

Model Question Paper
Sixth Semester Diploma Examination in Engineering/Technology
Advanced Biomedical Instrumentation

(Maximum Marks :100)

(Time :3 Hours)

PART –A

I Answer the questions in one or two sentences.Each question carries 2 marks

- 1.Give the properties of Gamma Ray.
- 2.State the need for ventilator
- 3.What is a spirometer
- 4..Give the various reasons for using oxygen concentrators
- 5.What are radiotracers.

(5x2 =10 marks)

PART –B

(Maximum Marks : 30)

II Answer any five of the following .Each questions carries 6 marks

- 1.Write short notes on nuclear imaging technique.
- 2..List out the various characteristics of operation table
- 3.Explain in detail the objective of bedside monitor
- 4.Explain the working of electron microscope with a neat sketch
- 5.Explain the features of centralised gas supply system
- 6.Explain the operation of deep freezer
- 7.Write in detail the components of gamma camera

(6x5=30 marks)

PART –C

(Maximum Marks : 60)

(Answer one full question from each unit.Each question carries 15 marks)

Unit –I

- III a.What is angioplasty ,how is it done 8
b. Mention the various application of gamma camera 7

OR

- IV a.Write short notes on endoscope 8
b.Explain the various procedure in angioplasty 7

Unit II

- V a.Explain the features of centralized gas supply systems 8
b.Explain the operation of deep freezer 7

OR

- VI a.Exp[lain with a neat sketch the working of a compressor 6
b.Explainwith neat sketh the working of air conditioning 9

Unit –III

- VIIa.Explain the various aspects of bedside monitors 6
b. Explain how cutting coagulating and bleeding is done in electro surgery 7

OR

- VIIIa. 2 Explain the need for Heart-Lung Machine 8
b. Explain the working of Oxygen concentrators 7

Unit –IV

I

- IX a.Explain the working of infusion pumps 6
b. Explain the principle behind the working of electron microscope with neat sketch 9

OR

- X a Explain bone densitometres and give its application. 8
b. Explain the working of anesthetic machiene with neat diagram 7
