

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 3381

3 Credits: 3

Program Core

Source-grounded

Ethics in Artificial Intelligence

- Provide a comprehensive introduction to the ethics in artificial intelligence

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTR syllabus PDF for Course 3381 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 3381.pdf from the uploaded official SITTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Artificial Intelligence And Engineering
Course code	3381
Course title	Ethics in Artificial Intelligence
Semester	3 Credits: 3
Course category	Program Core
Periods per week	3 (L:3 T:0 P:0) Periods per semester: 45
Periods per semester	45
Credits	3
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

17 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- Provide a comprehensive introduction to the ethics in artificial intelligence

Course outcomes

CO	Official outcome	Study level
CO1	Outline the impact of AI 12 Understanding Recognise and address ethical issues in AI and 11 Understanding	See official syllabus
CO2	understand bias mitigation strategies Demonstrate the ability to address ethical concerns, 10 Understanding	See official syllabus
CO3	ensure transparency, and mitigate biases and harms associated with AI systems and datasets.	See official syllabus
CO4	Understand ethical challenges and opportunities in AI 10 Understanding	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 2 2
CO2	CO2 2 2
CO3	CO3 2 2
CO4	CO4 2 2

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Outline the impact of AI	6	As specified
Module 2	strategies	4	As specified
Module 3	and mitigate biases and harms associated with AI systems and datasets.	3	As specified
Module 4	Understand ethical challenges and opportunities in AI	4	As specified

MODULE 1

Outline the impact of AI

This module is presented from the official syllabus scope for Ethics in Artificial Intelligence. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Outline the impact of AI
- Official duration: As specified
- Official topic entries captured: 6
- The full source excerpt is preserved below for coverage checking.

▼ Define the morality and ethics in AI 2 Understanding.

Define the morality and ethics in AI 2 Understanding. is an official topic in Module 1 of Ethics in Artificial Intelligence. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Define the morality and ethics in AI 2 Understanding. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, define the morality and ethics in ai 2 understanding. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Define the morality and ethics in AI 2 Understanding. means in the official course context

Aspect	What to prepare
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- Define the morality and ethics in AI 2 Understanding. definition/meaning . steps, application . Technical terms English- .

▼ Outline the impact of AI on society 2 Understanding.

Outline the impact of AI on society 2 Understanding. is an official topic in Module 1 of Ethics in Artificial Intelligence. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Outline the impact of AI on society 2 Understanding. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, outline the impact of ai on society 2 understanding. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- Outline the impact of AI on society 2 Understanding. definition/meaning . steps, application . Technical terms English- .

▼ Outline the impact of AI on human psychology 2 Understanding.

Outline the impact of AI on human psychology 2 Understanding. is an official topic in Module 1 of Ethics in Artificial Intelligence. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Outline the impact of AI on human psychology 2 Understanding. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, outline the impact of ai on human psychology 2 understanding. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

▼ Outline the impact of AI on legal system 2 Understanding. Outline the impact of AI on environment & the

Outline the impact of AI on legal system 2 Understanding. Outline the impact of AI on environment & the is an official topic in Module 1 of Ethics in Artificial Intelligence. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Outline the impact of AI on legal system 2 Understanding. Outline the impact of AI on environment & the using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, outline the impact of ai on legal system 2 understanding. outline the impact of ai on environment & the should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Outline the impact of AI on legal system 2 Understanding. Outline the impact of AI on environment & the means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- Outline the impact of AI on legal system 2 Understanding. Outline the impact of AI on environment & the definition/meaning. Steps, application. Technical terms English- Malayalam.

▼ 2 Understanding planet

2 Understanding planet is an official topic in Module 1 of Ethics in Artificial Intelligence. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 2 Understanding planet using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 2 understanding planet should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-Identify challenges to government adoption of AI 2 Understanding Understand the role of datasets and mitigate 2 Understanding M3.05 associated harms. AI STANDARDS AND REGULATION Model Process for Addressing Ethical Concerns during System Design – Transparency of Autonomous Systems-Data Privacy Process- Algorithmic Bias Considerations, Ontological Standard for Ethically Driven Robotics and Automation Systems Challenges to Government Adoption of AI Datasets in different domains, Roles of datasets, harms associated with data, mitigating harms. definition/meaning . steps, application . Technical terms English-

► **Official syllabus detail and terminology (expand in digital version)**

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 4

Understand ethical challenges and opportunities in AI

This module is presented from the official syllabus scope for Ethics in Artificial Intelligence. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Understand ethical challenges and opportunities in AI
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

▼ 3 Remembering AI.

