

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 5063C

5 Credits: 4

Program Elective

Source-grounded

Long staple spinning Technology

□ To enable the students to understand the method of yarn production from long staple

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 5063C is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 5063C.pdf from the uploaded official SITTTTR syllabus archive.

Course code and title: preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Textile Technology
Course code	5063C
Course title	Long staple spinning Technology
Semester	5 Credits: 4
Course category	Program Elective
Periods per week	4 (L:4, T:0, P:0) Periods per semester: 60
Periods per semester	60
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

16 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES**Objectives, outcomes and mapping****Course objectives**

- To enable the students to understand the method of yarn production from long staple
- fibres like wool and flax using long staple spinning technology.

Course outcomes

CO	Official outcome	Study level
CO1	15 Understanding carding of long staple fibers. Describe the principle and working of drawing	See official syllabus
CO2	10 Understanding machine suitable for long staple fibers Discuss the wool combing operation , worsted	See official syllabus
CO3	top finishing and roving formation process 18 Applying employed in Long staple spinning industry Illustrate the different methods of Long staple Yarn spinning and summarize the yarn	See official syllabus
CO4	15 Applying manufacturing process. Flow chart for long staple fibres.	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 3 2
CO2	CO2 3 2
CO3	CO3 3 2
CO4	CO4 3 2

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	fibers.	4	As specified
Module 2	staple fibers	4	As specified
Module 3	formation process employed in Long staple spinning industry	4	As specified
Module 4	summarize the yarn manufacturing process flow chart for long staple	4	As specified

MODULE 1**fibers.**

This module is presented from the official syllabus scope for Long staple spinning Technology. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: fibers.
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

▼ **the method of removing impurities in the 3 Remembering wool fibre.**
Discuss the methods adopted to process raw

the method of removing impurities in the 3 Remembering wool fibre.
Discuss the methods adopted to process raw is an official topic in Module 1 of Long staple spinning Technology. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify the method of removing impurities in the 3 Remembering wool fibre. Discuss the methods adopted to process raw using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, the method of removing impurities in the 3 remembering wool fibre. discuss the methods adopted to process raw should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What the method of removing impurities in the 3 Remembering wool fibre. Discuss the methods adopted to process raw means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-
the method of removing impurities in the 3 Remembering wool fibre. Discuss the methods adopted to process raw

▼ flax & jute and Automatic fibre blending 4 Understanding for the woollen system Describe the working principle of carding machine and details of different type of

flax & jute and Automatic fibre blending 4 Understanding for the woollen system Describe the working principle of carding machine and details of different type of is an official topic in Module 1 of Long staple spinning Technology. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify flax & jute and Automatic fibre blending 4 Understanding for the woollen system Describe the working principle of carding machine and details of different type of using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, flax & jute and automatic fibre blending 4 understanding for the woollen system describe the working principle of carding machine and details of different type of should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What flax & jute and Automatic fibre blending 4 Understanding for the woollen system Describe the working principle of carding machine and details of different type of means in the official course context
Study lens	Principle → components or stages → result → application

Twist insertion in roving frame - Flyer lead delivery - Operating principle of roving machine. Illustrate the different methods of Long staple Yarn spinning and using standard technical terminology.

- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 5 understanding machine. combing and roving frame objective of combing - basic principles of wool combing - the rectilinear wool comb preparatory processes - general features of a rectilinear wool comb - wool combing cycle of operations - worsted top finishing - finisher gilling and packaging - re - combing expressing yield and noil production in combing - tear ratio, romaine(%) and noil (%). twist insertion in roving frame - flyer lead delivery - operating principle of roving machine. illustrate the different methods of long staple yarn spinning and should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 5 Understanding machine. COMBING AND ROVING FRAME Objective of combing - basic principles of wool combing - The rectilinear wool comb Preparatory processes - General features of a rectilinear wool comb - wool combing cycle of operations - worsted top finishing - Finisher gilling and packaging - Re - combing Expressing yield and noil production in combing - Tear ratio, Romaine(%) and Noil (%). Twist insertion in roving frame - Flyer lead delivery - Operating principle of roving machine. Illustrate the different methods of Long staple Yarn spinning and means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-5 Understanding machine. COMBING AND ROVING FRAME Objective of combing - basic principles of wool combing - The rectilinear wool comb Preparatory processes - General features of a rectilinear wool comb - wool combing cycle of operations - worsted top finishing - Finisher gilling and packaging - Re - combing Expressing yield and noil production in combing - Tear ratio, Romaine(%) and Noil (%). Twist insertion in roving frame - Flyer lead delivery - Operating principle of roving machine. Illustrate the different methods of Long staple Yarn spinning and definition/meaning. steps, application. Technical terms English- Malayalam.

► Official syllabus detail and terminology (expand in digital version)

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 4

summarize the yarn manufacturing process flow chart for long staple

This module is presented from the official syllabus scope for Long staple spinning Technology. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: summarize the yarn manufacturing process flow chart for long staple
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

▼ wool ring frame and the working 3 Understanding mechanism of woolen Ring spinning frame Explain the working mechanism of Worsted

wool ring frame and the working 3 Understanding mechanism of woolen Ring spinning frame Explain the working mechanism of Worsted is an official topic in Module 4 of Long staple spinning Technology. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify wool ring frame and the working 3 Understanding mechanism of woolen Ring spinning frame Explain the working mechanism of Worsted using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, wool ring frame and the working 3 understanding mechanism of woolen ring spinning frame explain the working mechanism of worsted should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What wool ring frame and the working 3 Understanding mechanism of woolen Ring spinning frame Explain the working mechanism of Worsted means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4- wool ring frame and the working 3 Understanding mechanism of woolen Ring spinning frame Explain the working mechanism of Worsted definition/meaning . , steps, application . Technical terms English- .

