

POLY PMNA

REVISION 2026

COURSE 1182

PRACTICUM

Fundamentals of Architecture

A complete design-and-visual-language handbook covering elements of design, colour theory, texture, principles of design, freehand sketching and the architectural features of celebrated Indian and international buildings.

Course code	1182
Semester	I
Type	Practicum
Scheme	3:1:2:5
Contact hours	90
Credits	5
Summary CIE	40
Summary ESE	100

Programmes: Architecture and Interior Design.

OFFICIAL SOURCE DECLARATION

Official Source Declaration

This handbook is an original educational expansion of the supplied SITTTT Kerala Diploma Curriculum Revision 2026 syllabus PDF for Course 1182. Content is derived from the official syllabus, expanded with bilingual explanations, practical records, diagram exercises, worked examples, examination preparation and self-learning activities. No model-paper text is reproduced. Where syllabus wording is quoted, it is attributed.

All learning outcomes, module titles, contact-hour allocations and assessment weights follow the official syllabus document.

LEARNING ROADMAP

Course map and module overview

This practicum handbook develops the fundamental visual and representational skills of architectural design. It begins with the primary elements of design, progresses through colour theory and texture, then the principles that organise those elements, and culminates in the study and sketching of famous Indian and international buildings.

Module I

Elements of Design

Theory 12 h Practical 8 h

Module II

Colour and Texture

Theory 12 h Practical 6 h

Module III

Principles of Design

Theory 12 h Practical 10 h

Module IV

Famous Buildings

Theory 18 h Practical 12 h

OFFICIAL OBJECTIVES

Course objectives and outcomes

The official objectives are reproduced verbatim from the SITTTT Kerala syllabus PDF.

Course objectives

1. To enable the students to identify the basic elements and principles of architecture design.

2. To introduce the fundamental techniques of visual design through drawing, painting and drafting.
3. To comprehend the basics of free hand sketching appropriate to visual and architectural representation.
4. To comprehend the concepts and architectural features of buildings designed by well known Indian and international architects.

Course outcomes

CO1

Apply fundamental architectural drawing skills and design principles

Represent elements of design concepts through clear, accurate, and well-composed drawings.

Bloom: Apply

CO2

Apply colour theory and texture concepts

Apply colour theory, colour schemes, colour psychology, and texture concepts to create effective visual compositions using appropriate materials and design principles.

Bloom: Apply

CO3

Apply basic design principles

Apply basic design principles — balance, proportion and scale, rhythm, hierarchy, contrast, harmony, and emphasis — by developing design compositions and outdoor sketches that effectively represent form, depth, lighting, and spatial quality.

Bloom: Apply

CO4

Apply design concepts of famous buildings

Apply the design concepts and architectural features of selected Indian and international buildings and represent their form, proportions, and spatial composition through freehand sketches.

Bloom: Apply

CORE CONTENT

Module-wise content

Each topic opens with the official learning outcome, an expanded bilingual explanation, key points, a drawing exercise, and a self-check. Practical entries follow in the Practical centre.

PRACTICUM

Practical identification and record centre

The official practical syllabus is expanded into safe observation records. These are not operating instructions for unsupervised work.

Faculty must isolate the equipment and demonstrate safe access. Students may identify, trace, sketch and record only within the authorised task.

Completion planner

0 activities marked complete.

SUPPORTING KNOWLEDGE

Design terminology and reference bank

The official detailed syllabus focuses on visual understanding and representation. These reference entries support the official outcomes without increasing examination depth.

DESIGN PRACTICE

Worked design examples and practice

DRAWING PRACTICE

Complete labelled diagram library

OFFICIAL 90-HOUR PLAN

Suggested student activities for self-learning

EXAMINATION PREPARATION

Expected questions with answers

Questions follow the official 1-mark, 3-mark and 7-mark structure. Answers are original learning support, not copied model-paper text.

OFFICIAL EVALUATION

Assessment pattern and practice model paper

LAST-MINUTE REVIEW

Quick revision and answer checklist

OFFICIAL LEARNING RESOURCES

Textbooks, references and equipment

Official textbooks

1. *Graphic Thinking for Architects and Designers* — John Wiley & Sons, New York, 2001.
2. *Design Fundamentals in Architecture* — V.S. Pramar, Somaiya Publications Pvt. Ltd., New Delhi.
3. *Principles of Two-Dimensional Design* — Francis D.K. Ching, Van Nostrand Reinhold Co., Canada.

Official references

1. *The Fundamentals of Architecture* — Lorraine Farrelly, AVA Publishing, 2011.

Official web resources:

1. BME Architecture Introduction — Construction PDF (Modules I & II).
2. ArchDaily (Module IV).

Major equipment for 30 students

1. Drawing boards — 30.
2. Drawing sheets — 30.
3. Drawing tables — 30.
4. Drawing chairs — 30.
5. Drawing instruments: T-scale, set square — 30.

Official software requirement: NIL.

Studio-ൽ drawing instruments ശരിയായി maintain ചെയ്യുക; sharing പാടില്ല.
