Model Question Paper

Sixth Semester Diploma Examination In Printing Technology

Advanced Printing Machines -II

[Maximum Marks : 100]

[Time : 3 Hour]

PART – A

[Maximum Marks : 10]

I. Answer the following question in one or two sentences:

Marks

1. Define direct imaging.
2. Write the purpose of a dot gain scale.
3. Mention the utility of stroboscope.
4. What is the purpose of lubrication?
5. Write the functions of relay.

[5x2=10]

PART – B

[Maximum Marks : 30]

II. Answer any five full questions:

1. Give details of any two implications of direct digital presses.
2. Evaluate the aspects of quality control.
3. Explain 'splicing' in web offset.
4. Write the role of star target in quality control.
5. Mention the objectives of maintenance.
6. Explain different methods of lubrication.
7. Classify and describe the types of filters.

[5x6=30]

PART – C

[Maximum Marks : 60]

[Answer one full question from each unit]

UNIT - I

III. a) Explain direct imaging process.

[8]

b) Explain the process of gravure plate production through ablation process.

[7]

OR

- IV. a) Write the methods of generating re-imageable offset printing plates. [10]
b) Describe the press configuration of digital toner based printing. [5]

UNIT - II

- V. a) Describe the GATF standard offset colour control bar. [8]
b) Explain the factors to be considered for quality control in plate making [7]

OR

- VI. a) Write the general requirements needed for quality assessment of printed products. [10]
b) State the role of pH in printing. [5]

UNIT – III

- VII. a) List the advantages of vacuum pressure pump. [10]
b) Explain the advantages of central lubrication system. [5]

OR

- VIII. a) Explain two basic methods of color measurement. [8]
b) How the maintenance of pumps are done. [7]

UNIT – IV

- IX. a) Describe the function of commutator with the help of a diagram. [8]
b) What are things to be considered while doing machine installation? [7]

OR

- X. a) List and explain the different types of maintenance. [15]
