

COURSE DESCRIPTION			
Program	Commercial Practice		
Course Title	Digital Marketing and AI Tools for Business		
Course Code	2147	Semester	II
Type of Course	Lab	Contact Hours	60
Teaching Scheme (L: T:P:R)	0:0:4:0	Credits	2
CIE Marks	40	ESE Marks	60

Introduction

This course introduces practical digital marketing skills using online tools and platforms. Students learn to create business profiles, manage reviews, list products online, and use AI tools for marketing content through hands-on training in a computer lab environment.

Course Objectives

1	To introduce students to the basic concepts and tools of digital marketing and online business promotion.
2	To develop practical skills in creating and managing online business profiles, including location listing and customer review management.
3	To enable students to list and promote products on e-commerce and online platforms effectively
4	To familiarize students with AI tools and prompt engineering for generating marketing content and digital promotional materials

Course Pre-requisite

Topic	Course code	Course Title	Semester
Basic idea about business	1141	Fundamentals of business	I
Fundamental Knowledge in computer	2149	Typewriting and word processing-I	I

Course Outcome

CO	Course Outcome	Blooms Taxonomy Level
CO1	Apply basic digital marketing concepts to create and manage online business profiles and digital marketing activities.	Apply
CO2	Demonstrate the ability to establish an online presence by adding business locations, managing customer reviews, and creating business pages on digital platforms.	Apply
CO3	Apply e-commerce platforms for the promotion of products by preparing product descriptions, images, and basic online promotional content.	Apply
CO4	Use AI tools and prompt engineering techniques to generate marketing content and adopt modern digital marketing practices.	Apply

Detailed Syllabus

Expt No.	Experiment name	Practical Outcome	Mapped CO	Taxonomy Level	Instructional Hours
Module I					
1	Introduction to marketing	- Understand the basic concepts and importance of marketing Management - Differentiate between marketing and selling. - Identify the elements of the marketing mix (Product, Price, Place, Promotion).	CO1	Understand	4
2	Prepare a comparison between Traditional Marketing and Digital Marketing	- Distinguish between traditional marketing and digital marketing - Identify common tools used in both approaches. - Compare the advantages and limitations of both marketing methods.	CO1	Apply	4
3	Conduct a simple consumer preference survey among students.	- Design and conduct a simple survey to collect consumer data. - Record and organise survey responses in a systematic manner. - Analyse the collected data to identify consumer preferences and trends.	CO1	Apply	4
4	Design a brand name, slogan and packaging idea for a product	- Develop creative brand names and slogans suitable for a product. - Identify the role of attractive packaging in influencing customer purchase decisions.	CO1	Apply	3
Module II					
5	Create a professional Gmail account for business use.	Demonstrate the creation of a professional email account for business communication using Gmail.	CO2	Apply	3
6	Create a Google Business Profile for a sample business.	Develop basic skills in creating and managing an online business presence.	CO2	Apply	2
7	Prepare a business profile description.	Create a business listing using Google Business Profile. and Add essential business details such as business name, category, location, contact information, and working hours..	CO2	Apply	2
8	Upload business photos and service details in Google Business Profile.	Upload business photos and service details using Google Business Profile.	CO2	Apply	2
9	Analyse Google reviews of a local business and prepare a short report.	- Analyse customer feedback available on Google Business Profile and Google Maps. - Summarize customer feedback and prepare a simple analytical report.	CO2	Apply	3
Module III					
10	Study major online selling platforms in India and compare their features.	Discover major online selling platforms in India, such as Amazon, Flipkart, Meesho, JioMart, and Snapdeal, and explain the procedure for selling products on any one online selling platform.	CO3	Apply	4
11	Prepare a product listing format including title, description, price and images.	Demonstrate the product listing procedure on any one online selling platform.	CO3	Apply	4
12	Prepare a product catalogue for WhatsApp Business.	- Create and organize a product catalogue using WhatsApp Business. - Add essential product details such as product name, description, price, and images in the catalogue. - Develop practical skills in using messaging platforms for online product promotion and sales.	CO3	Apply	4
Module IV					

13	Introduction to AI Tools for Marketing and Business Applications	Identify AI tools used in marketing and business. (Understand basic functions of tools like ChatGPT, Google Gemini, Canva, Microsoft Copilot, and Grammarly. Recognize how AI supports content creation, communication, design, and business writing., Develop basic skills in using AI tools for marketing and business activities.)	CO4	Apply	3
14	Write basic prompts to generate marketing content using AI tools.	- Understand the concept of prompt writing for generating content using AI tools. - Write clear and effective prompts to generate marketing content. - Use AI tools such as ChatGPT and Google Gemini to create marketing messages. - Generate different types of marketing content such as advertisement text, product descriptions, and promotional messages. - Develop basic skills in using AI tools for marketing communication and content creation.	CO4	Apply	4
15	Generate product descriptions using AI.	Develop practical skills in using AI tools for product promotion and e-commerce content creation.	CO4	Apply	2
16	Create advertisement slogans and captions using AI.	Demonstrate the procedure for selling a product through online platforms (at least three platforms), including an explanation of basic SEO techniques and the effective use of keywords for product listing and visibility.	CO4	Apply	2
17	Generate social media promotional content using AI tools.	- Use Artificial Intelligence tools to create promotional content for social media. - Develop practical skills in using AI tools for digital marketing and online promotion.	CO4	Apply	3
18	Social media monetisation	Explore social media Monetisation Techniques (Advertisement revenue, sponsored content and brand collaborations, affiliate marketing, digital product sales, subscriptions, and live streaming income)	CO4	Apply	4
19	AI Email Marketing Draft	Develop practical skills in using AI tools for business communication and email marketing.	CO4	Apply	4

Open-ended experiment

Objective:

To encourage creativity, innovation, and application of knowledge by allowing students to design and perform an experiment beyond the prescribed list, using the concepts learned during the course.

