

COURSE DESCRIPTION			
Program	Commercial Practice		
Course Title	Visual Design and Smart Publishing		
Course Code	1149	Semester	I
Type of Course	Lab	Contact Hours	30
Teaching Scheme (L: T:P:R)	0:0:2:0	Credits	1
CIE Marks	40	ESE Marks	60

Introduction

Visual design and smart publishing work together to present information clearly and attractively. Visual design uses colours, images, fonts, and layouts to make content easy to understand and pleasant to view. Smart publishing uses digital tools to create and share this content through websites, e-books, and multimedia. Together, they help communicate better, reach more people, update content quickly, and allow easy access on different devices.

Course Objectives

1	To understand the basic principles and develop skills in visual design.
2	To create visually appealing and user-friendly content and use the digital tools for smart publishing.
3	To use online, e-book, and multimedia publishing platforms.
4	To enable effective creation, management, and distribution of digital content

Course Pre-requisite

Topic	Course code	Course Title	Semester
Basic Computer skills			Secondary Education

Course Outcome

CO	Course Outcome	Blooms Taxonomy Level
CO1	Construct professional page layouts for digital media using InDesign.	Apply
CO2	Apply Adobe Photoshop image editing tools and techniques to produce professional-quality visual results.	Apply
CO3	Develop vector-based illustrations and designs using CorelDRAW tools	Apply
CO4	Utilize design platforms like Canva to transform ideas into visual content.	Apply

L: Lecture (One unit is of one-hour duration with one credit), T: Tutorial (One unit is of one-hour duration with one credit), P: Practical (One unit is of one-hour duration with 0.5 credit), S: Project (One unit is of one-hour duration with 0.5 credit) SS: Self-Learning, CIE: Continuous Internal Evaluation, ESE: End Semester Examination

Detailed Syllabus

Expt No.	Experiment name	Practical Outcome	Mapped CO	Taxonomy Level	Instructional Hours
Module I					
1	InDesign interface and workspace	Discover Tools panel and control panel (Selection, Text, Shape, Frame, colour etc). Use Panels (Pages, Layers, Links, Swatches, etc.). Ascertain the workspace, document setup-Page size, margins, bleed & slug.	CO1	Apply	1
2	Apply Typography principles	Construct Text frames & threading Apply Character & Paragraph formatting options. Change fonts using font management techniques. Use Text wrap, adjust Alignment & spacing. Apply Bullets & numbering. Use Styles (Paragraph, Character, Object)	CO1	Apply	2
3	Page Management	Customise Page-Add, Delete, Duplicate, Apply Master pages and page numbering, Orientation. Use Grids, guides, rulers, and columns. Provide Alignment and distribute objects accurately.	CO1	Apply	2
4	Working with Images & Graphics	Acquire images using the Place command. Classify and Save images such as (JPEG, PNG, TIFF, PSD). Use Scale & fit images appropriately within frames. Apply image links using the Links panel. Employ Clipping paths to images. Change Image resolution & quality.	CO1	Apply	2
5	Tables & Advanced Text Features	Draw tables within documents. Apply Table styles and format Table. Modify documents as PDFs for print & digital use. Use printing tools and processes to produce finalized documents.	CO1	Apply	1
Module II					
6	Photoshop Interface & Workspace	Explore the Photoshop workspace & panels. Use Photoshop Tools for image editing tasks. Classify and Save images such as (PSD, JPG, PNG, TIFF). Exercise to manage layers. Apply Layer styles & effects. Adapt Opacity & blending modes.	CO2	Apply	2
7	Working with Tools panel	Use Selection tools. Exercise Image Retouching & Correction. Apply Colour Correction & Adjustment. Use Painting & Drawing Tools. Apply Text & Typography. Provide Filters & Effects (Blur, sharpen, Artistic etc).	CO2	Apply	3
8	Working Colour & Tone Adjustments	Employ Foreground & background colors. Apply appropriate Color modes (RGB, CMYK, Grayscale). Change Brightness/ Contrast of images, Levels & Curves, adjust Hue/Saturation values.	CO2	Apply	2
9	Image Creation & Basic Editing	Handle Open & saving image files. Relate Canvas size vs image size. Demonstrate Crop & straighten images. Use Undo, redo, history panel, Print setup.	CO2	Apply	1
Module III					
10	Explore CorelDRAW workspace & tools	Assign Page size, orientation & rulers. Use Zoom, pan & view modes. Construct & save documents.	CO3	Apply	1

