

COURSE DESCRIPTION			
Program	Interior Design		
Course Title	Interior Design & Drafting I		
Course Code	2539	Semester	II
Type of Course	Studio	Contact Hours	15
Teaching Scheme (L:T:P/D:R)	0:1:0:4	Credits	3
CIE Marks	60	ESE Marks	40

Introduction

This course introduces students to the systematic process of interior design through documentation, spatial analysis, and design development. It builds foundational skills in measured drawing, functional planning, and application of standards for user centric interior design.

Course Objectives

1	To develop the ability to document, analyse, and interpret interior spaces with respect to function, scale, materials, and user requirements.
2	To enable students to design and represent interior spaces through systematic planning, drafting, detailing, and presentation drawings.

Course Pre-requisite

Topic	Course code	Course Title	Semester
Orthographic projection	1181	Architectural graphics	I
Principles of Design	1182	Fundamentals of Architecture	I

Course Outcome

CO	Course Outcome	Blooms Taxonomy Level
CO1	Identify and document interior spaces through measured drawings and spatial analysis of materials, finishes, and functional components.	Understand
CO2	Analyse and organise user requirements, spatial data, and applicable standards to formulate functional planning criteria.	Apply
CO3	Apply interior design principles to develop user centric interior layouts and drawings.	Apply
CO4	Produce and present interior design proposals using appropriate drafting, rendering, and presentation techniques.	Apply

0	1	4	0	1.5	75	3	0	0	0	60	40	100	100

L: Lecture (One unit is of one-hour duration with one credit), T: Tutorial (One unit is of one-hour duration with one credit), P: Practical (One unit is of one-hour duration with 0.5 credit), S: Project (One unit is of one-hour duration with 0.5 credit) SS: Self-Learning, CIE: Continuous Internal Evaluation, ESE: End Semester Examination

Syllabus - Major Topics

Module	Title	Major Topics	Instructional Hours	
			T	D
Module I	Spatial analysis	1. Techniques of measuring and recording details of a space 2. Prepare a measured drawing of an intended space. 3. Annotating, labelling and dimensioning for Interior design.	3	15
Module II	Data collection and Analysis	1. Introduction of project and user character. 2. Data collection from standards like Neuferts, Time savers standards etc regarding the functional components & anthropometric requirements. 3. Conduct case studies to understand various aspects of design and construction. 4. Develop a Design brief for the intended project.	3	18
Module III	Design a Student's room interior	1. Concept and Zoning for Interior design 2. Develop a theme for the Interior design and prepare a sketch scheme. 3. Develop the design into drawings such as plans, elevations, details etc.	3	15
Module IV	Design presentation	1. Presentation techniques, its objectives and importance. 2. Develop presentation drawings of the designed room interior.- colour-rendered plans, sections and details. 3. Preparation of scaled models of the design	3	15

Detailed Syllabus

Subtopic	Student Learning Outcome	Mode of delivery (T/S)	Mapped CO	Taxonomy Level	Instructional Hours
Module I					
Introduction to spatial analysis	Discuss the importance of spatial analysis and the details to be recorded in the process.	T	CO1	Understand	3
Measured drawing of a space.	Prepare a measured drawing of an intended space as orthographic projections.	S	CO1	Apply	9
Annotating, labelling and dimensioning	Assign measured drawing with detailed annotation of materials, dimensions and labelling of elements.	S	CO1	Understand	6
Module II					
Introduction of project and user character.	Discuss the project and user character.	T	CO2	Remember	1
User definition	Determine user character and requirements for the project.	S	CO2	Remember	2
Data collection	Collect and classify secondary data with regard to the project requirements.	S	CO2	Remember	3
Case studies	Prepare case study analysis to understand various aspects of design and construction.	S	CO2	Remember	9
Design Brief	Determine the spatial requirements, standards and user requirements and correlate them to prepare a project's design brief.	S	CO2	Remember	6
Module III					
Introduction to Concept and Zoning	Articulate a concept based on chosen variables like user, functions etc.	T	CO3	Understand	3
Concept development	Prepare Concept and Zoning for Interior design	S	CO3	Apply	3
Schematic design	Assign a theme for the Interior design and prepare a sketch scheme.	S	CO3	Apply	6
Detailed design	Translate the design into drawings and prepare plans, elevations, details etc.	S	CO3	Apply	6
Module IV					
Introduction to project presentation	Discuss presentation techniques, its objectives and importance.	T	CO4	Understand	3
Presentation drawings	Prepare presentation drawings of the designed room interior.	S	CO4	Apply	6

