

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 3461

3 Credits: 3

Program Core

Source-grounded

Industrial Safety Engineering

promoting safety.

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 3461 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 3461.pdf from the uploaded official SITTTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Fire Technology and Safety
Course code	3461
Course title	Industrial Safety Engineering
Semester	3 Credits: 3
Course category	Program Core
Periods per week	3 (L:2 T:1 P:0) Periods per semester: 45
Periods per semester	45
Credits	3
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

8 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES**Objectives, outcomes and mapping****Course objectives**

- promoting safety.

Course outcomes

CO	Official outcome	Study level
CO1	management and its application in industrial 12 Understanding safety. Analyze planning and safety strategies and their	See official syllabus
CO2	11 Applying impact on organizational behavior. Organize safety programs and direct the	See official syllabus
CO3	11 Understanding implementation of safety measures in industries. Apply safety education, training, and employee	See official syllabus
CO4	9 Understanding participation in safety promotion schemes.	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 3 2 3 2
CO2	CO2 3 3 2 2
CO3	CO3 3 3 2 3
CO4	CO4 3 3 3 2

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	accident prevention.	2	As specified
Module 2	influences safety management.	2	As specified
Module 3	environments.	2	As specified
Module 4	participation strategies in promoting safety.	2	As specified

MODULE 1**accident prevention.**

This module is presented from the official syllabus scope for Industrial Safety Engineering. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: accident prevention.
- Official duration: As specified
- Official topic entries captured: 2
- The full source excerpt is preserved below for coverage checking.

▼ 6 Understanding historical evolution. Explain safety management principles and

6 Understanding historical evolution. Explain safety management principles and is an official topic in Module 1 of Industrial Safety Engineering. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 6 Understanding historical evolution. Explain safety management principles and using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 6 understanding historical evolution. explain safety management principles and should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What 6 Understanding historical evolution. Explain safety management principles and means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-6 Understanding historical evolution. Explain safety management principles and definition/meaning. Steps, application. Technical terms English- Malayalam.

▼ 6 Understanding practices. Understand safety planning techniques and how human behavior

6 Understanding practices. Understand safety planning techniques and how human behavior is an official topic in Module 1 of Industrial Safety Engineering. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 6 Understanding practices. Understand safety planning techniques and how human behavior using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 6 understanding practices. understand safety planning techniques and how human behavior should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What 6 Understanding practices. Understand safety planning techniques and how human behavior means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- 6 Understanding practices. Understand safety planning techniques and how human behavior definition/meaning. , steps, application . Technical terms English- .

► Official syllabus detail and terminology (expand in digital version)

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 2**influences safety management.**

This module is presented from the official syllabus scope for Industrial Safety Engineering. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 2 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: influences safety management.
- Official duration: As specified
- Official topic entries captured: 2
- The full source excerpt is preserved below for coverage checking.

▼ Analyze safety planning methods and objectives. 5 Understanding Explain accident data analysis and remedial

Analyze safety planning methods and objectives. 5 Understanding Explain accident data analysis and remedial is an official topic in Module 2 of Industrial Safety Engineering. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Analyze safety planning methods and objectives. 5 Understanding Explain accident data analysis and remedial using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, analyze safety planning methods and objectives. 5 understanding explain accident data analysis and remedial should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Analyze safety planning methods and objectives. 5 Understanding Explain accident data analysis and remedial means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 2- Analyze safety planning methods and objectives. 5 Understanding Explain accident data analysis and remedial definition/meaning . . . , steps, application . Technical terms English- .

▼ measures. 6 Understanding Safety planning methods and objectives. Accident data analysis techniques and their role in creating remedial measures. Human behavior and its influence on safety. Motivation theories related to safety practices. Learn about organizing and directing safety programs within industrial

measures. 6 Understanding Safety planning methods and objectives. Accident data analysis techniques and their role in creating remedial measures. Human behavior and its influence on safety. Motivation theories related to safety practices. Learn about organizing and directing safety programs within industrial is an official topic in Module 2 of Industrial Safety Engineering. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify measures. 6 Understanding Safety planning methods and objectives. Accident data analysis techniques and their role in creating remedial measures. Human behavior and its influence on safety. Motivation theories related to safety practices. Learn about organizing and directing safety programs within industrial using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, measures. 6 understanding safety planning methods and objectives. accident data analysis techniques and their role in creating remedial measures. human behavior and its influence on safety. motivation theories related to safety practices. learn about organizing and directing safety programs within industrial should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain 6 Understanding historical evolution. Explain safety management principles and. (3 marks)**

► **Define or explain 6 Understanding practices. Understand safety planning techniques and how human behavior. (3 marks)**

Module 2

► **Define or explain Analyze safety planning methods and objectives. 5 Understanding Explain accident data analysis and remedial. (3 marks)**

► **Define or explain measures. 6 Understanding Safety planning methods and objectives. Accident data analysis techniques and their role in creating remedial measures. Human behavior and its influence on safety. Motivation theories related to safety practices. Learn about organizing and directing safety programs within industrial. (3 marks)**

Module 3

► **Define or explain implementing safety measures. 5 Understanding Understand the formation and functions of safety. (3 marks)**

► **Define or explain committees and departments. 6 Understanding Organizational structure for safety in industries. Formation and roles of safety committees. Functions and importance of safety departments**

within organizations Understand and apply safety education, training methods, and employee. (3 marks)

Module 4

► Define or explain safety training methods. 6 Understanding Explain methods of employee participation in. (3 marks)

► Define or explain safety programs. 3 Understanding Training methods for safety and assessing training needs. Designing effective safety education programs. Employee participation in safety measures and safety promotion. Safety incentive schemes and employee motivation in safety practices. Text / Reference: T/R Book Title/Author T1 Industrial Safety Management - R K Jain T2 Industrial Safety - P. K. Gupta R1 Introduction to Industrial Safety - H. K. Gupta R2 Industrial Safety Engineering - K. R. Prabhakaran Safety Management in Industry - James R. R3 Wetherbee Online Resources: Sl.No Website Link 1 <https://www.osha.gov/> 2 <https://www.niosh.gov/> 3 <https://www.safetyxchange.org/> 4 <https://nptel.ac.in/courses/116/105/116105081/>. (3 marks)

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **6 Understanding historical evolution. Explain safety management principles and.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Analyze safety planning methods and objectives. 5 Understanding Explain accident data analysis and remedial.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **implementing safety measures. 5 Understanding Understand the formation and functions of safety.**

Module 4

1-mark definition: State the meaning of **safety training methods. 6 Understanding Explain methods of employee participation in.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.
