(5x6=30)

(PART-C)

(Answer one full question from each unit)

Unit-I

- III (a) Explain how transition curves are useful in roads and where they have to be provided. (7)
(b) Draw and explain the road structure showing component parts. (8)

OR

- IV (a) Explain different types of gradient. (7)
(b) Under what circumstances sub surface drainage is provided? and what are the different methods of providing surface drainage? (8)

Unit –II

- V (a) Discuss the steps for preparation of bituminous road. (7)
(b) Explain the method construction of pre mixed bituminous road. (8)

OR

- VI (a) Explain the different road junctions with sketches. (8)
(b) What are the advantages and disadvantages of gravel road? (7)

Unit-III

- VII (a) What are the rail fastenings? Discuss the different types of spikes that are used in rail fastenings. (7)
(b) Discuss the functions of ballast. (8)

OR

- VIII (a) Explain the functions of good sleeper. (7)
(b) Explain the modern signalling methods. (8)

Unit-IV

- IX (a) Explain the factors for the selection of an ideal site for a bridge (8)
- (b) Explain the classification of harbour (7)

OR

- X (a) Define the term runway, apron, taxiway and approach area. (8)
- (b) Draw the cross section of a tunnel for a single lane broad gauge track, marking all parts . (7)
