

COURSE DESCRIPTION			
Program	Architecture		
Course Title	History of Architecture - I		
Course Code	2183	Semester	II
Type of Course	Theory	Contact Hours	45
Teaching Scheme (L: T:P:R)	3:0:0:0	Credits	3
CIE Marks	40	ESE Marks	60

Introduction

This course traces the evolution of architecture from prehistoric shelters to classical civilizations, highlighting the influence of climate, materials, culture, religion, and technology on built forms. It introduces key architectural developments, construction techniques, and settlement patterns, helping students understand architecture as a response to human needs and environmental conditions.

Course Objectives

1	To introduce the evolution of architecture from prehistoric times to classical civilizations.
2	To understand the influence of geography, climate, culture, religion and technology on early architecture.
3	To familiarize students with settlement planning, building typologies, construction methods and materials of ancient vedic and buddhist civilizations.
4	To develop the ability to identify and illustrate significant architectural examples from history.

Course Pre-requisite

Topic	Course code	Course Title	Semester
Basic knowledge of early civilizations			Secondary Education

Course Outcome

CO	Course Outcome	Blooms Taxonomy Level
CO1	Explain prehistoric and primitive human settlements and burial systems.	Understand
CO2	Describe the features of River Valley Civilizations.	Understand
CO3	Discuss the architectural features of Vedic and Buddhist period.	Understand
CO4	Summarize the architecture styles and contributions of Greeks and Romans.	Understand

Syllabus – Major Topics

Module	Title	Major Topics	Instructional Hours	
			L	T
Module I	Prehistoric Architecture	Primitive people and early human lifestyle - Types of shelters: caves, rock shelters, oval huts - Settlement patterns of prehistoric communities - Burial systems and megalithic structures- Oval huts near Nice, Dolmen tombs, Gallery graves, Passage graves, Cairns, Tumulus - Early settlements: Houses at Çatalhöyük - Stonehenge as a prehistoric monument	11	0
Module II	River Valley Civilizations	Role of ecology, rivers, and geography in settlement planning - Influence of climate, social, cultural, religious, and political systems - Egyptian Civilization (Nile Valley): - Settlement characteristics and town planning - Shelters, civic and religious buildings - Religious burial systems ,cult temples and Mortuary temples. - Construction methods and materials - Mesopotamian Civilization: ziggurats, palaces, city walls - Indus Valley Civilization : grid planning, drainage, Citadel and Lower town,civic utilities-Granaries and Great bath.	12	
Module III	Vedic & Buddhist Architecture	Aryan / Vedic civilization: settlement planning principles - Town and village forms in Vedic period - Typology of shelters in Vedic civilization - Construction materials and methods in early Indian settlements - Buddhist period - forms of structures - stupa - Sanchi stupa - stambha - Asoka pillar at Sarnath - Chaithya halls - Chaithya hall at Karli - Viharas - planning pattern of viharas at different periods - rock cut caves at Ajantha	10	
Module IV	Classical Architecture	Factors influencing the architectural style of Greece - Geographical, Geological, Climatic - Historical, Religious and Social conditions - general character - orders of architecture -Doric, Ionic, Corinthian - Temple architecture - temple of Parthenon at Athens. - Factors influencing the architectural style of Romans - Geographical, Geological, Climatic, - Historical, Religious and Social conditions - general character - public structures, temple - Architecture - Pantheon Rome	12	

