DIPLOMA EXAMINATION IN PRINTING TECHNOLOGY

PREPRESS BASICS I

Time: 3Hrs

Maximum Marks: 100

PART-A

(Answer all questions in one or two sentences. Each question carries 2 marks)

- I
1. Define digital photography.
 2. Name the different forms of inputting data.
 3. Define screening technology.
 4. Write the meaning of moiré effect.
 5. Name the designs of output devices used in reproduction technology.
- (2x5=10)

PART-B

(Answer any five full questions)

- II
1. Narrate the methods of transferring data.
 2. Explain the conventional method of text output into film.
 3. Give the function of a reproduction scanner in general.
 4. Explain the need of screening in reproduction technology.
 5. Give the details of Line screening.
 6. Write the method of selecting screen according to reproduction.
 7. Give an explanation on different dot shapes.
- (6x5=30)

PART-C

(Answer any one full question from each Module. Each question carries 15 marks.)

MODULE-I

- III
1. Explain the requirements for color separation. (8 marks)
 2. Write in detail the methods of image capturing. (7 marks)

OR

- IV
1. Describe line art masters. (7 marks)
 2. The master copies for reproduction are classified as reflection type and transmission type. Explain them. (8 marks)

MODULE-II

- V 1. Sketch the printing process from making original up to post press neatly. (6 marks)
 2. Define manuscript and describe the steps involved in text input. (9 marks)

OR

- VI 1. Describe the advantages of digital image processing. (7 marks)
 2. Narrate the primary quantities of light technology. (8 marks)

MODULE-III

- VII 1. Distinguish between laser dot and screen dot. (7 marks)
 2. Explain screen frequency of halftones. (8 marks)

OR

- VIII 1. Give the details of the various screening systems. (15 marks)

MODULE-IV

- IX 1. Describe in detail the roll of screen angles in halftone reproduction (15marks)

OR

- X 1. Explain basic methods of post Script screening. (15 marks)

DIPLOMA EXAMINATION IN PRINTING TECHNOLOGY

PRINTING MACHINES

Time: 3Hrs

Maximum Marks: 100

PART-A

(Answer all questions in one or two sentences. Each question carries 2 marks)

- I
1. Name the different models of sheet fed machines.
 2. Name the two types of feeders used in the sheet fed machines.
 3. What is meant by partial make-ready?
 4. Define progressive proof.
 5. Define UV coating.

(2x5=10)

PART-B

(Answer any five full questions)

- II
1. Write different methods of plate clamping..
 2. Name and explain the parts of the inking unit.
 3. Registration is a must in offset printing. Explain the roll of lateral and circumferential movement of cylinders.
 4. Write the steps for preparing a make-ready book.
 5. Explain the effects changing colors while doing multi color work on a single color machine.
 6. Give details of wet on wet printing.
 7. List the objectives of inline coating.

(6x5=30)

PART-C

(Answer any one full question from each Module. Each question carries 15 marks.)

MODULE-I

- III
1. Name different types of sheet fed offset machine, their models, and sizes. (8 marks)
 2. Write mechanical and operational features. (7 marks)

OR

- IV
1. Give details of suction, friction, back separation and front separation. (7 marks)
 2. Explain delivery board arrangement- short and extended. (8 marks)

MODULE-II

- V
1. list the points to be considered for cleaning the dampening system. (6 marks)
 2. Define lubrication and write various types of lubrication. (9 marks)

OR

- VI 1. What are the things to be considered while setting the feeder and delivery board. (7 marks)
2. Explain the method of preparing the dampening solution. (8 marks)

MODULE-III

- VII 1. Describe the importance of taking a passing sheet. (7 marks)
2. Explain the process and sequence of mounting the plate. (8 marks)

OR

- VIII 1. Describe the process of multicolor printing on single color machine. (15 marks)

MODULE-IV

- IX 1. Describe the possibilities and potentials for printers with inline coating (15marks)
.

OR

- X 1. Explain drying process of print varnish. (15 marks)

DIPLOMA EXAMINATION IN PRINTING TECHNOLOGY

ADVERTISING, DESIGN & JOB PLANNING

Time: 3Hrs

Maximum Marks: 100

PART-A

(Answer all questions in one or two sentences. Each question carries 2 marks)

- I
1. The effect of line and shape in advertising.
 2. Define Advertising.
 3. Write the importance of advertising.
 4. Write the common elements of newspaper and magazine designing.
 5. Name some common soft wares used for advertising.

