

Course 5083C

5 Credits: 4

Program Elective

Source-grounded

Robotics and Control

□ To understand concepts, parts of robots and types of robots.

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 5083C is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 5083C.pdf from the uploaded official SITTTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Instrumentation Engineering
Course code	5083C
Course title	Robotics and Control
Semester	5 Credits: 4
Course category	Program Elective
Periods per week	4 (L:3 T:1 P:0) Periods per semester: 60
Periods per semester	60

Item	Official information
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

13 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD

How to use this lesson

First pass

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- □ To understand concepts, parts of robots and types of robots.
- □ To familiarize with the various drive systems for robot, sensors and their applications in robotic automation.
- □ To discuss about the various applications of robots, justification and implementation
- □ To conceptualize automation and understand applications of robots in various

Course outcomes

CO	Official outcome	Study level
CO1	15 Understanding characteristics of robot. Explain the various robotic actuators on hydraulic,	See official syllabus
CO2	17 Applying pneumatic and electrical drives. Explain about various types of sensors and robot	See official syllabus
CO3	16 Understanding vision system.	See official syllabus
CO4	Explain the various applications of robots. 10 Understanding	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 2
CO2	CO2 3
CO3	CO3 3
CO4	CO4 2

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	advantages and disadvantages.	4	As specified
Module 2	electrical drives.	3	As specified
Module 3	system.	3	As specified
Module 4	Explain the various applications of robots.	3	As specified

MODULE 1

advantages and disadvantages.

This module is presented from the official syllabus scope for Robotics and Control. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: advantages and disadvantages.
- Official duration: As specified
- Official topic entries captured: 4

- The full source excerpt is preserved below for coverage checking.

2 Understanding laws of robotics.

2 Understanding laws of robotics. is an official topic in Module 1 of Robotics and Control. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 2 Understanding laws of robotics. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 2 understanding laws of robotics. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 2 Understanding laws of robotics. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-2 Understanding laws of robotics.

രൂപരേഖാപരമായ രീതിയിൽ definition/meaning രേഖപ്പെടുത്തുക. രൂപരേഖാ രീതിയിൽ രേഖപ്പെടുത്തുക, steps, application രേഖപ്പെടുത്തുക രേഖപ്പെടുത്തുക. Technical terms English-ൽ രേഖപ്പെടുത്തുക.

Describe the Robot anatomy

Describe the Robot anatomy is an official topic in Module 1 of Robotics and Control. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Describe the Robot anatomy using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, describe the robot anatomy should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Contents:		
Sensors:	Requirements of a sensor; Principles and Applications of the following types of	
sensors:	Position sensors (Encoders, Resolvers, Piezo Electric); Range sensors; Proximity	
sensing;	Force and torque sensing, Tactile sensors. Introduction to Machine Vision: Robot vision system (scanning and digitizing image data); Cameras (Acquisition of images); Vidicon camera (Working principle & construction); Applications of Robot vision system: Inspection, Identification, Navigation & serving.	

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 4

Explain the various applications of robots.

This module is presented from the official syllabus scope for Robotics and Control.
Use the topic cards for learning and the source transcript for exact coverage.

As specified

CO-linked

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Explain the various applications of robots.
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

4 Understanding system Explain the advanced automation

4 Understanding system Explain the advanced automation is an official topic in Module 4 of Robotics and Control. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 4 Understanding system Explain the advanced automation using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 4 understanding system explain the advanced automation should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 4 Understanding system Explain the advanced automation means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related

but different term.

