

Course 5262

5 Credits: 4

Program Core

Source-grounded

Object Oriented Web

- To provide basic concepts the Object-Oriented Concept of PHP.

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTR syllabus PDF for Course 5262 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 5262.pdf from the uploaded official SITTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Information Technology
Course code	5262
Course title	Object Oriented Web
Semester	5 Credits: 4
Course category	Program Core
Periods per week	4 (L:4 T:0 P:0) Periods per semester: 60
Periods per semester	60

Item	Official information
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

36 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD

How to use this lesson

First pass

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- To provide basic concepts the Object-Oriented Concept of PHP.
- To develop web applications using Content Management Systems.

Course outcomes

CO	Official outcome	Study level
CO1	Illustrate Object Oriented Concepts in PHP 14 Understanding	See official syllabus
CO2	Illustrate Inheritance in PHP 14 Understanding Illustrate Advanced Object-Oriented functionality	See official syllabus
CO3	in PHP, Error Handling in PHP, MVC Frameworks 16 Applying and CodeIgniter basics.	See official syllabus
CO4	Illustrate CodeIgniter MVC Framework 14 Applying	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 2
CO2	CO2 2
CO3	CO3 2
CO4	CO4 2

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Illustrate Object Oriented Concepts in PHP	9	As specified
Module 2	Illustrate Inheritance in PHP.	6	As specified
Module 3	PHP, MVC Frameworks and Code Igniter basics.	11	As specified
Module 4	Illustrate CodeIgniter MVC Framework	10	As specified

MODULE 1

Illustrate Object Oriented Concepts in PHP

This module is presented from the official syllabus scope for Object Oriented Web. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Illustrate Object Oriented Concepts in PHP
- Official duration: As specified
- Official topic entries captured: 9

- The full source excerpt is preserved below for coverage checking.

Illustrate Object Oriented Concepts in PHP

Illustrate Object Oriented Concepts in PHP is an official topic in Module 1 of Object Oriented Web. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Illustrate Object Oriented Concepts in PHP using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, illustrate object oriented concepts in php should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Illustrate Object Oriented Concepts in PHP means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-ഓബ്ജക്റ്റ് ഓറിയന്റഡ് കോൺസെപ്റ്റ്‌സ് ഇൻ PHP
ഓബ്ജക്റ്റ് ഓറിയന്റഡ് പ്രോഗ്രാമിംഗ് definition/meaning ഓബ്ജക്റ്റ് ഓറിയന്റഡ് പ്രോഗ്രാമിംഗ്, steps, application ഓബ്ജക്റ്റ് ഓറിയന്റഡ് പ്രോഗ്രാമിംഗ്. Technical terms English-ഓബ്ജക്റ്റ് ഓറിയന്റഡ് പ്രോഗ്രാമിംഗ്.

MO1.01 Define class and Object. 1 Remembering

MO1.01 Define class and Object. 1 Remembering is an official topic in Module 1 of Object Oriented Web. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify MO1.01 Define class and Object. 1 Remembering using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, mo1.01 define class and object. 1 remembering should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Summarize Implementing Interfaces in PHP. 3 Understanding through Inheritance with private and protected-Overriding-preventing Inheritance and overriding with final- Understand multiple Inheritance- Implementing Interfaces in PHP. Illustrate Advanced Object-Oriented functionality in PHP, Error Handling in is an official topic in Module 2 of Object Oriented Web. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Summarize Implementing Interfaces in PHP. 3 Understanding through Inheritance with private and protected-Overriding-preventing Inheritance and overriding with final- Understand multiple Inheritance- Implementing Interfaces in PHP. Illustrate Advanced Object-Oriented functionality in PHP, Error Handling in using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, summarize implementing interfaces in php. 3 understanding through inheritance with private and protected-overriding-preventing inheritance and overriding with final- understand multiple inheritance- implementing interfaces in php. illustrate advanced object-oriented functionality in php, error handling in should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

MODULE 3

PHP, MVC Frameworks and Code Igniter basics.

This module is presented from the official syllabus scope for Object Oriented Web.
Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 3 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: PHP, MVC Frameworks and Code Igniter basics.
- Official duration: As specified
- Official topic entries captured: 11
- The full source excerpt is preserved below for coverage checking.

