

Fifth Semester Model Examination in Civil (Env: Engg) Engineering/ Technology

TED (R) 5110

Solid Waste Management

(Max Marks : 100)

Time : 3 Hrs

PART A

(Answer all questions. Each question carries 2 marks)

I

1. Define garbage
2. What is primary collection of solid waste
3. What is hauling
4. State any one of the objective of recycling
5. How leachate is formed

PART B

(Answer any 5 questions. Each question carries 6 marks)

II

1. State any 6 objectives of solid waste management
2. Write any six properties of waste produced from mineral industry
3. Brief on the handling method of solid waste from high rise buildings
4. What are the points to be viewed while analysing the solid waste collection system
5. Point out the management strategies on recovery of waste mineral
6. State any 3 merits and 3 demerits of composting
7. What is Bangalore method of composting

PART C

(Answer any one full question from each module. Each question carries 15 marks)

Module I

- III Make a table showing at least 6 sources of solid wastes and the types of solid wastes produced from the sources within a community (6 x 2½ = 15)

OR

- IV Explain the following characteristics of solid wastes briefly
a) Moisture content (b) Particle size (c) Chemical composition
d) Mechanical properties (e) Density (5 x 3 = 15)

Module II

- V Explain with two or three sentences all the five phases of Municipal solid waste collection . (5 x 3 = 15)

OR

- VI a) Differentiate between primary and secondary collection system of solid municipal waste 8
b) State the points to be remembered while setting up the collection routes. 7

(Contd....)

Module III

- VII Explain briefly the working principle of the main types of transfer stations 15
- OR
- VIII Briefly explain the different steps involved in the processing of solid waste 15

Module IV

- IX Explain the Windrow method of composting with a neat sketch 15
- OR
- X Write on
- a) Land fills b) Deep well injection (7 + 8)
