

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 5062

5 Credits: 4

Program core

Source-grounded

Fashion Design & Apparel

□ To acquire knowledge on the process involved in Apparel manufacturing.

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 5062 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 5062.pdf from the uploaded official SITTTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Textile Technology
Course code	5062
Course title	Fashion Design & Apparel
Semester	5 Credits: 4
Course category	Program core
Periods per week	4 (L:3, T:1, P:0) Periods per semester: 60
Periods per semester	60
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

13 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- □ To acquire knowledge on the process involved in Apparel manufacturing.
- □ To Apply and creatively adapt knowledge and skills in fashion design and technology,

Course outcomes

CO	Official outcome	Study level
CO1	14 Applying patterning and grading of various garments Outline the process involved in Apparel	See official syllabus
CO2	manufacturing and Assess seams, stitches and 15 Applying tools required for clothing construction. Analyse fusing, pressing, packing, fabric	See official syllabus
CO3	14 Understanding inspection and garment defects.	See official syllabus
CO4	Outline on Fashion Designing. 15 Understanding	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 3
CO2	CO2 3
CO3	CO3 3
CO4	CO4 3

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Classify various garments and delineate patterning and grading of	3	As specified
Module 2	seams, stitches and the use of components and trims	3	As specified
Module 3	Analyse fusing, pressing, packing, fabric inspection and garment defects.	4	As specified
Module 4	Precise Fashion Designing.	3	As specified

MODULE 1

Classify various garments and delineate patterning and grading of

This module is presented from the official syllabus scope for Fashion Design & Apparel. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Classify various garments and delineate patterning and grading of
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ relate the selection of fabrics for various 5 Understanding garments Express the theory of human anatomy and

relate the selection of fabrics for various 5 Understanding garments
Express the theory of human anatomy and is an official topic in Module 1 of Fashion Design & Apparel. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify relate the selection of fabrics for various 5 Understanding garments Express the theory of human anatomy and using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, relate the selection of fabrics for various 5 understanding garments express the theory of human anatomy and should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What relate the selection of fabrics for various 5 Understanding garments Express the theory of human anatomy and means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- relate the selection of fabrics for various 5 Understanding garments Express the theory of human anatomy and definition/meaning . steps, application . Technical terms English- .

▼ Interpret the importance and taking body 5 Applying measurements Explain the importance of pattern drafting and

Interpret the importance and taking body 5 Applying measurements
Explain the importance of pattern drafting and is an official topic in Module 1 of Fashion Design & Apparel. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Interpret the importance and taking body 5 Applying measurements Explain the importance of pattern drafting and using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, interpret the importance and taking body 5 applying measurements explain the importance of pattern drafting and should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Interpret the importance and taking body 5 Applying measurements Explain the importance of pattern drafting and means in the official course context

▼ Familiarise the process of pressing apparels 3 Understanding Identify materials used and methods of packing

Familiarise the process of pressing apparels 3 Understanding Identify materials used and methods of packing is an official topic in Module 3 of Fashion Design & Apparel. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Familiarise the process of pressing apparels 3 Understanding Identify materials used and methods of packing using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, familiarise the process of pressing apparels 3 understanding identify materials used and methods of packing should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

▼ 3 Understanding readymade garments Summarise the defects and inspection methods

3 Understanding readymade garments Summarise the defects and inspection methods is an official topic in Module 3 of Fashion Design & Apparel. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 3 Understanding readymade garments Summarise the defects and inspection methods using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 3 understanding readymade garments summarise the defects and inspection methods should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 4

Precise Fashion Designing.

This module is presented from the official syllabus scope for Fashion Design & Apparel. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Precise Fashion Designing.
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ Rephrase the term fashion 5 Understanding Extend the requirements and principles

Rephrase the term fashion 5 Understanding Extend the requirements and principles is an official topic in Module 4 of Fashion Design & Apparel. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Rephrase the term fashion 5 Understanding Extend the requirements and principles using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, rephrase the term fashion 5 understanding extend the requirements and principles should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What Rephrase the term fashion 5 Understanding Extend the requirements and principles means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

▼ 5 Understanding of design Summarise e-marketing and importance of

5 Understanding of design Summarise e-marketing and importance of is an official topic in Module 4 of Fashion Design & Apparel. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 5 Understanding of design Summarise e-marketing and importance of using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 5 understanding of design summarise e-marketing and importance of should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL**Module-wise questions and answers**

