

TED (3091)

Revision (2015)

THIRD SEMESTER DIPLOMA EXAMINATIONS IN POLYMER TECHNOLOGY

NATURAL RUBBER PRODUCTION

Model Question Paper

Maximum Marks 100

Time 3 hours

I (PART –A)

(Answer all questions in one or two sentences, each question carries 2 marks each)

1. Define tapping task
2. What is the role of microorganisms in NR latex destabilization
3. What are the two important concentration methods of NR latex
4. Name 4 grades of ISNR and RSS
5. What is reclaimed rubber (2x5=10)

II (PART –B)

(Answer any 5 full questions Each question carries 6 marks each)

1. What is ladder, slaughter and puncture tapping (6)
2. Compare creaming and centrifuging process. (6)
3. Explain preservation of latex and different preservatives with its advantages (6)
4. Explain the production process of manufacture of air Creep rubber (6)
5. Describe 3 propagation methods and 3 different clones of rubber plants (6)
6. Explain Digester process for the production of reclaimed rubber.. (6)
7. Describe production process of OENR (6)

(PART –C)

(Answer any one full question from each unit each question carries 15 marks)

UNIT- I

III (a) Compare the nature, action and method of application of Calcium carbide and ethipone-
two yield stimulants (8)

(b) Why rain guarding is important and explain its method of applications (7)

OR

IV (a) List 4 Major sources of NR and extraction of rubber from it? (8)

(b) Discuss major NR producing and consuming countries and its Quantity last years (7)

UNIT- II

V (a) Explain the principle, process and applications of Creaming (8)

(b) Name and state the principles of 4 different types of latex concentration methods (7)

OR

VI (a) State the composition of NR latex and its preservation methods . (8)

(b) Draw a diagram of Centrifuging machine and mark its major parts. (7)

UNIT- III

VII (a) Prepare a RSS making plant lay out and a flow chart of production process. (8)

(b) Explain production process of PLC. (7)

OR

VIII (a) Distinguish between Ribbed smoked sheets and Air dried sheets. (7)

(b) Describe the machinery and process of manufacture of creep rubber . (8)

UNIT-IV

IX (a) Explain production and properties ofDPNR . (8)

(b) Describe the Digester process for the production of reclaimed rubber (7)

OR

X (a) Explain the preparation and advantages of Tyre rubber (8)

(b) Explain the preparation and advantages of superior processing rubber (7)