(2x5=10)

PART-B

(Answer any five full questions)

- II
1. Explain the principles of design.
 2. Describe the preparation of layouts- miniature, rough and finished layout.
 3. Explain how selection of headlines is done.
 4. Differentiate book design and magazine design.
 5. Write the points to be considered while designing a package.
 6. Describe how designing is done using computer.
 7. List the points to be considered while designing monograms and symbols.

(6x5=30)

PART-C

(Answer any one full question from each Module. Each question carries 15 marks.)

MODULE-I

- III
1. With a neat sketch explain Guttenberg diagram of eye direction. (8 marks)
 2. Write the equipments used for layout preparation equipments. (7 marks)

OR

- IV
1. Give details of suction, friction, back separation and front separation. (7 marks)
 2. Explain delivery board arrangement- short and extended. (8 marks)

MODULE-II

- V 1. Define copy writing and write its importance. (6 marks)
 2. Define Color and its importance in design. (9 marks)

OR

- VI 1. What are the things to be considered while doing color mixing and color matching. (7marks)
 2. Explain the stages involved in preparing a dummy and its usage of a dummy. (8 marks)

MODULE-III

- VII 1. Describe the designing of Cartons, carry bags and polythene containers. (7 marks)
 2. Explain the design features of Specialty printing. (8 marks)

OR

- VIII 1. Describe the design of stationary materials. (15 marks)

MODULE-IV

- IX Describe the possibilities and potentials of Online designing (15marks)

OR

- X Explain onscreen designing of newspapers. (8marks)
XI Describe the designing of trademarks and brochures (7marks)

DIPLOMA EXAMINATION IN PRINTING TECHNOLOGY

SURFACE PREPARATION TECHNIQUES

Time: 3Hrs.

Maximum Marks: 100

PART-A

(Answer all questions in one or two sentences. Each question carries 2 marks)

- I
1. The plate making department is divided according to work. Name them.
 2. Differentiate half sheet work and sheet work..
 3. Name the different methods of cylinder making for gravure printing.
 4. Write the purpose of proofing.
 5. Name some common soft wares used for page lay outing.

(2x5=10)

PART-B

(Answer any five full questions)

- II
1. List the factors to be considered while setting the department.
 2. Explain the terms:
 1. Work and turn
 2. Work and tumble
 3. Regular Imposition
 4. Irregular imposition
 3. Explain Materials, tools and equipments for film assembly.
 4. Differentiate positive working plates and Negative working plates.
 5. Write the points to be considered while Stencil preparation – Hand cut and photo stencils.
 6. Describe digital proofing – soft proofing and digital hard copy proofs.
 7. Explain the terms dot gain, dot loss.

(6x5=30)

PART-C

(Answer any one full question from each Module. Each question carries 15 marks.)

MODULE-I

- III
1. Explain layout of a good surface preparation department giving consideration to dry And wet area. (8 marks)
 2. Write the environmental consideration to be taken while setting the surface preparation department. (7 marks)

OR

- IV 1. Explain the setting of flooring, ceiling and walls of the surface preparation department. (7 marks)
 2. Explain the method of waste water disposal. (8 marks)

MODULE-II

- V 1. Describe various film assembly techniques- negative assembly & positive assembly. (7 marks)
 2. Explain the chemistry of surface preparation. (8 marks)

OR

- VI 1. Draw a neat sketch of an imposition scheme of sheet work up to 32 pages. (15marks)

MODULE-III

- VII 1. Describe Pre sensitized plates - positive working plates & Negative working plates. (7 marks)
 2. Explain gravure cylinder image preparation by copper plating and polishing. (8 marks)

OR

- VIII 1. Describe flexo plate preparation – Rubber plates and photo polymer plates. (15 marks)

MODULE-IV

- IX Describe GCA/GATF proof comparator, GCA/GATF digital proof comparator. (15marks)

OR

- X Explain color evaluation and light source in human perception. (8marks)
- XI Describe digital proofing – soft proofing and digital hard copy proofs (7marks)
