MODEL QUESTION PAPER

FOURTH SEMESTER DIPLOMA IN COMPUTER HARDWARE ENGINEERING

Microprocessors and Interfacing

(Maximum Marks :100)

PART –A

Answer all questions. Each question carries 2 marks

I.

1. List any two scratchpad registers
2. Write any two assembler directives
3. Define Procedure
4. List any two data transfer instructions
5. Define hyper threading

(5 x 2=10)

PART –B

Answer any five questions. Each question carries 6 marks

II.

1. Draw the pin out diagram of 8086
2. Describe the flag registers of 8086
3. Write any 3 string instructions with examples.
4. Briefly describe the interrupt response of 8086
5. Explain the control word of 8255
6. List the features of Pentium processor.
7. Explain multicore processing.

(5 x 6=30)

PART –C

Answer one full question from each unit. Each question carries 15 marks.

UNIT I

III.

- a) Draw the internal architecture of 8086 and explain. 8
- b) Describe different addressing modes 7

OR

IV.

- a) Explain the memory organization of 8086 processor 8
- b) Briefly discuss the history of microprocessor 7

UNIT II

V.

- a) Write a program to find whether the given number is even number or not. 8
- b) Briefly describe macros 7

OR

VI.

- a) Explain shift and rotate instructions with examples. 8
- b) Write a program to find the occurrence of a character in a string. 7

UNIT III

VII

- a) Explain the interfacing of 8255 9
- b) Discuss different modes of operations of 8255 6

OR

- VIII. a) Explain Programmable interrupt controller 9
- b) Explain keyboard and display interface 6

UNIT IV

IX.

- a) Describe the different operating modes of 80386 10
- b) Write short notes on snooping protocol 5

OR

X. Write short notes on

i) MMX

iii) Multicore processing

iii) Superscalar architecture

(3 x 5 = 15)