Description:

At the end of the laboratory course, each student (or group of students) shall undertake one open-ended experiment. In this activity, students are expected to conceive, design, and implement an experiment of their own choice related to the course outcomes. The aim is to apply theoretical knowledge and laboratory skills to a new or practical problem not explicitly covered in the regular experiments.

Students may choose to:

Modify or extend an existing experiment to explore additional parameters or behaviors.
Integrate multiple concepts from the syllabus into a combined application.
Design a mini-setup or prototype to demonstrate a principle or solve a simple engineering problem.
Perform a comparative study or performance analysis of a circuit/system/component.

Student Activities for Self-Learning

Week	Self-Learning description	Hours
Module I		
1	Prepare a note on marketing—meaning and definition, features, and advantages.	2
2	Enroll in an online Marketing Management course and write down your learnings.	2
3	Watch a video tutorial on the promotional mix and write a brief summary	2
4	Select a brand name and its logo, and prepare a note explaining the meaning and history behind the brand name and logo.	2
Module II		
5	Explore professional email formats used by businesses and list five examples of business email IDs.	2
6	Search for businesses on Google Maps and compare the details provided in their profiles.	2
7	Identify five businesses in your locality that have a Google Business Profile and list the services they offer.	2
8	Preparations for lab examinations	2

Module III		
9	Study the major online selling platforms in India and write a short note on their features and services.	2
10	Identify different payment options available on online shopping platforms and list their advantages.	2
11	Study the different types of e-commerce such as B2B, B2C, C2C, and C2B, and write a short note with examples.	2
12	Create a sample product listing for a local product, including title, description, price, and images. And submit report	2
Module IV		
13	Prepare a table containing a list of AI tools available and their uses.	2
14	Prepare promotional activities for a product using various AI tools.	2
15	Preparations for lab examinations	2
Total Self-Learning hours		30

Learning Resources

TEXT BOOK

Major Equipment/Instruments/Components required for a batch of 30 students

Sl. No.	Particulars	Specifications	Quantity
1	Desktop system	Intel Core i5/AMD Ryzen 5, 16GB RAM (8GB minimum), and a 512GB SSD, running Windows with a 24-inch Full HD monitor	30
2	Internet Access	64 Mbps (Minimum)	30
3	Printer (colour)	Epson Ecotank L3260 A4 Wi-Fi All-in-One Ink Tank Colour Printer, Black/any other	1

Major Software required for a batch of 30 students

Sl. No.	Particulars	Specifications	Quantity
1	Office packages including graphic packages	Latest	30
2	Canva , notice making and poster making websites	Latest	30

Assessment Methodology - Lab

Mode	Attendance	CE	CA1	CA2	OEE	ESE
		Continuous evaluation	Practical test (first half of experiments)	Practical test (second half of experiments)	Open-ended experiment	Practical
Duration			3 hours	3 hours		3 hours
Exam mark		50	40	40	50	40
Converted to		30	15	15	10	

Marks	5	30	15	10	40
Total marks	60				40
Tentative schedule	End of semester	Every lab slot	7th week	14th week	15th week

Scheme of Evaluation - Practical (Continuous Internal Evaluation)

Sl. No.	Criteria	Description	Marks
1	Preparation & Punctuality	Attendance, timely submission of record, pre-lab preparation, understanding of experiment objectives and theory.	10
2	Experimental Setup & Procedure	Ability to identify components/equipment, correct circuit connections/setup, systematic and safe execution of the procedure.	10
3	Observation & Data Recording	Accuracy and neatness of readings, correct use of units, tabulation, and systematic recording of results.	5
4	Analysis & Result Interpretation	Proper calculations, graphical representation, result verification, discussion, and logical conclusion.	10
5	Viva Voce / Concept Understanding	Clarity of theoretical concepts, explanation of procedure, ability to answer questions related to the experiment.	10
6	Workmanship, Discipline & Teamwork	Laboratory discipline, care of instruments, teamwork, attitude, and safety practices.	5
Total			50

Scheme of Evaluation - Practical Test & End Semester Evaluation

Category	Things to evaluate	Marks
Write-up / Procedure (before experiment)	Aim, circuit diagram/flowchart, stepwise procedure.	10
Experiment Setup & Execution	Correct circuit connections / coding / setup. Handling of instruments/software. Accuracy of execution.	10
Observation & Result / Output	Proper tabulation of readings. Calculations/graphs/program output. Correctness of result / expected outcome.	8
Viva Voce	Conceptual understanding of experiment. Related theoretical knowledge.	8
Record	Completion & neatness of practical record. Proper certification by faculty.	4
Total		40

Scheme of Evaluation - Open-ended experiment

Category	Things to evaluate	Marks
Originality and Relevance of the Idea	Assesses how creative, innovative, and relevant the chosen experiment is to the course objectives.	10
Clarity of Objectives and Experimental Plan	Evaluates how clearly the student defines the aim, scope, and systematic plan of the experiment.	10
Correctness of Execution and Data Recording	Checks the accuracy, safety, and neatness in performing the experiment and recording observations.	10
Analysis, Interpretation, and Presentation of Results	Measures the student's ability to analyze data, interpret outcomes, and present results logically.	10
Teamwork and Innovation Demonstrated	Judges the level of collaboration, initiative, and creativity shown during the experiment.	10
Total		50
