

Program : Diploma in Information Technology	
Course Code : 4268	Course Title: Advanced Web Development Lab
Semester : 4	Credits: 1.5
Course Category: Program Core	
Periods per week: 3 (L:0 T:0 P:3)	Periods per semester: 45

Course Objectives:

- To develop web applications using PHP and MySQL with the help of jQuery, AJAX and Bootstrap.

Course Pre-requisites:

Topic	Course code	Course Name	Semester
Knowledge of HTML,CSS and JavaScript		Fundamentals of Web Development	3
Skills to design web pages		Fundamentals of Web Development Lab	3

Course Outcomes:

On completion of the course, students will be able to:

CO _n	Description	Duration (Hours)	Cognitive Level
CO1	Develop PHP applications	10	Applying
CO2	Develop web applications using PHP and MySQL	10	Applying
CO3	Develop applications with PHP, XML, AJAX, and MySQL.	10	Applying
CO4	Develop web pages using Bootstrap 3	12	Applying
	Lab Exam	3	

CO – PO Mapping

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3						
CO2	3						
CO3	3						
CO4	3						

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline

Module Outcomes	Name of the Experiment	Duration (Hours)	Cognitive Level
CO1	Develop PHP applications		
M1.01	Develop a PHP program to Create a simple calculator.	2	Applying
M1.02	Develop a PHP program to create an associate array with details of a student like roll number, name, class, year, fees paid. Add new two elements after creating the array and print all elements in the array using for-each loop inside an HTML table with each item in a row.	2	Applying
M1.03	Develop a PHP program to create a two-dimensional indexed array that contains detailsof 5 students (roll number, Name, class, year, place etc) and print the details into an HTML table each student in a row using for-each loop	2	Applying
M1.04	Develop 3 PHP programs to demonstrate session operation. First program saves data into session, second displays the session data and third deletes it.	2	Applying
M1.05	Develop PHP programs to demonstrate cookie operations A program creates a cookie, second displays the data and third modifies it and fourth deletes it. Set the cookie for 60 seconds and demonstrate the auto expiry.	2	Applying
CO2	Develop web applications using PHP and MySQL		
M2.01	Develop PHP program to perform login operation, check with username and password stored inside MySQL table.	5	Applying

M2.02	Develop PHP program to display the mark list of all students in class stored inside MySQL table.	5	Applying
	Lab Exam – I	1.5	
CO3	Develop applications with PHP, XML, AJAX, and MySQL		
M3.1	Develop an AJAX Program to load a text file into a webpage when user clicks a button.	1	Applying
M3.2	Develop an AJAX Program to load an XML file that contains India's states and districts in to a webpage.	1	Applying
M3.3	Develop an AJAX Program to load a student's data from database and display it in a table.	2	Applying
M3.4	Develop a jQuery program to implement focus and blur event to all text boxes inside a form, when user focus on the textbox set background colour to gray, when blurred set it back to white.	2	Applying
M3.5	Develop a jQuery program Demonstrate hide/show, fade and slide effects on a div.	2	Applying
M3.6	Develop a jQuery program to load a text stored in server when user clicks on a button in webpage using AJAX.	2	Applying
CO4	Develop web pages using Bootstrap 3.		
M4.1	Create a table using Bootstrap to display student details.	4	Applying
M4.2	Create a login form using Bootstrap.	4	Applying
	Open Ended Project	4	
	Lab Exam – II	1.5	

***Suggested Open-ended Experiments:

(Not for End Semester Examination but compulsory to be included in Continuous Internal Evaluation). Students can do open-ended experiments as a group of 3-5. There is no duplication in experiments in between groups. This is mainly for the purpose of continuous internal evaluation and a score of 15 marks. Students should prepare a separate report on open ended experiment of their choice.

Example: Develop web applications such as

1. SALARY BILL OF AN EMPLOYEE WITH MySQL DATABASE.

2. STUDENT DETAILS WITH AJAX AND MySQL.
