Kerala has achieved 100% enrolment of school going children of the age of six to fourteen years. All the same we have problems regarding drop outs and lack of educational facilities for the most backward communities like scheduled Tribes. In the field of minority girl's education also we have a vast ground to cover. We are also focusing our attention on providing necessary and congenial infrastructure quality improvement and teachers training. We have chalked out a host of programmes for quality improvement and teachers training. Through the parent teacher Association we are trying to get the increased involvement of mothers in a big way. Our initial experience in this direction has paid rich dividends and with active participation of the

District Councils, Panchayats and voluntary agencies working in this field, we are expanding this programme throughout the State. As part of the quality improvement programme, we have also revised our syllabus and new text books have been prepared for this.

We fully realize the fact that any improvement programme in the educational field will not be successful without the active participation and co-operation of our teachers. We fully realize the importance given to the teacher in the new education policy. Within our limited resource we have revised the pay scales of our teachers recently. All our District Institutes of Education and Training are working in full swing and teachers are given in-service training through these institutions to

equip them to catch up with new trends in education.

Our Government fully endorse the view expressed by the Yaspal committee on reducing the work load of children. Workshops on the subject are being conducted in the districts and we will be coming out with a detailed action plan very shortly. Our Government fully accept the suggestions and recommendations made by the CAGE committee on Physical Education and Sports.

Due to financial constraints we are not in a position to appoint the required number of physical education teachers in our schools. If education is basic to the sustenance of democracy, progress of society, enrichment of culture and elevation of mind, it cannot be left as a matter to be dealt with by Government alone.

Maximum marks: 50