Malayalam support: Module 4- 4 Understanding system Explain the advanced automation ഓട്ടോമേറ്റേഷൻ ഓട്ടോമേറ്റേഷൻ definition/meaning ഓട്ടോമേറ്റേഷൻ. ഓട്ടോമേറ്റേഷൻ ഓട്ടോമേറ്റേഷൻ, steps, application ഓട്ടോമേറ്റേഷൻ ഓട്ടോമേറ്റേഷൻ. Technical terms English- ഓട്ടോമേറ്റേഷൻ ഓട്ടോമേറ്റേഷൻ.

functions Explain the applications of robotics in

functions Explain the applications of robotics in is an official topic in Module 4 of Robotics and Control. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify functions Explain the applications of robotics in using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, functions explain the applications of robotics in should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What functions Explain the applications of robotics in means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4-റോബോട്ടിക്സ് functions Explain the applications of robotics in different fields. റോബോട്ടിക്സ് definition/meaning റോബോട്ടിക്സ് ഏത് രംഗങ്ങളിൽ ഉപയോഗിക്കുന്നു. റോബോട്ടിക്സ് ഏത് രംഗങ്ങളിൽ ഉപയോഗിക്കുന്നു, steps, application റോബോട്ടിക്സ് ഏത് രംഗങ്ങളിൽ ഉപയോഗിക്കുന്നു. Technical terms English-ൽ പറയുക. റോബോട്ടിക്സ് ഏത് രംഗങ്ങളിൽ ഉപയോഗിക്കുന്നു.

Official syllabus detail and terminology

The following excerpt preserves official syllabus terminology for this module.
Educational explanations below are separate elaboration.

Explain the various applications of robots.

Describe the elements of automated

M4.01

4

Understanding

system

Explain the advanced automation

3

Understanding

M4.02

functions

Explain the applications of robotics in

M4.03

3

Understanding

various industries.

Series Test - II

1

Contents:

Automation: Basic elements of automated system, advanced automation functions, levels

of automation. Industrial Applications: Application of robots in machining; welding;

assembly, material handling, biomedical applications.

Text / Reference:

McGraw

R1

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

RAPID REFERENCE

Concept and formula bank

Answer structure

Definition → Principle → Components/steps → Application → Conclusion

Use this sequence for descriptive questions when the topic does not require a numerical formula.

Practical record

Aim → Apparatus → Procedure → Observation → Result → Safety

Use this sequence for laboratory, workshop and field activities.

RAPID REVISION

Diagram and source-transcript library

Module 1 source and topic cards

Jump to official terminology, topic explanations and study guidance.

Module 2 source and topic cards

Jump to official terminology, topic explanations and study guidance.

Module 3 source and topic cards

Jump to official terminology, topic explanations and study guidance.

Module 4 source and topic cards

Jump to official terminology, topic explanations and study guidance.

OFFICIAL SELF-LEARNING

Activities from the syllabus

Use the extracted official activity wording as the record of required self-learning work.

The official PDF does not expose a separate activities heading in the extracted text; consult the source PDF pages for the exact activity list.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

Define or explain 2 Understanding laws of robotics.. (3 marks)

Answer: Begin with the standard definition or identity of *2 Understanding laws of robotics..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Describe the Robot anatomy. (3 marks)

Answer: Begin with the standard definition or identity of *Describe the Robot anatomy*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Explain the classification of robots 6 Understanding List the advantages and disadvantages of. (3 marks)

Answer: Begin with the standard definition or identity of *Explain the classification of robots 6 Understanding List the advantages and disadvantages of*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain 2 Understanding robots Fundamentals of Robotics: Introduction; Degree of freedom, Asimov's laws of robotics, Definition; Robot anatomy (parts) and its working; Robot Components: Manipulator, End effectors; Construction of links, Types of joints; Classification of robots; Cartesian, Cylindrical, Spherical, Scara, Vertical articulated; Robot work Volumes, Comparison; Advantages and disadvantages of robots. Explain the various robotic actuators on hydraulic, pneumatic and. (3 marks)

Answer: Begin with the standard definition or identity of *2 Understanding robots Fundamentals of Robotics: Introduction; Degree of freedom, Asimov's laws of robotics, Definition; Robot anatomy (parts) and its working; Robot Components: Manipulator, End effectors; Construction of links, Types of joints; Classification of robots; Cartesian, Cylindrical, Spherical, Scara, Vertical articulated; Robot work Volumes, Comparison;*

