SIXTH SEMESTER EXAMINATION IN ENGINEERING/
TECHNOLOGY- MARCH, 2013
MODEL QUESTION PAPER

AUTOMOBILE ENGINEERING

Time: 3 Hours

(Maximum marks: 100)

PART-A

I. Answer the following questions in one or two sentences. Each question carries equal marks.

1. List any four important toxic substance liberated from IC engine
2. State the function of universal joint
3. Define Caster
4. List the advantage of tubeless tyres
5. Name the types of tyres

(5x2=10)

PART- B

II. Answer any five of the following questions. Each questions carries 6 marks.

1. Discuss the various injection nozzles
2. Discuss the function of the transmission system
3. Explain briefly leaf spring suspension
4. Discuss the types of wheels
5. Discuss single point fuel injection and multipoint fuel injection
6. Discuss with simple sketch camber and caster
7. Explain “over drive

(5x6=30)

PART-C

(Answer one full question from each unit. Each question carries 15 marks)

UNIT -I

- III. (a) Draw the lay out of Diesel engine fuel system and briefly explain the function of each component 7
(b) Explain the working of a AC Mechanical pump with a neat sketch 8

OR

- IV. (a) . Discuss the effects of noise on human beings 7
(b) Discuss the various source of noise in automobiles 8

UNIT-II

- V. (a) Draw a neat sketch of Epicyclic gear box 7
(b). Sketch and explain the working of a sliding mesh gear box 8

OR

- VI. (a) Explain the final drive system with suitable sketches 7
(b) Sketch and explain the parts of a propeller shaft 8

UNIT III

- VII. (a) State the function of a steering system 7
(b) Explain the steering system components 8

OR

- VIII. (a) Discuss power steering mechanism 7
(b) Discuss briefly the centre point steering 8

UNIT-IV

- IX. (a) Explain MPFI 7
(b) Explain the working of central locking system 8

OR

- X. (a) Explain the types of wheels, specify the application and advantages 7
(b) Discuss the wheel sizes; specify the advantages of smaller wheels 8
