FOURTH SEMESTER DIPLOMA EXAMINATION IN ENGINEERING/
TECHNOLOGY –

Project Management and Software Engineering

[Time: 3 hours]

(Maximum marks: 100)

PART – A

Marks

- I. Answer the following question in one or two sentences. Each question carries 2 marks
1. Define software engineering
 2. Discuss alpha testing
 3. Mention any four Life Cycle Models:-
 4. What is Configuration Management Plan?
 5. List the objective of unit testing.

(5x2=10)

PART – B

- II. Answer *any five* of the following. Each question carries 6 marks.

1. Discuss the emergence of software engineering
2. .Write down the characteristics of a good SRS.
3. Explain DFD and its symbols with the help of an example.
4. Discuss on Code Inspection.
5. Comment on Cohesion and Coupling guidelines.
6. Brief on Refactoring Technique to manage evolving code
7. Explain the role of Change Control Board in Configuration Management

(5x6=30)

PART – C

(Answer *one* full question from each unit. Each question carries 15 marks.)

Unit – I

III. Illustrate any three life cycle models with neat sketch (15)

OR

IV. a) Explain the principles behind Agile Software development (8)

b) Identify six different phases of a classical waterfall model (7)

Unit – II

V. Compare features of Functional Oriented and Object Oriented Software Design(15)

OR

VI. Write notes on (1) Data Flow Diagram

(2) Complexity matrices

(3) Software Requirement Specification (15)

Unit – III

VII. Explain (1) How test cases are designed. (10)

(2) Characteristics of a good software design (5)

OR

VIII. Explain in detail the various methods of White Box Testing (15)

Unit – IV

IX. a. Write notes on Configuration Management. (8)

b. Describe the concept behind CMMI. Write notes on capability levels of CMMI

(7)

OR

X. Describe Halstead's method to Estimate project time (15)
