Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

9 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD

How to use this lesson

First pass

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Upward and downward R, L, SH 4 0	3	As specified
Module 2	Halving and doubling principles Halving and doubling principles and identify diphones. 4 0	2	As specified
Module 3	Medial semicircle, prefixes and suffixes 5 0	3	As specified
Module 4	Contractions and figures Contractions and figures 2 0	1	As specified

MODULE 1

Upward and downward R, L, SH 4 0

This module is presented from the official syllabus scope for Shorthand English Theory II. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Upward and downward R, L, SH 4 0
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ Upward and downward R, L, SH 4 0

Upward and downward R, L, SH 4 0 is an official topic in Module 1 of Shorthand English Theory II. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Upward and downward R, L, SH 4 0 using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, upward and downward r, l, sh 4 0 should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Upward and downward R, L, SH 4 0 means in the official course context

Aspect	What to prepare
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-ഓരോ അറ്റവും മുകളിലേക്കും താഴെക്കും, R, L, SH 4 0 ഓരോ ഓരോന്നും definition/meaning ഓരോന്നും. ഓരോന്നും ഓരോന്നും ഓരോന്നും, steps, application ഓരോന്നും ഓരോന്നും. Technical terms English-ൽ ഓരോന്നും ഓരോന്നും.

▼ indication

indication is an official topic in Module 1 of Shorthand English Theory II. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify indication using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, indication should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What indication means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-എന്നുള്ളതിന്റെ സൂചനകൾ നൽകുന്നതിനായി നിങ്ങളുടെ നിർവ്വചനം/അർത്ഥം വ്യക്തമാക്കുക. നിങ്ങളുടെ നിർവ്വചനം വ്യക്തമാക്കുക, steps, application നൽകുന്നതിനായി നിങ്ങളുടെ നിർവ്വചനം വ്യക്തമാക്കുക. Technical terms English-ൽ നിങ്ങളുടെ നിർവ്വചനം വ്യക്തമാക്കുക.

▼ Practice grammalogues

Practice grammalogues is an official topic in Module 1 of Shorthand English Theory II. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Practice grammalogues using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, practice grammalogues should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Practice grammalogues means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-പ്രായ്ക്കം Practice grammalogues പദപരിഭാഷണം പദപരിഭാഷണം definition/meaning പദപരിഭാഷണം. പദപരിഭാഷണം പദപരിഭാഷണം, steps, application പദപരിഭാഷണം പദപരിഭാഷണം പദപരിഭാഷണം. Technical terms English-ൽ പദപരിഭാഷണം പദപരിഭാഷണം.

► **Official syllabus detail and terminology (expand in digital version)**

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 2

Halving and doubling principles Halving and doubling principles and identify diphones. 4 0

This module is presented from the official syllabus scope for Shorthand English Theory II. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 2 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Halving and doubling principles Halving and doubling principles and identify diphones. 4 0
- Official duration: As specified
- Official topic entries captured: 2
- The full source excerpt is preserved below for coverage checking.

▼ Halving and doubling principles Halving and doubling principles and identify diphones. 4 0

Halving and doubling principles Halving and doubling principles and identify diphones. 4 0 is an official topic in Module 2 of Shorthand English Theory II. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Halving and doubling principles Halving and doubling principles and identify diphones. 4 0 using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, halving and doubling principles halving and doubling principles and identify diphones. 4 0 should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 2-പ്രായ്ക്കു പ്രായ്ക്കു ഗ്രാമറോളുകൾ പ്രായ്ക്കു പ്രായ്ക്കു definition/meaning പ്രായ്ക്കു പ്രായ്ക്കു. പ്രായ്ക്കു പ്രായ്ക്കു പ്രായ്ക്കു, steps, application പ്രായ്ക്കു പ്രായ്ക്കു പ്രായ്ക്കു. Technical terms English-ൽ പ്രായ്ക്കു പ്രായ്ക്കു പ്രായ്ക്കു.