Physical model making	Prepare a scaled physical model for design presentation.	S	CO4	Apply	9
-----------------------	--	---	-----	-------	---

Suggested Student Activities for Self-Learning

Week	Self-Learning description	Hours
Module I		
1	Measure any chair available at the student's residence.	1
2	Draw orthographic drawings of the chair - plans	1.5
3	Draw orthographic drawings of the chair - elevations	1
4	Draw orthographic drawings of the chair - sections	1.5
Module II		
5	Refer web sources on cottage interiors.	1
6	Identify 3 distinct themes from the web sourced materials.	1.5
7	Make annotated sketches of interesting interiors.	1
8	Create a wish list through sketches for the Interior design for your own room.	1.5
Module III		
9	Visit a cottage/hotel room to study the interior design.	1
10	Sketch the room layout with furniture and basic dimensions.	1
11	Note the materials used for finishes and fittings.	1
12	Sketch the room section with dimensions.	1
Module IV		
13	Create 3 sample presentation techniques to present the design.	1
14	Prepare a 1 point perspective of the design project.	3
15	Prepare a 3d physical model of the design project.	3
Total Self-Learning hours		

Learning Resources

TEXT BOOK			
Sl. No.	Title	Author	Publication
1	Neuferts Architects Data	Neufert. E	Wiley
2	Architecture: Form, Space, and Order	Ching, F.	Wiley
3	Architectural Graphics	Ching, F.	Wiley

REFERENCE			
Sl. No.	Title	Author	Publication
1	Rendering with pen and ink	Robert W Gill	Thames and Hudson
2	Analysing architecture	Unwin.S	Routledge

Scheme of Evaluation - External assessment

Sl. No.	Category	Description	Marks	Time
1	Drawing exam	Drafting skills, technical knowledge, and quality of drawing will be evaluated through a drawing exam.	20	3 hrs
2	Design Jury<>(Portfolio)	Design quality, design development, functional planning, rendering, and presentation skills will be evaluated through a design jury consisting of an expert panel.	20	

External exam question paper format - Drawing (40 marks)

Module	Topic	Part A	Blooms Taxonomy	Marks	Part B	Blooms Taxonomy	Marks	Total
2	Single line plan - Bus shelter/watchman cabin design	1	A	5	-	-	-	5
3&4	Cafeteria/weekend cottage design	-	-	-	1	A	15	15
		1			1			20

Scheme of Evaluation (External Exam) - Drawing (60 marks)

Sl. No.	Major topics	Criteria	Description	Marks
Part A	Prepare detailed single line plan of Bus shelter/Watchmans cabin	Design	Quality of design and correctness of functional areas	3
		Single line plan with furniture layout	Drafting correctness and quality, diamensioning, annotation, detailing	2
Part B	Prepare detailed drawings of criteria or weekend cottage	Design	Quality of design and correctness of functional areas	10
		Drafting and detailing	Drafting correctness and quality, diamensioning, annotation, detailing	5
Total				20

Scheme of Evaluation (External Exam) - Design Jury (20 marks)

Major topics	Criteria	Description	Marks
All projects of the semester	Design	Quality of design, concept/design development, and correctness of functional areas and correctness of functional areas	8
	Presentation	Quality of sheets and portfolio	6
	Drafting and detailing	Drafting correctness and quality, dimensioning, annotations, detailing	6
Total			20