11	Working with Tools Panel	Use Shape tools to create objects. Apply Freehand, Bezier & Pen tools. Change Shapes using node editing techniques. Use Pick tool functions. Modify Objects (move, rotate, scale). Apply Align & distribute objects. Apply Colour, Fill & Outline.	CO3	Apply	2
12	Working with text effects	Discover the difference between Artistic text vs paragraph text. Use Text formatting tools. Apply Text on path effects. Change text to curves. Apply Effects tools: such as shadow, Transparency, Contour etc.	CO3	Apply	2
13	Image Layout & Print	Acquire bitmap images and edit Bitmap images using basic tools. Apply Shaping tools such as weld, trim, intersect. Use Print settings. Apply Bleed, margins & crop marks. Customise designs in suitable formats.	CO3	Apply	2
Module IV					
14	Getting Started with ISM Publisher	Apply basic settings of ISM-Select scripts and tune application. Change Inscript to English keyboard modes, configure keyboard and font settings.	CO4	Apply	2
15	Canva Tool - Basic Design Creation	Explore the Canva interface and basic tools. Use search and filter options to locate designs. Assign appropriate page sizes and design layouts. Apply fonts, colours, and alignment options. Use elements such as shapes, icons, and photos.	CO4	Apply	2
16	Working with Vector Tools (Canva / Inkscape)	Discover a YouTube thumbnail template and add background colour or image. Employ small icons or pictures for emphasis. Use Inkscape software-Set the page size to 1280 × 720 pixels, add large, readable text. Provide images or draw simple shapes, save the thumbnail as a PNG file.	CO4	Apply	3

Open-ended experiment

Objective:

To encourage creativity, innovation, and application of knowledge by allowing students to design and perform an experiment beyond the prescribed list, using the concepts learned during the course.

Description:

At the end of the laboratory course, each student (or group of students) shall undertake one open-ended experiment. In this activity, students are expected to conceive, design, and implement an experiment of their own choice related to the course outcomes. The aim is to apply theoretical knowledge and laboratory skills to a new or practical problem not explicitly covered in the regular experiments.

Students may choose to:

Modify or extend an existing experiment to explore additional parameters or behaviors.
Integrate multiple concepts from the syllabus into a combined application.

Design a mini-setup or prototype to demonstrate a principle or solve a simple engineering problem.
Perform a comparative study or performance analysis of a circuit/system/component.

Student Activities for Self-Learning

Week	Self-Learning description	Hours
Module I		
1	Identify Selection Tool, Text Tool, Rectangle & Shape Tools and try to create a new document and share it.	1
2	Create a mini "quote poster" with your favourite quote and display on the notice board.	1
3	Make a simple "abstract poster" using only shapes and colours and share it.	1
4	Redesign a "Book Cover" from your favourite book and share it.	1
Module II		
5	Create a "quote image" with a favorite saying and share.	1
6	Edit a photo to make it brighter and more colourful and share in google drive.	1
7	Remove the background of an image and replace it	1

8	Prepare for lab exam	1
Module III		
9	Apply outline/stroke to shapes and share it.	1
10	Design a “quote card” or ‘nameplate’ and share it.	1
11	Use alignment tools to arrange objects neatly and make a copy.	1
12	Design a “school club logo” or “event poster” and display on the department notice board.	1
Module IV		
13	Design a “simple brochure” or ‘flyer’ using Malayalam font and share it.	1
14	Use Canva templates to create Posters or digital flashcards or Make a timeline.	1
15	Prepare for lab exam	1
Total Self-Learning hours		15

Learning Resources

TEXT BOOK			
Sl. No.	Title	Author	Publication
1	Simplified DTP Course Book	Singh Vishnu P.	Asian Publishers
2	Learning Desk Top Publishing	Ramesh Bangia	Khanna publishers
3	Introduction to Desktop Publishing with Adobe InDesign	Indranil Roy	Notion Press

