

MODEL QUESTION PAPER

FIFTH SEMESTER DIPLOMA EXAMINATION IN ENGINEERING/ TECHNOLOGY

SPECIALISED PRINTING APPLICATIONS

Maximum Marks: 100

Time: 3Hrs.

PART-A

I Answer all questions in one or two sentences. Each question carries 2 marks)

1. Mention the objectives of aqueous coating.
2. Identify any two disadvantages of UV coating.
3. Name the components of a lenticular printing.
4. Which are the two types of lamination.
5. Name any two fields of thermal application.

(5 x 2=10)

PART-B

(Maximum Marks:30)

II Answer any five of the following questions. Each question carries 6 marks.

1. Under certain circumstances aqueous coating is required. Give details.
2. Explain the usage of Pearlescent or nacreous pigments.
3. Write the possible causes and suggestive solutions for the following problems.
 - i) Crawling or rejecting
 - ii) Ink bleaches or changes color
 - iii) Low varnish gloss.
4. Explain the term release scratch-off varnish.
5. How lenticular printing helps the marketing and advertising.
6. Narrate the working principle of a thermal printer.
7. Evaluate the working of an ink jet printer.

(5 x 6=30)

PART- C

(Maximum Marks: 60)

Answer one full question from each module. Each module carries 15 marks.

Module-I

- III a) Aqueous coating has got many advantages over traditional coating. List and explain . (8marks)
b) Mention any three coating problems with their causes and remedies. (8marks)
- OR
- IV a) Name and explain different types of coating. (15marks)

Module-II

- V a) Define the term embellishment with its usage and purpose. (8marks)
b) Name and explain the advantages of UV coating. (7marks)
- OR
- VI a) Lamination protects the product in a no. of ways. Give your reasons. (7marks)
b) Every UV curing system must incorporate some sort of cooling system. Name and explain them. (8marks)

Module-III

- VII a) 3D graphics has got an important role in lenticular printing. Comment on the point. (7marks)
b) Give details of the technology used for 3D graphics. (8marks)
- OR
- VIII a) Explain the process of lenticular printing. (15marks)

Module-IV

- IX a) Materials used for thermal printing requires certain characteristics and properties. List them. (8marks)
b) Write the classification of thermal printers according to working principle. (7marks)
- OR
- X a) describe the working of a Dye Sublimation Printer. (7marks)
b) State the advantages of using thermal printers. (8marks)