Detailed Syllabus

Subtopic	Student Learning Outcome	Mode of delivery (L/T)	Mapped CO	Taxonomy Level	Instructional Hours
Module I					
Primitive shelters & settlements	Explain the evolution of early human shelters and settlement patterns in response to climate, materials, and social needs.	L	CO1	Understand	3
Burial systems	Identify and describe prehistoric burial practices and relate them to cultural beliefs and social structure.	L	CO1	Understand	3
Megalithic structures	Classify different types of megalithic structures and explain their functional and cultural significance.	L	CO1	Understand	2
Catal Huyuk & Stonehenge	Discuss the construction techniques, spatial organization, and socio-cultural importance of early monumental structures.	L	CO1	Understand	3
Module II					
Egyptian Civilization – Ecology, Settlement & Society	Explain the role of ecology, rivers, and geography in settlement planning and the influence of climate, social, cultural, religious, and political systems on settlement characteristics, town planning, shelters, civic buildings, and religious buildings of the Egyptian (Nile Valley) civilization.	L	CO2	Understand	2
Egyptian Civilization – Religion, Temples & Construction	Describe religious burial systems, cult temples, and mortuary temples, and explain the construction methods and materials used in Egyptian architecture	L	CO2	Understand	2
Pyramids – Evolution & Symbolism	Explain the evolution of Egyptian pyramids from early forms to true pyramids with reference to form, symbolism, and construction methods.	L	CO2	Understand	2
Temples – Form & Construction	Explain the development of Egyptian temple architecture with reference to form, symbolism, cult and mortuary temples, and construction techniques	L	CO2	Understand	2
Mesopotamian	Identify the planning principles, structural systems, and architectural features of ziggurats and Mesopotamian cities.	L	CO2	Remember	2
Indus Valley	Explain town planning principles, drainage systems, and major civic structures of the Indus Valley Civilization.	L	CO2	Understand	3
Module III					

Vedic villages	Describe the spatial organization of Vedic villages and relate settlement patterns to social and occupational activities.	L	CO3	Understand	3
Stupas	Explain the components of a stupa and their symbolic and functional significance.	L	CO3	Understand	2
Chaityas & Viharas	Explain the evolution of rock-cut chaityas and viharas and their role in Buddhist religious life.	L	CO3	Understand	2
Ashokan pillars	Identify the architectural features, materials, and inscriptions of Ashokan pillars and explain their historical importance.	L	CO3	Remember	2
Module IV					
Greek architecture	Explain the geographical, geological, climatic, historical, religious, and social factors that influenced Greek architectural style.	L	CO4	Understand	3
Greek Architecture – General Character & Orders	Describe the general character of Greek architecture and the features of Doric, Ionic, and Corinthian orders.	L	CO4	Understand	3
Parthenon	Describe the architectural features, refinements, and proportional system of the Parthenon as a classical Greek monument.	L	CO4	Understand	2
Roman architecture	Explain the characteristics of Roman architecture, including major public structures, temple architecture, structural systems, and engineering developments in relation to earlier traditions.	L	CO4	Understand	4

Suggested Student Activities for Self-Learning

Week	Self-Learning description	Hours
Module I		
1	Prepare visual notes on prehistoric shelters (caves, huts, rock shelters). Prepare illustrated notes on early human settlements.	4.5
2	Prepare a poster illustrating types of megalithic structures. Write a short note on prehistoric burial practices with sketches	4.5
3	Draw plan and structural sketch of Stonehenge. Prepare illustrated sketches of Çatalhöyük settlement (house form, access and layout)	4.5
Module I		
4	Prepare sketches showing the evolution of Egyptian tombs and pyramids. Draw illustrated sketches of the Giza Pyramid Complex	4.5
5	Prepare a comparison chart of pyramids and ziggurats. Write notes on determinants of form in Egyptian architecture.	4.5
6	Draw the town layout of an Indus Valley city. Prepare illustrated notes on civic structures of Indus Valley Civilization (Great Bath, Granaries).	4.5
7	Write notes on climate-responsive features of river valley civilizations. Prepare a comparative table of Egyptian, Mesopotamian and Indus Valley civilizations.	4.5
Module I		
8	Prepare illustrated sketches showing Vedic village planning. Write a short note on settlement hierarchy in the Vedic period.	4.5
9	Prepare labeled sketches of Buddhist architectural elements. Draw plan, section and elevation of Chaitya Hall at Karli.	4.5
10	Draw plan and section of Sanchi Stupa. Prepare notes on construction techniques and materials used in Buddhist architecture.	4.5
11	Prepare comparative sketches of Chaitya and Vihara forms. Write notes explaining the evolution of rock-cut architecture.	4.5
Module I		
12	Study and illustrate proportions of Greek and Roman architectural orders. Use AI applications to generate comparative visuals of Greek and Roman architectural orders and prepare an analytical comparison chart.	4.5
13	Analyze the proportions of the Parthenon through drawings. Write notes on optical corrections in Greek temple architecture.	4.5

14	Prepare illustrated drawings of Roman monuments such as the Pantheon and Colosseum. Compile case examples of Roman public structures.	4.5
15	Write a short note on Roman engineering innovations. Prepare case examples of Roman aqueducts and road networks.	4.5
Total Self-Learning hours		67.5
