

Model Question Paper
SIXTH SEMESTER DIPLOMA EXAMINATION IN
WOOD AND PAPER TECHNOLOGY

Wood Products III

(Maximum Marks: 100)

Time : 3 Hrs

PART – A

I. Answer the following questions in one or two sentences. Each question carries 2 marks.

1. State the need of chipping.
2. Define ISO definition of Fiber Board
3. List the methods of mat formation.
4. State the need of wetting of chips.
5. State classifications of Fiber Board.

[5x2=10]

PART – B

II. Answer any five of the following. Each questions carries 6 marks.

1. Explain history and development of Fiber Board.
2. Describe different types of chippers used in Fiber Board manufacturing.
3. Explain chemical pulping by rotary drum digester.
4. Explain mat formation by cylinder method.
5. Describe oil tempering, heat treatment and humidification.
6. Describe calendar particle board.
7. Describe ground wood pulping by pocket grinders.

PART – C

Answer one full question from each module. Each question carries 15 marks.

Module - I

III.a. Draw the schematic outline of Fiber Board manufacture using wet, semidry and dry process.

[8]

b. Describe the properties and uses of different types of Fiber Board.

[7]

OR

IV.a. Explain different types of hard boards and its properties.

[8]

b. Describe the non wood fibrous raw material and classification of fiber boards according to destiny.

[7]

[P.T.O]

Module –II

- V.a. Explain ground wood pulping by using magazine grinder with figure. [8]
b. Describe magnetic separation and screening of fibers. [7]

OR

- VI.a. Explain moisture content of chips before pulping and importance of moisture content during storage. [7]
b. Explain ground wood pulping using Pocket grinder with figure. [8]

Module –III

- VII.a. Draw the block diagram of insulation board manufacturing process. [7]
b. Describe sizing, drying, trimming & finishing of an insulation stock. [8]

OR

- VIII.a. Draw the block diagram of hard board manufacturing process. [7]
b. Explain mat formation, pressing, sizing of hard board. [8]

Module –IV

- IX.a. Explain Mande Bison system with neat diagram. [8]
b. Describe moisture content, density, surface quality, nail & screw holding ability. [7]

OR

- X.a. Explain bending strength, compressive strength, tensile strength [7]
b. Describe calendar particle board with diagram. [8]
