

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 3101

3 Credits: 3

Program Core

Source-grounded

Print Design

□ To impart basic information regarding the design of various products.

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 3101 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 3101.pdf from the uploaded official SITTTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Printing Technology
Course code	3101
Course title	Print Design
Semester	3 Credits: 3
Course category	Program Core
Periods per week	3 (L:3, T:0, P:0) Periods per semester: 45
Periods per semester	45
Credits	3
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

16 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- □ To impart basic information regarding the design of various products.
- □ To enhance the creativity of the students by equip them with knowledge of elements
- in a design and its importance.
- □ To enhance the creativity of the students by equip them with knowledge of principles
- of design and to provide knowledge about design layout.
- □ To provide information about the use of most appropriate applications of modern

Course outcomes

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	originals used in print design, placing of design elements & principles.	4	As specified
Module 2	reading and layout.	4	As specified
Module 3	design factors of different printed products.	5	As specified
Module 4	medias.	3	As specified

MODULE 1

originals used in print design, placing of design elements & principles.

This module is presented from the official syllabus scope for Print Design. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: originals used in print design, placing of design elements & principles.
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

▼ Concept of Design for printing

Concept of Design for printing is an official topic in Module 1 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Concept of Design for printing using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, concept of design for printing should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Concept of Design for printing means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-
 definition/meaning .
 , steps, application . Technical terms
 English- .

▼ Design Elements

Design Elements is an official topic in Module 1 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Design Elements using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, design elements should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

▼ Principles of Design

Principles of Design is an official topic in Module 1 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Principles of Design using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, principles of design should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

▼ Readability and legibility

Readability and legibility is an official topic in Module 2 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Readability and legibility using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, readability and legibility should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Readability and legibility means in the official course context
Study lens	Principle → components or stages → result → application

Malayalam support: Module 2- Readability and legibility ഉറപ്പുള്ളതും വായിക്കാനാകുന്നതുമായ രീതിയിൽ definition/meaning ഉൾക്കൊള്ളിക്കണം. ഉദാഹരണം ഉൾക്കൊള്ളിക്കണം, steps, application ഉൾക്കൊള്ളിക്കണം ഉൾക്കൊള്ളണം. Technical terms English-ൽ ഉൾക്കൊള്ളിക്കണം.

▼ Proof reading

Proof reading is an official topic in Module 2 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Proof reading using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, proof reading should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

▼ Design of stationary materials

Design of stationary materials is an official topic in Module 3 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Design of stationary materials using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, design of stationary materials should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Aspect	What to prepare
Definition/identity	What Design of stationary materials means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3- $\square\square$ Design of stationary materials

$\square\square\square\square\square\square\square\square\square\square$ $\square\square\square\square$ definition/meaning $\square\square\square\square\square\square\square\square\square\square$. $\square\square\square\square\square$ $\square\square\square\square\square$ $\square\square\square\square\square\square$, steps, application $\square\square\square\square\square$ $\square\square\square\square\square\square\square\square$ $\square\square\square\square\square$. Technical terms English- $\square$ $\square\square\square\square\square$ $\square\square\square\square\square\square\square\square\square$.

▼ **Other printed products 2 Understanding Various imposition schemes: Regular - sheet wise work, half sheet work, work and turn, work and tumble. Irregular imposition. Imposition software- importance of imposition software in designing, imposition, Bookmaker, pressgenie, Insoft, agfa apogee, etc. Book design-parts of book. Newspaper-components of newspaper design, magazine-components of magazine. Design of stationary materials: commercial stationary- business forms, greeting and invitation cards, hand bills, direct mail folders, show cards. Other printed products: Leaflets, pamphlets, catalogues, brochures, booklets, Labels, manuals, cartons - packaging, etc. Explain computer aided designing, Advertising agency and advertising**

Other printed products 2 Understanding Various imposition schemes: Regular - sheet wise work, half sheet work, work and turn, work and tumble. Irregular imposition. Imposition software- importance of imposition software in designing, imposition, Bookmaker, pressgenie, Insoft, agfa apogee, etc. Book design-parts of book. Design of stationary materials: commercial stationary- business forms, greeting and invitation cards, hand bills, direct mail folders, show cards. Other printed products: Leaflets, pamphlets, catalogues, brochures, booklets, Labels, manuals, cartons - packaging, etc. Explain computer aided designing, Advertising agency and advertising is an official topic in Module 3 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Other printed products 2 Understanding Various imposition schemes: Regular - sheet wise work, half sheet work, work and turn, work and tumble. Irregular imposition. Imposition software- importance of imposition software in designing, imposition, Bookmaker, pressgenie, Insoft, agfa apogee, etc. Book design-parts of book. Newspaper-components of newspaper design, magazine-components of magazine. Design of stationary materials: commercial stationary- business forms, greeting and invitation cards, hand bills, direct mail folders, show cards. Other printed products: Leaflets, pamphlets, catalogues, brochures, booklets, Labels, manuals, cartons - packaging, etc. Explain computer aided designing, Advertising agency and advertising using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, other printed products 2 understanding various imposition schemes: regular - sheet wise work, half sheet work, work and turn, work and tumble. irregular imposition. imposition software- importance of imposition software in designing, imposition, bookmaker, pressgenie, insoft, agfa apogee, etc. book design-parts of book. newspaper-components of newspaper design, magazine-components of magazine. design of stationary materials: commercial stationary- business forms, greeting and invitation cards, hand bills, direct mail folders, show cards. other printed products: leaflets, pamphlets, catalogues, brochures, booklets, labels, manuals, cartons - packaging, etc. explain computer aided designing, advertising agency and advertising should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

