processing of cream – types of cream Cheese - Processing of cheese –classification of cheese – Types, cooking of Cheese	2	Understanding
M4.05	Basic Indian Cookery - Condiments and spices – introduction to India food – spices used in Indian Cookery-role of spices in Indian cookery – Indian equivalent of spices (names), Basic masalas blending and spices and concept of masala-different masalas used in Indian cookery- wet masalas and dry masalas-different masalas ,varieties of masalas available in regional areas-special masala blends. Thickening agents-role of thickening agents in Indian cuisine- types of thickening agents International cuisine, Staple food with regional-influences-France, Italy, Oriental, Mexican, and Arabic 3. Introduction to Chinese Foods Historical background of Chinese food,	12	Understanding

	Methods of cooking, Equipment, and utensils for Chinese cooking Contents: Basic Commodities, Types of Butter, Processing of cream, types of cheese, cooking of cheese. Basic Indian Cookery. Menu Planning for Cruise Line and Aviation Catering, Packing criteria for Aviation catering.		
Contents: Basic Commodities, Types of Butter, Processing of cream, types of cheese, cooking of cheese. Basic Indian Cookery. Menu Planning for Cruise Line and Aviation Catering, Packing criteria for Aviation catering, Basic Indian Cooking
