

Program : Diploma in Information Technology	
Course Code : 5268	Course Title: Object Oriented Web Development Lab
Semester : 5	Credits: 1.5
Course Category: Program Core	
Periods per week: 3 (L:0 T:0 P:3)	Periods per semester: 45

Course Objectives:

- To study the concepts of Object-Oriented PHP.
- To provide exposure to develop web applications using MVC Framework.

Course Pre-requisites:

Topic	Course code	Course Name	Semester
Basic Knowledge of PHP		Advanced Web Development	4

Course Outcomes:

On completion of the course, students will be able to:

COn	Description	Duration (Hours)	Cognitive Level
CO1	Implement Basic OOP concepts in PHP	9	Applying
CO2	Implement Inheritance in PHP	11	Applying
CO3	Implement advanced OOP functionality, Error handling and MVC	12	Applying
CO4	Develop applications using CodeIgniter.	10	Applying
	Lab Exam	3	

CO – PO Mapping

Course Outcomes	PO1	PO2	PO3	PO4	PO5	PO6	PO7
CO1	3						

CO2	3						
CO3	3						
CO4	3		3	3			

3-Strongly mapped, 2-Moderately mapped, 1-Weakly mapped

Course Outline

Module Outcomes	Name of the Experiment	Duration (Hours)	Cognitive Level
CO1	Implement Basic OOP concepts in PHP		
M1.01	Develop PHP program to implement class and object	2	Applying
M1.02	Develop PHP program to implement class, object, constructor and destructor.	2	Applying
M1.03	Develop PHP program to implement access control	2	Applying
M1.04	Develop PHP program to implement accessor functions	3	Applying
CO2	Implement Inheritance in PHP		
M2.01	Develop PHP program to implement Inheritance.	3	Applying
M2.02	Develop PHP program to demonstrate the use of final method.	4	Applying
M2.03	Develop PHP program to implement Interfaces.	4	Applying
	Lab Exam – I	1.5	
CO3	Implement advanced OOP functionality, Error handling and MVC		
M3.1	Develop PHP program to demonstrate the use of per-class constant.	3	Applying
M3.2	Develop PHP program to implement static methods	3	Applying
M3.3	Develop PHP program to implement Exception Handling.	3	Applying
M3.4	Develop PHP program to Display a message using PHP MVC.	3	Applying
CO4	Develop applications using CodeIgniter		
M4.1	Demonstrate how to install CodeIgniter 3.x into LAMP Server and set initial configurations	2	Applying

M4.2	Create a login form view and load the view into a controller	3	Applying
M4.3	Create a registration form and validate it using form validation library and saves the data in to database using active record method	3	Applying
M4.4	Use session library to add data into CodeIgniter session and display them in another view	2	Applying
	Lab Exam – II	1.5	

**** Open Ended Projects**

(Not for End Semester Examination but compulsory to be included in Continuous Internal Evaluation. Students can do open ended experiments as a group of 2-3. There is no duplication in experiments between groups. Open ended experiments should include the concepts of arrays, functions and structures)

1. Implement Class.
2. Implement Inheritance etc.

SAMPLE QUESTIONS TO TEST OUTCOMES

1. Implement a PHP program to find the area of a rectangle.
2. Familiarize with CodeIgniter.