REFERENCE

Major Equipment/Instruments/Components required for a batch of 30 students

Sl. No.	Particulars	Specifications	Quantity
1	Desktop system	Intel Core i5/AMD Ryzen 5, 16GB RAM (8GB minimum), and a 512GB SSD, running Windows with a 24-inch Full HD monitor	30
2	Internet access	64 Mbps(Minimum)	30
3	Printer	Epson Ecotank L3260 A4 Wi-Fi All-in-One Ink Tank Colour Printer, Black/any other	1

Major Software required for a batch of 30 students

Sl. No.	Particulars	Specifications	Quantity
1	ISM Software/any other Malayalam typing software	Latest	30
2	Adobe InDesign	Latest	30
3	Adobe Photoshop	Latest	30
4	CoreDRAW	Latest	30
5	Online Access to Canva, Inkscape etc	Latest	30

Assessment Methodology - Lab

Mode	Attendance	CE	CA1	CA2	OEE	ESE
		Continuous evaluation	Practical test (first half of experiments)	Practical test (second half of experiments)	Open-ended experiment	Practical
Duration			3 hours	3 hours		3 hours
Exam mark		50	40	40	50	40
Converted to		30	15	15	10	
Marks	5	30	15		10	40
Total marks	60					40
Tentative schedule	End of semester	Every lab slot	7th week	14th week	15th week	

Scheme of Evaluation - Practical (Continuous Internal Evaluation)

Sl. No.	Criteria	Description	Marks
1	Preparation & Punctuality	Attendance, timely submission of practical record/assignments, pre-practical preparation, familiarity with software interface, tools, and objectives of the design task.	10
2	Tool Usage & Practical Procedure	Ability to correctly use design software tools (InDesign, Photoshop, CorelDRAW, Canva/Inkscape), proper workspace setup, systematic execution of steps, and adherence to design workflow.	10
3	Design Execution & File Management	Accuracy in layout creation, typography, image handling, colour usage, layer/page management, and proper file naming, saving, and format selection.	5
4	Output Quality & Design Interpretation	Visual quality of output, correct application of design principles, colour and tone adjustments, image resolution, print/export settings, and logical completion of assigned task.	10
5	Viva Voce / Concept Understanding	Understanding of design concepts, tools, commands, file formats, colour modes, typography principles, and ability to explain the procedure and output.	10
6	Workmanship, Discipline & Creativity	Lab discipline, care of systems and software, originality, creativity, time management, and professional attitude during practical sessions.	5
Total			50

Scheme of Evaluation - Practical Test & End Semester Evaluation

Category	Things to evaluate	Marks
Write-up / Procedure (before experiment)	Aim of the design task, software/tools used, design workflow (layout plan / steps), understanding of typography, colour modes, and output requirements.	10
Practical Execution & Tool Usage	Correct use of software (InDesign / Photoshop / CorelDRAW / Canva/Inkscape), workspace setup, use of tools and panels, systematic execution of design steps, and time management.	10
Output / Result	Quality of layout/design output, correct application of typography, colour correction, image handling, alignment, resolution, and achievement of expected visual result.	8
Viva Voce	Conceptual understanding of design principles, tools, file formats, colour modes, typography, export/print settings, and ability to explain the procedure followed.	8
Record	Completion and neatness of practical record, inclusion of outputs/screenshots, proper labelling, and certification by faculty.	4
Total		40

Scheme of Evaluation - Open-ended experiment

Category	Things to evaluate	Marks
Originality and Relevance of the Idea	Assesses how creative, innovative, and relevant the chosen experiment is to the course objectives.	10
Clarity of Objectives and Experimental Plan	Evaluates how clearly the student defines the aim, scope, and systematic plan of the experiment.	10
Correctness of Execution and Data Recording	Checks the accuracy, safety, and neatness in performing the experiment and recording observations.	10
Analysis, Interpretation, and Presentation of Results	Measures the student's ability to analyze data, interpret outcomes, and present results logically.	10
Teamwork and Innovation Demonstrated	Judges the level of collaboration, initiative, and creativity shown during the experiment.	10

Total	50
