Course information

Item	Official information
Programme	Diploma in Commercial Practice
Course code	6143B
Course title	Project Planning and Development
Semester	6 Credits: 4
Course category	Open Elective

Item	Official information
Periods per week	4 (L:3, T:1, P:0) Periods per semester: 60
Periods per semester	60
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

20 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD

How to use this lesson

First pass

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- To impart basic knowledge in project management and sources of funds to finance a
- To familiarize the student with project appraisal techniques in determining the
- viability of a project.

Course outcomes

CO	Official outcome	Study level

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Make use of the basic concepts of project management.	6	As specified
Module 2	Identify the techniques for determining the feasibility of a project.	4	As specified
Module 3	Identify the sources of finance for funding a project.	5	As specified
Module 4	Apply project appraisal techniques to determine the viability of a project.	5	As specified

MODULE 1

Make use of the basic concepts of project management.

This module is presented from the official syllabus scope for Project Planning and Development. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Make use of the basic concepts of project management.
- Official duration: As specified

- Official topic entries captured: 6
- The full source excerpt is preserved below for coverage checking.

State the meaning of project management. 2 Understanding.

State the meaning of project management. 2 Understanding. is an official topic in Module 1 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify State the meaning of project management. 2 Understanding. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, state the meaning of project management. 2 understanding. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What State the meaning of project management. 2 Understanding. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related

but different term.

Malayalam support: Module 1- State the meaning of project management. 2 Understanding. definition/meaning . steps, application . Technical terms English- .

Interpret the classification of project.

Interpret the classification of project. is an official topic in Module 1 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Interpret the classification of project. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, interpret the classification of project. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Interpret the classification of project. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- Interpret the classification of project.

പ്രോജക്ട് ക്ലാസ്സിഫിക്കേഷൻ definition/meaning പ്രോജക്ട് ക്ലാസ്സിഫിക്കേഷൻ. പ്രോജക്ട് ക്ലാസ്സിഫിക്കേഷൻ, steps, application പ്രോജക്ട് ക്ലാസ്സിഫിക്കേഷൻ പ്രോജക്ട്. Technical terms English- പ്രോജക്ട് ക്ലാസ്സിഫിക്കേഷൻ.

Identify project life cycle.

Identify project life cycle. is an official topic in Module 1 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Identify project life cycle. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, identify project life cycle. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Official syllabus detail and terminology

The following excerpt preserves official syllabus terminology for this module.
Educational explanations below are separate elaboration.

Make use of the basic concepts of project management.

M1.01	State the meaning of project management.	2
	Understanding.	

M1.02	Interpret the classification of project.	2
	Understanding	

M1.03	Identify project life cycle.	1
	Applying	

M1.04	Explain the phases of project management.	1
	Understanding	

M1.05	Describe the role of project manager.	2
	Understanding	

M1.06	Identify the Sources of project idea.	2
	Applying	

Contents:

Project management: Meaning - Objectives - Characteristics of a project - Need - Classification of project - Project life cycle - Phases of project management - Role and responsibility of project manager - Generation of project idea-Sources of project idea - Screening of project idea.

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 2

Identify the techniques for determining the feasibility of a project.

This module is presented from the official syllabus scope for Project Planning and Development. Use the topic cards for learning and the source transcript for exact

coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 2 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Identify the techniques for determining the feasibility of a project.
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

3 Understanding formulation.

3 Understanding formulation. is an official topic in Module 2 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 3 Understanding formulation. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 3 understanding formulation. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 3 Understanding formulation. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-
Recall classification of capital. 2 Understanding
Explain the factors determining fixed and
definition/meaning
, steps, application
Technical terms English-
.

2 Understanding working capital requirement.

2 Understanding working capital requirement. is an official topic in Module 3 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 2 Understanding working capital requirement. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 2 understanding working capital requirement. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 2 Understanding working capital requirement. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-2 Understanding working capital requirement.
പ്രവർത്തനധനം എന്നതിന്റെ definition/meaning എന്തായിരിക്കണം. പ്രവർത്തനധനം നിലനിർത്താൻ, steps, application എന്നിവയെക്കുറിച്ച് വിശദീകരിക്കണം. Technical terms English-ൽ എഴുതണം.

List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term

List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term is an official topic in Module 3 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, list the various sources of finance. 1 understanding identify the sources of long-term, medium term should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Applying		
	and short-term finance.	

Contents:

Project financing: Classification of capital - Fixed capital and Working capital - Factors

governing fixed capital and working capital requirements - Sources or means of finance -

Sources of long-term fund, Short term fund and Medium-term fund.

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 4

Apply project appraisal techniques to determine the viability of a project.

This module is presented from the official syllabus scope for Project Planning and Development. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Apply project appraisal techniques to determine the viability of a project.
- Official duration: As specified
- Official topic entries captured: 5
- The full source excerpt is preserved below for coverage checking.

Recall project appraisal. 3 Understanding Solve problems using traditional/ non-

Recall project appraisal. 3 Understanding Solve problems using traditional/ non- is an official topic in Module 4 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Recall project appraisal. 3 Understanding Solve problems using traditional/ non- using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, recall project appraisal. 3 understanding solve problems using traditional/ non- should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Recall project appraisal. 3 Understanding Solve problems using traditional/ non- means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4- $\square$ Recall project appraisal. 3 Understanding Solve problems using traditional/ non- $\square$ definition/meaning $\square$. $\square$ $\square$ $\square$, steps, application $\square$ $\square$. Technical terms English- $\square$ $\square$ $\square$.

