CATEGORY

Common Course

USE

Study + notes PDF

FORMAT

Big handbook

6001

Screen-filling handbook

Designed for desktop, mobile, classroom display and automatic PDF notes generation.

How to use this handbook

Read the overview first, then study each module with the diagram, formulas, practical tasks and model answers. For exam preparation, revise the question bank and answer key.

Course map	objectives + outcomes	Module lessons	4 detailed units
Formula bank	calculations	Practice bank	questions + tasks
Model paper	official style	Answer key	full points

Course objectives and syllabus map

Objectives

- ✓ Build entrepreneurial mindset and opportunity recognition
- ✓ Prepare simple business model, costing and project report
- ✓ Understand startup registration, support schemes, funding and pitching

മലയാളം: ഈ പാഠം പരീക്ഷയ്ക്ക് മാത്രം അല്ല. Textile industry-ൽ real work ചെയ്യുമ്പോൾ ഉപയോഗിക്കുന്ന calculation, quality check, documentation, reporting എന്നിവയും മനസ്സിലാക്കാൻ ആണ്.

Visual process map

Module	Main outcome	Industrial focus	Expected evidence
M1	Entrepreneurship fundamentals	Meaning of entrepreneur, entrepreneurship and enterprise; Traits: initiative, risk taking, creativity, persistence and ethics	Short notes, calculations, diagram, checklist, viva answers
M2	Opportunity identification and business model	Problem identification, customer need, market gap and value proposition; Business Model Canvas: partners, activities, resources, value, customers, channels, cost and revenue	Short notes, calculations, diagram, checklist, viva answers
M3	Startup support and legal basics	MSME/Udyam, Startup India, incubation centres, IEDC and government schemes; Forms of business: proprietorship, partnership, LLP and private limited	Short notes, calculations, diagram, checklist, viva answers
M4	Project report, funding and pitch	Cost estimation, working capital, break-even point and profit planning; Sources of finance: own fund, bank loan, angel, venture capital and grants	Short notes, calculations, diagram, checklist, viva answers

Module-wise textbook

Each module is written in clear engineering language. Do not mug up headings only; understand the process flow, defects, records and decision points.

Entrepreneurship fundamentals

Core explanation

- ✓ Meaning of entrepreneur, entrepreneurship and enterprise
- ✓ Traits: initiative, risk taking, creativity, persistence and ethics
- ✓ Difference between employment, self-employment and startup
- ✓ Role of entrepreneurship in Kerala and Indian economy

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

മലയാളം: Practical answer എഴുതുമ്പോൾ definition മാത്രം പോരാ. Process → parameter → defect → correction → record എന്ന flow കാണിക്കണം.

Exam writing method

- 1 Start with definition or purpose.
- 2 Draw block diagram/process flow wherever possible.
- 3 List parameters, machines/tools, defects and precautions.
- 4 End with application or quality importance.

Common mistakes

- Writing only theory without industrial example.
- Missing units in calculations.
- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Opportunity identification and business model

Core explanation

- ✓ Problem identification, customer need, market gap and value proposition
- ✓ Business Model Canvas: partners, activities, resources, value, customers, channels, cost and revenue
- ✓ Feasibility: technical, market, financial and social
- ✓ Prototype, minimum viable product and feedback loop

Industry notes

In a real textile unit, this module connects with production planning, material control, quality assurance, cost control and customer requirement. A student should be able to explain what is checked, why it is checked, how it is recorded and what action is taken when the result is not acceptable.

മലയാളം: Practical answer എഴുതുമ്പോൾ definition മാത്രം പോരാ. Process → parameter → defect → correction → record എന്ന flow കാണിക്കണം.

- Ignoring quality records and inspection points.

- Not connecting the topic to textile production or customer requirement.

Startup support and legal basics

Core explanation

- ✓ MSME/Udyam, Startup India, incubation centres, IEDC and government schemes
- ✓ Forms of business: proprietorship, partnership, LLP and private limited
- ✓ Basics of GST, PAN, bank account, invoice and bookkeeping
- ✓ Intellectual property: trademark, patent, copyright and design registration

--

Project report, funding and pitch

Core explanation

- ✓ Cost estimation, working capital, break-even point and profit planning
- ✓ Sources of finance: own fund, bank loan, angel, venture capital and grants
- ✓ Pitch deck: problem, solution, market, traction, team and ask
- ✓ Risk analysis, social responsibility and sustainable enterprise

Formula bank and quick calculations

Formula 1

$$\text{Profit} = \text{Revenue} - \text{Total Cost}$$

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Formula 2

$$\text{Break-even Quantity} = \text{Fixed Cost} / (\text{Selling Price per Unit} - \text{Variable Cost per Unit})$$

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Formula 3

$$\text{ROI \%} = \text{Net Profit} / \text{Investment} \times 100$$

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Formula 4

$$\text{Working Capital} = \text{Current Assets} - \text{Current Liabilities}$$

Use correct units, write given data first, substitute values and state the final conclusion clearly.