► **Official syllabus detail and terminology (expand in digital version)**

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 4**medias.**

This module is presented from the official syllabus scope for Print Design. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: medias.
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ Computer aided designing

Computer aided designing is an official topic in Module 4 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Computer aided designing using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, computer aided designing should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Computer aided designing means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4-കമ്പ്യൂട്ടർ സഹിതം രൂപകല്പന

രൂപകല്പനയുടെ നിർവ്വചനം/അർത്ഥം എഴുതുക. നിർവ്വചനം, തിരക്കുകൾ, ഘട്ടങ്ങൾ, പ്രയോഗം എന്നിവയെക്കുറിച്ച് എഴുതുക. Technical terms English-ൽ എഴുതുക.

▼ Proofing - types of proofs 3 Understanding Advertising Agency & medias of

Proofing - types of proofs 3 Understanding Advertising Agency & medias of is an official topic in Module 4 of Print Design. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Proofing - types of proofs 3 Understanding Advertising Agency & medias of using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, proofing - types of proofs 3 understanding advertising agency & medias of should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain Concept of Design for printing. (3 marks)**

► **Define or explain Design Elements. (3 marks)**

► **Define or explain Principles of Design. (3 marks)**

► **Define or explain Different types of Originals 3 Understanding Design**
- Introduction to graphic design - goal, audience, venue and budget.
Concept of Design for printing - What does the design process involve?
Who are the Designers connected with printing? Role of the Print Designer. Overall concept of Industrial Design in relation to printing design. Design elements - line, shape, value, and format, texture - visual and tactile, type, color and space - negative and positive. Principles of design - harmony, rhythm, contrast, balance - (formal, informal), proportion, unity. Guttenberg diagram of eye direction. Different types of Originals - Continuous tone, line drawings, halftone black & white and color copy, and transparency. Assess role of type & typography to do in a design, importance of proof. (3 marks)

Module 2

► **Define or explain Typography. (3 marks)**

► **Define or explain Readability and legibility. (3 marks)**

► **Define or explain Proof reading. (3 marks)**

► **Define or explain Layout 3 Applying Text: Typography. Measurements used in typography. 4-line principle. Parts of letter or Type - stroke, arm, bracket, bowl, terminal, serif, hairline, count, stem, stress, and spine. Fonts - family, type size (point), type classification - Roman, Egyptian, sans serif, Script, Miscellaneous. Leading. Kerning. Legibility and readability: Factors affecting readability and legibility. Layout Preparation. Definition, Purpose and advantages of layout stages- miniature, rough, comprehensive and finished layout. Proof reading- definition, functions of a good proof reader, proof reading marks. Explain Various imposition schemes, and understand the format &. (3 marks)**

Module 3

► **Define or explain Imposition. (3 marks)**

► **Define or explain Book design. (3 marks)**

► **Define or explain Newspaper, and magazine design. (3 marks)**

► **Define or explain Design of stationary materials. (3 marks)**

Module 4

► **Define or explain Computer aided designing. (3 marks)**

► **Define or explain Proofing - types of proofs 3 Understanding Advertising Agency & medias of. (3 marks)**

► **Define or explain 3 Understanding advertising Designing of printed products using computers, working with software: In-design,**

Photoshop, Illustrator, Free design, Quark express, flash (for web), etc. Proofing- definition, importance, types-soft, hard, color proof, prepress proof, progressive proof, contract proof, Ok sheet. Advertising Agency Function of an advertising agency. Role of Accounts Executive, Visualizer or Art Director, & Copywriter, copy writing and its importance Outdoor and indoor medias. Text / Reference: T/R Book Title/Author T1 Printing Technology 5th edition , Adams J.M. R1 Hand book of print media, Helmut Kipphan, Springer Science & Business. PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Concept of Design for printing**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Typography**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Imposition**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram,

Module 4

1-mark definition: State the meaning of **Computer aided designing**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram,

table, procedure, example or application.

table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
