| 6. | Point out the factors to be considered in the acoustical design of concert hall. |
| 7. | Differentiate between traction elevator and hydraulic elevator. |

(5X6)

PART-C

(Maximum Marks: 60)

(Answer one full question from each unit)

MODULE-I

- III. a. Illustrate with sketches plate earthing. (10)
 b. State any five factors that influence earth resistance. (5)

OR

- IV. a. Explain with sketches systems of distribution of electrical energy. (10)
 b. List out advantages and disadvantages of loop-in system. (5)

MODULE-II

- V. a. Explain with sketches working of displacement pumps. (10)
 b. List out any five requirements of efficient distribution system. (5)

OR

- VI a. Describe any four commonly used pipe joints. (10)
 b. Draw a cross section through an elevated reservoir and mark different parts. (5)

MODULE-III

- VII a. Explain with sketches the design and constructional aspects of septic tank. (10)
 b. Describe with sketches the working of flushing cistern. (5)

OR

- VIII a. Explain essentials of an air conditioned system. (12)
 b. Differentiate between exhaust system and plenum system. (3)

MODULE-IV

- IX a. Describe fire resistant construction of structural elements. (12)
 b. Explain how buildings are classified according to fire load. (3)

OR

- X a. Explain structural provisions to be made for lift installation. (12)
 b. State Sabine's formulae (3)