Advantages and disadvantages of robots. Explain the various robotic actuators on hydraulic, pneumatic and. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 2

Define or explain Explain different Robotic Drive Systems 5 Understanding Explain different actuation methods 4 Understanding M2.02 Conversion between linear and rotary. (3 marks)

Answer: Begin with the standard definition or identity of *Explain different Robotic Drive Systems 5 Understanding Explain different actuation methods 4 Understanding M2.02 Conversion between linear and rotary*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 4 Applying motion. (3 marks)

Answer: Begin with the standard definition or identity of *4 Applying motion*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Explain the feedback devices 4 Understanding Robotic Drive System: Actuators; Hydraulic, Pneumatic and Electrical drives; Linear actuator; Rotary drives; AC servo motor; DC servo motors and Stepper motors; Conversion between linear and rotary motion; Feedback devices;

Potentiometers; Optical encoders; DC tachometers; Explain about various types of sensors and concepts on robot vision. (3 marks)

Answer: Begin with the standard definition or identity of *Explain the feedback devices 4 Understanding Robotic Drive System: Actuators; Hydraulic, Pneumatic and Electrical drives; Linear actuator; Rotary drives; AC servo motor; DC servo motors and Stepper motors; Conversion between linear and rotary motion; Feedback devices; Potentiometers; Optical encoders; DC tachometers; Explain about various types of sensors and concepts on robot vision.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 3

Define or explain Explain the requirements of sensors 4 Understanding Explain the application of different. (3 marks)

Answer: Begin with the standard definition or identity of *Explain the requirements of sensors 4 Understanding Explain the application of different.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain sensors Explain the robot's machine vision. (3 marks)

Answer: Begin with the standard definition or identity of *sensors Explain the robot's machine vision.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain system Applications of robot vision systems. 3

Understanding M3.04 Sensors: Requirements of a sensor; Principles and Applications of the following types of sensors: Position sensors (Encoders, Resolvers, Piezo Electric); Range sensors; Proximity sensing; Force and torque sensing, Tactile sensors. Introduction to Machine Vision: Robot vision system (scanning and digitizing image data); Cameras (Acquisition of images); Vidicon camera (Working principle & construction); Applications of Robot vision system: Inspection, Identification, Navigation & serving.. (3 marks)

Answer: Begin with the standard definition or identity of *system Applications of robot vision systems. 3* *Understanding M3.04 Sensors: Requirements of a sensor; Principles and Applications of the following types of sensors: Position sensors (Encoders, Resolvers, Piezo Electric); Range sensors; Proximity sensing; Force and torque sensing, Tactile sensors. Introduction to Machine Vision: Robot vision system (scanning and digitizing image data); Cameras (Acquisition of images); Vidicon camera (Working principle & construction); Applications of Robot vision system: Inspection, Identification, Navigation & serving..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 4

Define or explain 4 Understanding system Explain the advanced automation. (3 marks)

Answer: Begin with the standard definition or identity of *4 Understanding system Explain the advanced automation.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain functions Explain the applications of robotics in. (3 marks)

Answer: Begin with the standard definition or identity of *functions* Explain the applications of robotics in. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 3 Understanding various industries. Automation: Basic elements of automated system, advanced automation functions, levels of automation. Industrial Applications: Application of robots in machining; welding; assembly, material handling, biomedical applications. Text / Reference: T/R Book Title/Author Mikell P. Weiss G.M., Nagel R.N., Odraj N.G., Industrial Robotics, McGraw R1 Hill Singapore, 1996 Ghosh, Control in Robotics and Automation: Sensor Based Integration, Allied R2 Publishers, Chennai, 1998. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **2 Understanding laws of robotics..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Explain different Robotic Drive Systems 5 Understanding Explain different actuation methods 4 Understanding M2.02 Conversion between linear and rotary.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Explain the requirements of sensors 4 Understanding Explain the application of different.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 4

1-mark definition: State the meaning of **4 Understanding system Explain the advanced automation.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
