

**SIXTH SEMESTER DIPLOMA EXAMINATION IN
TEXTILE TECHNOLOGY
MAN MADE FIBERS**

PART- A

I. Answer the following questions in one or two sentences. Each question carries 2 marks.

1. Define Draw ratio
2. List the uses of polyester fibre
3. Define the objectives texturisation
4. State the use of orlon fibre
5. Define saponification.

PART- B

II. Answer any five of the following. Each question carries 6 marks

1. Explain the classification of fully synthetic fibers
2. State the importance of staple fibre
3. List the properties of and uses of Nylon 6
4. Write a short note on physical properties of polyester fibre.
5. Write a short note on PVA fiber.
6. List the general characteristics of blended material
7. List out the necessary changes required for processing man-made fiber in the existing spinning line.

PART- C

Answer one full question from each unit. Each question carries 15 marks

UNIT - 1

III. a. Explain the different methods of spinning man made filaments. 12

b. Define degree of polymerization 3

OR

IV. a. Sketch and explain the wet spinning method.	12
b. Write a short note on co polymerisation.	3

UNIT – II

V. a. Discuss the Physical and Chemical properties of polyester	10
b. List the properties and Uses of Nylon 66	5

OR

VI. a. Explain the Manufacturing process of Nylon6	10
b. Briefly explain the Production of ethylene glycol for polyester synthesis	5

UNIT III

VII. a. Explain the method of production of polypropylene	12
b. Write a short note on aramid fibres.	3

OR

VIII. a. Discuss Manufacturing process of acrylic and Modacrylic fiber	12
b. Write a Short note on poly urethane fibre	3

UNIT – IV

IX. a. Describe the principle and working of a knit de knit texturising machine	10
b. Briefly explain knife edge crimping process	5

OR

X. a. Explain the stuffer box crimping process with neat sketch	10
b. State the advantages and uses of Texturised yarn.	5