5 Applying discounting methods. Solve problems using modern/ discounting

5 Applying discounting methods. Solve problems using modern/ discounting is an official topic in Module 4 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 5 Applying discounting methods. Solve problems using modern/ discounting using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 5 applying discounting methods. solve problems using modern/ discounting should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 5 Applying discounting methods. Solve problems using modern/ discounting means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related

but different term.

Malayalam support: Module 4-5 Applying discounting methods. Solve problems using modern/ discounting $\frac{1}{1+r}$ definition/meaning $\frac{1}{1+r}$. $\frac{1}{1+r}$ $\frac{1}{1+r}$ $\frac{1}{1+r}$, steps, application $\frac{1}{1+r}$ $\frac{1}{1+r}$ $\frac{1}{1+r}$. Technical terms English- $\frac{1}{1+r}$ $\frac{1}{1+r}$ $\frac{1}{1+r}$.

5 Applying methods.

5 Applying methods. is an official topic in Module 4 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 5 Applying methods. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 5 applying methods. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

OFFICIAL SELF-LEARNING

Activities from the syllabus

Use the extracted official activity wording as the record of required self-learning work.

The official PDF does not expose a separate activities heading in the extracted text; consult the source PDF pages for the exact activity list.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

Define or explain State the meaning of project management. 2 Understanding.. (3 marks)

Answer: Begin with the standard definition or identity of *State the meaning of project management. 2 Understanding..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Interpret the classification of project.. (3 marks)

Answer: Begin with the standard definition or identity of *Interpret the classification of project..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Identify project life cycle.. (3 marks)

Answer: Begin with the standard definition or identity of *Identify project life cycle..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain Explain the phases of project management.. (3 marks)

Answer: Begin with the standard definition or identity of *Explain the phases of project management..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□□□ □□□□□□.

Define or explain 3 Understanding formulation.. (3 marks)

Answer: Begin with the standard definition or identity of *3 Understanding formulation..*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Summarize the elements of project formulation. 5 Understanding Compare Critical Path Method (CPM) and. (3 marks)

Answer: Begin with the standard definition or identity of *Summarize the elements of project formulation. 5 Understanding Compare Critical Path Method (CPM) and.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Programme Evaluation Review Technique 7 Understanding (PERT). Explain Financial analysis and identify its. (3 marks)

Answer: Begin with the standard definition or identity of *Programme Evaluation Review Technique 7 Understanding (PERT). Explain Financial analysis and identify its.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 4 Applying techniques. Project formulation: Meaning - Need - Elements of project formulation - Feasibility analysis - Techno - economic analysis - Project design and network Analysis - Critical Path Method (CPM)

and Programme Evaluation Review Technique (PERT) - Input analysis - Financial Analysis - Fund flow analysis, Cash flow analysis, Ratio analysis - Social cost benefit analysis - Pre-investment appraisal. (3 marks)

Answer: Begin with the standard definition or identity of 4 Applying techniques. Project formulation: Meaning - Need - Elements of project formulation - Feasibility analysis - Techno - economic analysis - Project design and network Analysis - Critical Path Method (CPM) and Programme Evaluation Review Technique (PERT) - Input analysis - Financial Analysis - Fund flow analysis, Cash flow analysis, Ratio analysis - Social cost benefit analysis - Pre-investment appraisal. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 3

Define or explain Outline project financing.. (3 marks)

Answer: Begin with the standard definition or identity of Outline project financing.. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain Recall classification of capital. 2 Understanding Explain the factors determining fixed and. (3 marks)

Answer: Begin with the standard definition or identity of Recall classification of capital. 2 Understanding Explain the factors determining fixed and. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain 2 Understanding working capital requirement.. (3 marks)

Answer: Begin with the standard definition or identity of *2 Understanding working capital requirement..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Define or explain List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term. (3 marks)

Answer: Begin with the standard definition or identity of *List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□□.

Module 4

Define or explain Recall project appraisal. 3 Understanding Solve problems using traditional/ non-. (3 marks)

Answer: Begin with the standard definition or identity of *Recall project appraisal. 3 Understanding Solve problems using traditional/ non-.* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps,

□□□□□ application □□□□ □□□□□□□□ □□□□□.

Define or explain 5 Applying discounting methods. Solve problems using modern/ discounting. (3 marks)

Answer: Begin with the standard definition or identity of *5 Applying discounting methods. Solve problems using modern/ discounting*. State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□.

Define or explain 5 Applying methods.. (3 marks)

Answer: Begin with the standard definition or identity of *5 Applying methods..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□.

Define or explain Explain project evaluation.. (3 marks)

Answer: Begin with the standard definition or identity of *Explain project evaluation..* State the governing principle, list the key components or stages, and close with one relevant application or observation. Use the exact official terminology preserved in the module transcript.

Malayalam support: □ □□□□□□□□□ □□□□ definition, □□□□□□ principle/steps, □□□□□□ application □□□□ □□□□□□□□ □□□□□.

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **State the meaning of project management.**

2 Understanding..

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **3 Understanding formulation..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Outline project financing..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 4

1-mark definition: State the meaning of **Recall project appraisal. 3 Understanding Solve problems using traditional/ non-**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
