4. Explain the requirement of a good water meter.
5. Compare conservancy system and water carriage system.
6. State the requirements of good building drainage system.
7. Describe the effect of air pollution

(5 x 6= 30)

PART- C

(Maximum Marks : 60)

MODULE-I

(Answer one full question from each unit. Each question carries 15 marks)

- . III a. List the important points to be considered for the proposal of new water supply scheme. 8
- b. Explain variations in rate of demand 7

OR

- IV a. Explain the various methods which are adopted to estimate population of each successive decade . 8
- b. Explain the need of laboratory test for water . 7

MODULE-II

- V a. Describe the construction and operation of slow sand filter with a neat sketch 8
- b. Explain the causes and prevention of pipe corrosion 7

OR

- VI a. Explain with sketches the different layout of distribution system of water supply 8
- b. List the advantages and disadvantages of using alum as a coagulants 7

MODULE-III

- VII. a. Write short notes on cast iron and cement concrete sewer pipes 8
- b. Explain Grid iron system with a neat sketch 7

OR

- VIII .a. Explain the constructional details of a trickling filter with neat sketch 8
- b. Mention physical characteristics of sewage. 7

MODULE-IV

- IX a. Explain the working of an oxidation pond with a neat sketch 8
- b. Mention the main gases which act as air pollutants 7

OR

- X. a. Describe with sketches the construction of any two types of sanitary latrines on rural areas 8
- b. Define air pollution? List the various sources of air pollution? 7