Practice tasks, viva and revision

Practical / assignment tasks

- ✓ Prepare one-page Business Model Canvas for a local service idea
- ✓ Calculate break-even for a small stitching or printing unit
- ✓ Prepare a 5-slide investor pitch and present it
- ✓ Compare two funding options and select the safer one

Important keywords

Entrepreneur

Startup

MVP

BMC

Break-even

Funding

Incubation

Pitch

Short questions

Q1. 1	Explain: Meaning of entrepreneur, entrepreneurship and enterprise	Answer with definition, process, application and one example.
Q1. 2	Explain: Traits: initiative, risk taking, creativity, persistence and ethics	Answer with definition, process, application and one example.
Q1. 3	Explain: Difference between employment, self-employment and startup	Answer with definition, process, application and one example.
Q2. 1	Explain: Problem identification, customer need, market gap and value proposition	Answer with definition, process, application and one example.
Q2. 2	Explain: Business Model Canvas: partners, activities, resources, value, customers, channels, cost and revenue	Answer with definition, process, application and one example.
Q2. 3	Explain: Feasibility: technical, market, financial and social	Answer with definition, process, application and one example.
Q3. 1	Explain: MSME/Udyam, Startup India, incubation centres, IEDC and government schemes	Answer with definition, process, application and one example.
Q3. 2	Explain: Forms of business: proprietorship, partnership, LLP and private limited	Answer with definition, process, application and one example.
Q3. 3	Explain: Basics of GST, PAN, bank account, invoice and bookkeeping	Answer with definition, process, application and one example.

Q4. 1	Explain: Cost estimation, working capital, break-even point and profit planning	Answer with definition, process, application and one example.
Q4. 2	Explain: Sources of finance: own fund, bank loan, angel, venture capital and grants	Answer with definition, process, application and one example.
Q4. 3	Explain: Pitch deck: problem, solution, market, traction, team and ask	Answer with definition, process, application and one example.

Case study

A textile unit receives customer complaint related to Entrepreneur. Prepare a corrective action report using observation, data collection, root cause, corrective action, preventive action and verification.

Expected answer structure: Problem statement → data/table → cause analysis → action plan → responsible person → completion date → verification evidence.

Model question paper

Use this as a sample paper. Questions are original and arranged in diploma-style sections.

PART A - Short Answer Questions (answer all)

1. Define Entrepreneurship and Startup.
2. List four important keywords: Entrepreneur, Startup, MVP, BMC.
3. State two industrial applications of this subject.
4. Mention two common defects/problems and one preventive action.
5. Write any one important formula or calculation used in this subject.

PART B - Paragraph Questions

6. Explain the workflow of Entrepreneurship fundamentals.
7. Compare two important concepts from Opportunity identification and business model.
8. Explain the practical importance of Startup support and legal basics in a textile unit.
9. Write the steps for documentation/reporting in this subject.

PART C - Essay / Application Questions

10. Prepare a complete process plan for Entrepreneurship and Startup in a textile industry situation.
11. Explain how quality, cost, safety and customer requirement are controlled in this subject.
12. Solve/interpret a simple industrial case using the formulas and checks given in this handbook.

Answer key and scoring points

Part A answer points

1. Give accurate definition and scope of Entrepreneurship and Startup.
2. Use keywords: Entrepreneur, Startup, MVP, BMC, Break-even, Funding, Incubation, Pitch.
3. Applications must be linked to textile industry, customer requirement and quality.
4. Defects/problems should include cause and prevention.
5. Formula answers must show unit and interpretation.

Part B/C - Module 1

Entrepreneurship fundamentals

- Meaning of entrepreneur, entrepreneurship and enterprise
- Traits: initiative, risk taking, creativity, persistence and ethics
- Difference between employment, self-employment and startup
- Role of entrepreneurship in Kerala and Indian economy

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 2

Opportunity identification and business model

- Problem identification, customer need, market gap and value proposition
- Business Model Canvas: partners, activities, resources, value, customers, channels, cost and revenue
- Feasibility: technical, market, financial and social
- Prototype, minimum viable product and feedback loop

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 3

Startup support and legal basics

- MSME/Udyam, Startup India, incubation centres, IEDC and government schemes
- Forms of business: proprietorship, partnership, LLP and private limited
- Basics of GST, PAN, bank account, invoice and bookkeeping
- Intellectual property: trademark, patent, copyright and design registration

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Part B/C - Module 4

Project report, funding and pitch

- Cost estimation, working capital, break-even point and profit planning
- Sources of finance: own fund, bank loan, angel, venture capital and grants
- Pitch deck: problem, solution, market, traction, team and ask
- Risk analysis, social responsibility and sustainable enterprise

Scoring: concept 2 marks, diagram/process 2 marks, application 2 marks, conclusion 1 mark.

Final quick revision

Before exam

- Revise all formulas and keywords.

- Practise one diagram/process flow from every module.
- Prepare two industrial examples for every long answer.

Before lab/viva

- Know instrument/machine purpose.
- Know safety precautions and standard record format.
- Explain result, defect and correction logically.