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain relate the selection of fabrics for various 5 Understanding garments Express the theory of human anatomy and. (3 marks)**

► **Define or explain Interpret the importance and taking body 5 Applying measurements Explain the importance of pattern drafting and. (3 marks)**

► **Define or explain 4 Applying grading Structure of the Apparel Industry - Classify garments for men, women and children - selection of fabrics for various garments based on properties. Theory of Human Anatomy and its importance in apparel manufacturing. - 8 Head and 10 Head theory - Measurements and its importance - Body measurements for measuring, ladies, children's and men's garments. Pattern making - methods (Drafting & Draping) - Importance of paper patterns - types of paper patterns - Importance and principles of pattern drafting - pattern grading - Grading of various components of garments - Study of marker planning. Garment Construction Tools & Equipment - Measuring, Marking, Cutting, Pressing and General tools. Outline the process involved in Apparel manufacturing and Assess. (3 marks)**

Module 2

► **Define or explain 5 Applying layout in apparel manufacture. Identify the cutting machines used in apparel. (3 marks)**

► **Define or explain 5 Understanding manufacture Discuss the sewing machines used and restate. (3 marks)**

► **Define or explain 5 Understanding seams, stitches and trims.**
SPREADING: Objects - methods for spreading - various types of woven fabrics - types of lay - pattern lay out - Rules in pattern layout - methods for layout - layout for asymmetrical designs - Spreading
Machines - Manual its problems, semi - automatic and fully automatic - Economy of fabric in placing pattern - Rules for placement of pattern if the fabrics insufficient. **CUTTING:** Importance of fabric cutting - Methods of cutting - mechanism of straight knife, rotary, band knife and die cutters. Computer controlled cutting knives. **SEWING:** Classification of sewing machines, Brief study of Single Needle Lock Stitch sewing machine- Seams- seam types; Stitch - stitch types Selection of needles and threads for different types of garments. The use of components & trims - Labels, lining, Interlining.. (3 marks)

Module 3

► **Define or explain Gain knowledge on the process of fusing. (3 marks)**

► **Define or explain Familiarise the process of pressing apparels 3 Understanding Identify materials used and methods of packing. (3 marks)**

► **Define or explain 3 Understanding readymade garments Summarise the defects and inspection methods. (3 marks)**

► **Define or explain 4 Understanding used in apparel manufacture**
FUSING: Requirements and Process- Base cloth and resin coating system - Effect of temperature time and pressure in fusing **PRESSING:** the purpose of pressing and types of pressing, Pressing machineries - iron pressing, block or die pressing, buck pressing, form pressing, steam air finisher, steam tunnel - controls in pressing. **PACKING:**

materials used for packing - Classification of Packing - Stand up pack - Flat pack - Hanger pack - Dead man pack - its importance INSPECTION: Raw material inspection - various fabric inspection system-4 point system, 10 point system - fabric defects in woven & knitted fabric, Garment defects, Final Inspection - Inspection Acceptable Quality Level (AQL) systems.. (3 marks)

Module 4

► Define or explain Rephrase the term fashion 5 Understanding Extend the requirements and principles. (3 marks)

► Define or explain 5 Understanding of design Summarise e-marketing and importance of. (3 marks)

► Define or explain 5 Understanding CAD/CAM FASHION: Terms related to fashion - fashion, style, fad, & classic. Fashion life cycle, fashion garments vs basic garments. DESIGN: Definition, Types-structural design and decorative design - application of structural and decorative design in dresses; Elements of design - line shape, colour, size & Texture. Principles of Design in Apparels - Balance - formal and informal, Rhythm - through repetition, radiation and gradation, emphasis, harmony & proportion. Fashion market and marketing environment - introduction to fashion e-commerce, apparel and fashion e-business. Importance of CAD/CAM in the field of designing in apparel. (3 marks)

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **relate the selection of fabrics for various 5 Understanding garments Express the theory of human anatomy and.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **5 Applying layout in apparel manufacture. Identify the cutting machines used in apparel.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Gain knowledge on the process of fusing.**

3-mark explanation: Explain one principle, process or comparison from

Module 4

1-mark definition: State the meaning of **Rephrase the term fashion 5 Understanding Extend the requirements and principles.**

this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