► **Official syllabus detail and terminology (expand in digital version)**

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 3

Medial semicircle, prefixes and suffixes 5 0

This module is presented from the official syllabus scope for Shorthand English Theory II. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 3 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Medial semicircle, prefixes and suffixes 5 0
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ Medial semicircle, prefixes and suffixes 5 0

Medial semicircle, prefixes and suffixes 5 0 is an official topic in Module 3 of Shorthand English Theory II. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Medial semicircle, prefixes and suffixes 5 0 using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, medial semicircle, prefixes and suffixes 5 0 should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Medial semicircle, prefixes and suffixes 5 0 means in the official course context

Aspect	What to prepare
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-ഘാതം Medial semicircle, prefixes and suffixes 50 ഘാതം ഘാതം definition/meaning ഘാതം ഘാതം ഘാതം, steps, application ഘാതം ഘാതം ഘാതം. Technical terms English-ഘാതം ഘാതം ഘാതം.

▼ suffixes

suffixes is an official topic in Module 3 of Shorthand English Theory II. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify suffixes using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, suffixes should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What suffixes means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-ഓർത്തരങ്ങൾ suffixes ഓർത്തരങ്ങൾ definition/meaning ഓർത്തരങ്ങൾ. ഓർത്തരങ്ങൾ ഓർത്തരങ്ങൾ, steps, application ഓർത്തരങ്ങൾ ഓർത്തരങ്ങൾ. Technical terms English-ഓർത്തരങ്ങൾ ഓർത്തരങ്ങൾ.

▼ Medial semicircle, prefixes and Practice grammalogues and phrase

Medial semicircle, prefixes and Practice grammalogues and phrase is an official topic in Module 3 of Shorthand English Theory II. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Medial semicircle, prefixes and Practice grammalogues and phrase using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, medial semicircle, prefixes and practice grammalogues and phrase should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

OFFICIAL SELF-LEARNING

Activities from the syllabus

Use the extracted official activity wording as the record of required self-learning work.

- for Self-Learning
- Week Self-Learning description Hours Module I
- Identify upward or downward R,L,SH from set of given words and collect additional examples using reference dictionaries
- available in the library 3 Practice exercises related R,L,and SH
- Identify rules applied in writing outlines from a given set of words, collect additional examples using reference dictionaries available in the library
- Prepare a table of compound consonants with suitable examples 3
- Prepare a chart showing the examples of implication of initial or final vowels
- Practice exercises related to vowel indication Module II
- Perform activities for identifying and writing halving principles in word outlines 3
- Activities for identifying and writing doubling principles in word outlines 3
- Identify outlines from a set of words using halving and doubling principle
- Practice exercises in both halving and doubling.
- Activities for applying diphonics to the consonants
- Practice exercises in diphonic or two vowel signs Module III
- Identify the use of left semi circle and right semi circle in a given set of words 3
- Prepare a table or chart of commonly used suffixes 3
- Prepare a table or chart of commonly used prefixes 3 Practice grammalogues and phrases Practice exercises of suffixes and prefixes Module IV
- Prepare samples of formal and informal letters 3
- Practice precis writing techniques 3
- Practice passages including contractions 3

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► Define or explain Upward and downward R, L, SH 4 0. (3 marks)

► Define or explain indication. (3 marks)

► Define or explain Practice grammalogues. (3 marks)

Module 2

► Define or explain Halving and doubling principles Halving and doubling principles and identify diphones. 4 0. (3 marks)

► Define or explain Practice grammalogues. (3 marks)

Module 3

► Define or explain Medial semicircle, prefixes and suffixes 5 0. (3 marks)

► Define or explain suffixes. (3 marks)

► Define or explain Medial semicircle, prefixes and Practice grammalogues and phrase. (3 marks)

Module 4

► **Define or explain Practice grammalogues, phrases & contractions. (3 marks)**

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Upward and downward R, L, SH 4 0**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Halving and doubling principles Halving and doubling principles and identify diphones. 4 0**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Medial semicircle, prefixes and suffixes 5 0**.

3-mark explanation: Explain one principle, process or comparison from

Module 4

1-mark definition: State the meaning of **Practice grammalogues, phrases & contractions**.

3-mark explanation: Explain one principle, process or comparison from

this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
