

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 3062

3 Credits: 3

Program core

Source-grounded

Textile Wet Processing

□ Identify the chemicals used and pre-treatments given to cotton fibres.

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 3062 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 3062.pdf from the uploaded official SITTTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Textile Technology
Course code	3062
Course title	Textile Wet Processing
Semester	3 Credits: 3
Course category	Program core
Periods per week	3 (L:2, T:1, P:0) Periods per semester: 45
Periods per semester	45
Credits	3
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

12 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES**Objectives, outcomes and mapping****Course objectives**

- Identify the chemicals used and pre-treatments given to cotton fibres.
- To impart the knowledge of dyeing natural cellulosic & Viscose fibres using water-soluble & water-insoluble dyes.

Course outcomes

CO	Official outcome	Study level
CO1	11 Understanding fabrics Discuss various methods of bleaching textile	See official syllabus
CO2	materials & Cotton Mercerisation process. 10 Understanding and Mercerizing Discuss the process of dyeing Cotton/Viscose fibre	See official syllabus
CO3	10 Understanding using water-soluble dyes. Explain the process of cotton/ viscose fibre dyeing	See official syllabus
CO4	12 Understanding with water insoluble dyes.	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 3
CO2	CO2 3
CO3	CO3 3
CO4	CO4 3

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Demonstrate the pre-treatments given to Cotton Grey fabrics	3	As specified
Module 2	Use of various methods of bleaching textile materials & Cotton	2	As specified
Module 3	dyes.	4	As specified
Module 4	Execute cotton/ viscose fibre dyeing with water insoluble dyes.	3	As specified

MODULE 1

Demonstrate the pre-treatments given to Cotton Grey fabrics

This module is presented from the official syllabus scope for Textile Wet Processing. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title:
Demonstrate the pre-treatments given to Cotton Grey fabrics
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ know various chemicals used in textile wet 4 Remembering processing Discuss the preparation of cotton/ Viscose for

know various chemicals used in textile wet 4 Remembering processing Discuss the preparation of cotton/ Viscose for is an official topic in Module 1 of Textile Wet Processing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify know various chemicals used in textile wet 4 Remembering processing Discuss the preparation of cotton/ Viscose for using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, know various chemicals used in textile wet 4 remembering processing discuss the preparation of cotton/ viscose for should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What know various chemicals used in textile wet 4 Remembering processing Discuss the preparation of cotton/ Viscose for means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-
 wet 4 Remembering processing Discuss the preparation of cotton/ Viscose

▼ 4 Remembering viscose materials with Water-insoluble dyes

Application of Ingrain dyes on textile

4 Remembering viscose materials with Water-insoluble dyes Application of Ingrain dyes on textile is an official topic in Module 4 of Textile Wet Processing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 4 Remembering viscose materials with Water-insoluble dyes Application of Ingrain dyes on textile using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 4 remembering viscose materials with water-insoluble dyes application of ingrain dyes on textile should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What 4 Remembering viscose materials with Water-insoluble dyes Application of Ingrain dyes on textile means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain know various chemicals used in textile wet 4 Remembering processing Discuss the preparation of cotton/ Viscose for. (3 marks)**

► **Define or explain 4 Understanding dyeing. (3 marks)**

► **Define or explain Differentiate Singeing, Desizing & Scouring 3 Understanding Chemistry of Wetting: Definition of surface tension and contact angle - Relationship of surface tension and contact angle with wetting of textile materials Preparation of Cotton/ Viscose for Dyeing: Sequence of operations in wet processing of Cotton/ Viscose material. Singeing: Objectives - Methods - Hot plate, Roller, Gas singeing machines. De-sizing: Objectives - Methods - Rot steeping - Acid steeping, Enzymatic de-sizing. Scouring: Objectives and importance - mechanism of scouring- Types of Kiers. Features of a modern Kiers and its working. (3 marks)**

Module 2

► **Define or explain 2 Understanding materials Use of continuous method of scouring and Bleaching process & compare hypochlorite 4 Understanding M2.02 and peroxide bleaching Gain the knowledge on the process and. (3 marks)**

► **Define or explain importance of Mercerisation to implement the 4 Understanding same in new situation. Bleaching: Objectives, Types of bleaching agents-Comparison of sodium and calcium hypochlorite's in terms of their properties, chemical behaviour and application - Method of bleaching with Sodium hypochlorite. Properties of hydrogen peroxide- Strength of hydrogen peroxide in volume & percentage - Bleaching with Hydrogen peroxide (Batch process).Continuous scouring and bleaching by using 'J' Box. Compare hypochlorite and peroxide bleaching. Mercerisation: Objects of mercerizing. Changes in the appearance of cotton by mercerizing - Various factors affecting the process of Mercerisation. Working of a Hank Mercerizing machine. Working of continuous Cloth Mercerizing machine Define BAN. Implement the process of dyeing Cotton/Viscose fibre using water-soluble. (3 marks)**

Module 3

► **Define or explain 2 Understanding application Execute the application of Direct dyes,. (3 marks)**

► **Define or explain 3 Understanding Reactive dyes on Cotton/ Viscose fibres Execute the application of Basic dyes on. (3 marks)**

► **Define or explain 3 Understanding Cotton material. (3 marks)**

► **Define or explain Test the fastness properties of dyed material 2 Understanding Introduction to Dyeing: Define dyes - selection of dye - Classification of dyes based on the method of application - Terminologies related to dyes and dyeing - Material Liquor ratio, Shade Percentage, Percentage of Exhaustion, affinity, substantivity. General mechanism of dyeing. Important Natural dyes. Direct Dyes: Method of application of Direct Dye on Cotton and Viscose. After - treatments given to Direct dyed materials. Reactive Dyes: Properties - Types - method of application of Reactive Dyes on Cotton & Viscose Method of**

application of Basic dyes on cotton. Fastness properties of dyed material. (3 marks)

Module 4

► **Define or explain 4 Remembering viscose materials with Water-insoluble dyes Application of Ingrain dyes on textile. (3 marks)**

► **Define or explain 4 Understanding materials. (3 marks)**

► **Define or explain Test the fastness properties of dyed material 4 Understanding Water-Insoluble dyes: Sulphur Dyes - Method of application on cotton - Defects of sulphur dying and remedies. Vat Dyes - Types - Vatting - Method of application on Cotton/ Viscose material Ingrain Dyes: Azoic Colours - Dyeing - Diazotisation - Development of Colour on Cotton Brief idea on Application of Oxidised dyes, Mineral dyes and Natural Indigo on Cotton. PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **know various chemicals used in textile wet 4 Remembering processing Discuss the preparation of cotton/ Viscose for.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **2 Understanding materials Use of continuous method of scouring and Bleaching process & compare hypochlorite 4 Understanding M2.02 and peroxide bleaching Gain the knowledge on the process and.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **2 Understanding application**

Module 4

1-mark definition: State the meaning of **4 Remembering viscose**

Execute the application of Direct dyes,.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

materials with Water-insoluble dyes Application of Ingrain dyes on textile.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION**Exam checklist****Before writing**

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