Summarize implementation of Static Methods 1 Understanding Summarize Checking class type and Type

Summarize implementation of Static Methods 1 Understanding Summarize Checking class type and Type is an official topic in Module 3 of Object Oriented Web. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Summarize implementation of Static Methods 1 Understanding Summarize Checking class type and Type using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, summarize implementation of static methods 1 understanding summarize checking class type and type should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Aspect	What to prepare
Definition/identity	What Summarize Libraries means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4-എന്നു Summarize Libraries എന്നതിന്റെ definition/meaning എഴുതുക. എന്നതിന്റെ steps, application എന്നിവ എഴുതുക. Technical terms English-ൽ എഴുതുക.

Summarize CodeIgniter Error Handling

Summarize CodeIgniter Error Handling is an official topic in Module 4 of Object Oriented Web. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Summarize CodeIgniter Error Handling using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, summarize codeigniter error handling should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

OFFICIAL SELF-LEARNING

Activities from the syllabus

Use the extracted official activity wording as the record of required self-learning work.

The official PDF does not expose a separate activities heading in the extracted text; consult the source PDF pages for the exact activity list.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

Define or explain Illustrate Object Oriented Concepts in PHP. (3 marks)

Answer: Begin with the standard definition or identity of *Illustrate Object Oriented Concepts in PHP*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain MO1.01 Define class and Object. 1 Remembering. (3 marks)

Answer: Begin with the standard definition or identity of *MO1.01 Define class and Object. 1 Remembering*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain MO1.02 Define Polymorphism and Inheritance 1 Remembering. (3 marks)

Answer: Begin with the standard definition or identity of *MO1.02 Define Polymorphism and Inheritance 1 Remembering*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain MO1.03 Define class in PHP 1 Remembering. (3 marks)

Answer: Begin with the standard definition or identity of *MO1.03 Define class in PHP 1 Remembering*. State the governing principle, list the key components or stages, and

close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 2

Define or explain Summarize Inheritance in PHP. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize Inheritance in PHP*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Summarize how to implement Inheritance in PHP 2 Understanding Summarize Control visibility through Inheritance. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize how to implement Inheritance in PHP 2 Understanding Summarize Control visibility through Inheritance*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 2 Understanding with private and protected. Define Overriding in PHP, summarize preventing. (3 marks)

Answer: Begin with the standard definition or identity of *2 Understanding with private and protected. Define Overriding in PHP, summarize preventing*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 3 Understanding Inheritance and overriding with final. (3 marks)

Answer: Begin with the standard definition or identity of *3 Understanding Inheritance and overriding with final*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 3

Define or explain Summarize implementation of Static Methods 1 Understanding Summarize Checking class type and Type. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize implementation of Static Methods 1 Understanding Summarize Checking class type and Type*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 1 Understanding Hinting, Late Static Binding. (3 marks)

Answer: Begin with the standard definition or identity of *1 Understanding Hinting, Late Static Binding*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps,

application application application application.

Define or explain Summarize Late Static Binding, Cloning Objects. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize Late Static Binding, Cloning Objects*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: definition, principle/steps, application application application.

Define or explain Summarize Exception Handling concepts in PHP. 1 Understanding Summarize Discuss Exception class, User defined. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize Exception Handling concepts in PHP. 1 Understanding Summarize Discuss Exception class, User defined*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: definition, principle/steps, application application application.

Module 4

Define or explain Database, Insertion, updation, selection and 3 Remembering deletion of records. (3 marks)

Answer: Begin with the standard definition or identity of *Database, Insertion, updation, selection and 3 Remembering deletion of records*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Summarize Libraries. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize Libraries*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Summarize CodeIgniter Error Handling. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize CodeIgniter Error Handling*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Summarize CodeIgniter File Uploading. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize CodeIgniter File Uploading*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Illustrate Object Oriented Concepts in PHP**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Summarize Inheritance in PHP**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Summarize implementation of Static Methods 1 Understanding Summarize Checking class type and Type**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 4

1-mark definition: State the meaning of **Database, Insertion, updation, selection and 3 Remembering deletion of records**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.

Term	Meaning in this lesson
Source transcript	A preserved extract of the official syllabus used for coverage checking.
