THIRD SEMESTER DIPLOMA EXAMINATION IN TEXTILE TECHNOLOGY

FABRIC FORMATION I

(Maximum marks 100)

Time: 3 Hours

Marks

Part A

I. Answer all the questions in one or two sentences. Each question carries two marks

1. State the object of winding
2. Give the function of lubricant in sizing .
3. Mention the object of heald?
4. Find the count of 25hanks cotton yarn weighing 1.5 Lbs.
5. Define new French cotton (5×2=10)

Part B

II. (Answer any five questions. Each carries six marks)

1. Compare splicing and knotting.
2. Discuss the main features of warp winding machines
3. Write a size recipe for cotton yarn.
4. State the objectives of denting and drawing in
5. Write the types of closed sheds.
6. Give the timing and setting of cone over picking mechanism
7. Calculate the resultant count of a yarn composed of 30s and 36s. (5×6=30)

Part C

(Answer one full question from each module. Each question carries 15 marks.)

MODULE 1

- I. a. State the object of layer locking mechanism (3)
- b. Explain the working of a warp winding machine with a neat sketch (12)

OR

- II. a. State the objects of weft winding (3)
b. Explain the working pirn winding machine with a neat sketch (12)

MODULE II

- VII a. list the various controls in a sizing machine . (3)
b. Explain the working of Rutiwarping machine with neat sketch. (12)

OR

- VIII a. define count of heald . (3)
b. List the various sizing ingredients and mention their functions . (12)

MODULE III

- III a. State the classification of loom motions(3)
b. Explain the working of plain tappet shedding mechanism with a neat sketch. (12)

OR

- IV. a. Name the shedding mechanisms. (3)
b. Calculate the eccentricity of the sley with suitable example (12)

MODULE IV

- IX. a. Define count of yarn (3)
1. b. Calculate the number of spindle required to produce 300 Kg of 20s yarn in 7.5 hrs. Assume that the production/spindle is 640yds/min. Efficiency of the machine is 70%. (12)

OR

- X. a. Find the count of 34 grams of 7.2 KM yarn in denier (3)
b. Calculate the production of a cone-winding machine with following particulars.

Drum speed	-	1000 rpm	drum diameter	-	3 inches
No of drums	-	50	shift hours	-	8 hours
Efficiency	-	75%	count of yarn	-	40s (12)
