

MODEL QUESTION PAPER

TED (10)4116

REVISION 2010

FIFTH SEMESTER DIPLOMA EXAMINATION IN WOOD AND PAPER TECHNOLOGY

WOOD PRODUCTS -II

(Maximum marks: 100)

Time: 3 Hours

PART A

I. Answer the following questions in one or two sentences. (2x5=10 marks).

1. State block board.
2. Define particle board
3. State the need of chipping of wood
4. State chip silo.
5. List any 4 mechanical properties of particle board

PART B

II. Answer any 5 questions (6x5=30)

1. Describe spot gluing and continuous gluing.
2. Describe any 2 additives used in particle board.
3. List the advantages of drying of chips
4. Describe working of spreading machine.
5. Compare the characteristics of PF resin and UF resin
6. Describe the testing method of bending strength of particle board
7. Describe particle board sizing.

PART C

Answer one full question from each module. (15x4=60)

MODULE .I

- III. 1. Describe the 3 core boards with diagrams. 9
2. List the functions of flush doors. 6

OR

- IV. 1. Describe the method of manufacture of particle board core flush door. 7
2. Describe alternative wetting and drying test and knife test for flush door. 8

MODULE II

- V. 1. Draw the schematic outline of PB manufacture. 8
2. Describe waste gas stream dryer. 7

OR

- VI. 1. Explain cutter spindle chipper 6
2. Describe exterior grade, interior grade and three layered particle boards 9

MODULE III

- VII. 1. Describe horizontal and vertical storage bins. 8
2. Describe mat laying 7

OR

- VIII. 1. Describe the working of spreading heads with diagrams 9
2. Describe gravimetric dosing 6

MODULE IV

- IX. 1. Explain vertical extrusion process 9
2. Describe the effect of curing time on physical properties of P B. 6

OR

- X. 1. Explain Lane wood extrusion process 9
2. Describe continuous belt particle board system. 6