3 Remembering AI. is an official topic in Module 4 of Ethics in Artificial Intelligence. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 3 Remembering AI. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 3 remembering ai. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 3 Remembering AI. means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4- 3 Remembering AI. പദപരിച്ഛേദം, definition/meaning പദപരിച്ഛേദം. പദപരിച്ഛേദം, steps, application പദപരിച്ഛേദം പദപരിച്ഛേദം. Technical terms English- പദപരിച്ഛേദം പദപരിച്ഛേദം.

▼ Analyze societal implications of AI applications 3 Understanding Understand decision-making roles across

Analyze societal implications of AI applications 3 Understanding Understand decision-making roles across is an official topic in Module 4 of Ethics in Artificial Intelligence. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Analyze societal implications of AI applications 3 Understanding Understand decision-making roles across using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, analyze societal implications of ai applications 3 understanding understand decision-making roles across should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Analyze societal implications of AI applications 3 Understanding Understand decision-making roles across means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

▼ 2 Understanding industries in the context of AI. Understand national and international strategies

2 Understanding industries in the context of AI. Understand national and international strategies is an official topic in Module 4 of Ethics in Artificial Intelligence. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 2 Understanding industries in the context of AI. Understand national and international strategies using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 2 understanding industries in the context of ai. understand national and international strategies should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

The official PDF does not expose a separate activities heading in the extracted text; consult the source PDF pages for the exact activity list.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain Define the morality and ethics in AI 2 Understanding.. (3 marks)**

► **Define or explain Outline the impact of AI on society 2 Understanding.. (3 marks)**

► **Define or explain Outline the impact of AI on human psychology 2 Understanding.. (3 marks)**

► **Define or explain Outline the impact of AI on legal system 2 Understanding. Outline the impact of AI on environment & the. (3 marks)**

Module 2

► **Define or explain Understand International Ethical Initiatives. (3 marks)**

► **Define or explain Identify Ethical Harms and Concerns. (3 marks)**

► **Define or explain Analyze Bias in AI Systems. (3 marks)**

► **Define or explain Summarize Bias Mitigation Techniques 3 Understanding Ethical Initiatives: International ethical initiatives-Ethical**

harms and concerns-Case study: healthcare robots, Autonomous Vehicles Understanding and measuring Bias, Algorithms for Bias mitigation- Data Bias, Preprocessing, in-processing, post-processing algorithms Demonstrate the ability to address ethical concerns, ensure transparency,. (3 marks)

Module 3

► Define or explain Understand transparency in autonomous systems. 2 Understanding Understand the role of ontological standards in. (3 marks)

► Define or explain ethically driven robotics.. (3 marks)

► Define or explain Identify challenges to government adoption of AI 2 Understanding Understand the role of datasets and mitigate 2 Understanding M3.05 associated harms. AI STANDARDS AND REGULATION Model Process for Addressing Ethical Concerns during System Design - Transparency of Autonomous Systems-Data Privacy Process- Algorithmic Bias Considerations, Ontological Standard for Ethically Driven Robotics and Automation Systems Challenges to Government Adoption of AI Datasets in different domains, Roles of datasets, harms associated with data, mitigating harms.. (3 marks)

Module 4

► Define or explain 3 Remembering AI.. (3 marks)

► Define or explain Analyze societal implications of AI applications 3 Understanding Understand decision-making roles across. (3 marks)

► Define or explain 2 Understanding industries in the context of AI. Understand national and international strategies. (3 marks)

► **Define or explain 2 Understanding for governing AI. AI AND ETHICS- CHALLENGES AND OPPORTUNITIES Challenges - Opportunities- ethical issues in artificial intelligence- Societal Issues Concerning the Application of Artificial Intelligence in Medicine- decision-making role in industries-National and International Strategies on AI. Text / Reference**

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Define the morality and ethics in AI 2 Understanding..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Understand International Ethical Initiatives.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Understand transparency in autonomous systems. 2 Understanding Understand the role of ontological standards in.**

3-mark explanation: Explain one principle, process or comparison from

Module 4

1-mark definition: State the meaning of **3 Remembering AI..**

3-mark explanation: Explain one principle, process or comparison from this module.

this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