▼ spinning frame and Semi worsted spinning 4 Understanding frame Describe the Rings and Traveler used for

spinning frame and Semi worsted spinning 4 Understanding frame
Describe the Rings and Traveler used for is an official topic in Module 4 of Long staple spinning Technology. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify spinning frame and Semi worsted spinning 4 Understanding frame Describe the Rings and Traveler used for using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, spinning frame and semi worsted spinning 4 understanding frame describe the rings and traveler used for should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What spinning frame and Semi worsted spinning 4 Understanding frame Describe the Rings and Traveler used for means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4- spinning frame and Semi worsted spinning 4 Understanding frame Describe the Rings and Traveler used for definition/meaning . steps, application . Technical terms English- .

▼ 4 Understanding woolen and flax spinning. Illustrate the working of Precision winder

4 Understanding woolen and flax spinning. Illustrate the working of Precision winder is an official topic in Module 4 of Long staple spinning Technology. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 4 Understanding woolen and flax spinning. Illustrate the working of Precision winder using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 4 understanding woolen and flax spinning. illustrate the working of precision winder should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL**Module-wise questions and answers**

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain the method of removing impurities in the 3 Remembering wool fibre. Discuss the methods adopted to process raw. (3 marks)**

► **Define or explain flax & jute and Automatic fibre blending 4 Understanding for the woollen system Describe the working principle of carding machine and details of different type of. (3 marks)**

► **Define or explain 4 carding machine-worsted carding, semi - Understanding worsted carding, woollen carding Illustrate the working of Flax carding and. (3 marks)**

► **Define or explain 4 Understanding jute carding. OPENING, CLEANING AND CARDING Introduction to long staple fibres - Raw wool processing - Impurities in the wool fibre and their removal - Wool opening and shaking - Wool scouring - Raw Flax Processing - Raw jute processing - Automatic fibre blending for the woollen system - Objectives of carding-working principle and details of different type of carding machine - worsted carding, semi - worsted carding, woollen carding, flax carding and jute carding Describe the principle and working of drawing machine suitable for long. (3 marks)**

Module 2

► **Define or explain 2 Remembering of long-staple drafting Explain the methods of fibre control in long. (3 marks)**

► **Define or explain 3 Understanding staple drafting zone Discuss the working of worsted, semi. (3 marks)**

► **Define or explain 2 Understanding worsted drawing Describe the working of jute and flax. (3 marks)**

► **Define or explain 3 Understanding drawing DRAWING PROCESS**
Objectives of Gilling process - preparative - Principle of long - staple drafting - fibre control in long staple drafting zone - Pin control, Ambler draft - sliver doubling - Description of worsted, semi worsted, jute and flax drawing - Applications of Autolevelling Discuss the wool combing operation , worsted top finishing and roving. (3 marks)

Module 3

► **Define or explain and the comber preparatory processes 4 Remembering involved. Describe the general features of a rectilinear. (3 marks)**

► **Define or explain wool combing machine and the wool 4 Understanding combing cycle sequence of operations Explain the principle of Twist insertion in. (3 marks)**

► **Define or explain roving frame and the concept of Flyer lead 5 Understanding delivery Illustrate the operating principle of roving. (3 marks)**

► **Define or explain 5 Understanding machine. COMBING AND ROVING FRAME Objective of combing - basic principles of wool combing - The rectilinear wool comb Preparatory processes - General features of a rectilinear wool comb - wool combing cycle of operations - worsted top**

finishing - Finisher gilling and packaging - Re - combing Expressing yield and noil production in combing - Tear ratio, Romaine(%) and Noil (%). Twist insertion in roving frame - Flyer lead delivery - Operating principle of roving machine. Illustrate the different methods of Long staple Yarn spinning and. (3 marks)

Module 4

► Define or explain wool ring frame and the working 3 Understanding mechanism of woollen Ring spinning frame Explain the working mechanism of Worsted. (3 marks)

► Define or explain spinning frame and Semi worsted spinning 4 Understanding frame Describe the Rings and Traveler used for. (3 marks)

► Define or explain 4 Understanding woollen and flax spinning. Illustrate the working of Precision winder. (3 marks)

► Define or explain and illustrate the Process flow chart for 4 Understanding manufacturing woollen, worsted, flax and jute YARN SPINNING AND WINDING Difference between woollen yarn and worsted yarn - Different input material fed to wool ring frame - working mechanism of woollen Ring spinning frame - Drafting and the false twist device - Worsted spinning frame - Semi worsted spinning frame - Double zone drafting system - Lubricated conical rings - J shaped travelers - Flax spinning Ring and Traveller - self - twist spinning system - Yarn winding - Precision winders Process flow chart for manufacturing woollen, worsted, flax and jute Text / Reference: T/R Book Title/Author T1 Oxtoby E., "Spun Yarn Technology", Butterworths, London, Richards RTD and Sykes A B," Woollen Yarn Manufacture", The Textile R2 Institute, Manchester 1994. PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **the method of removing impurities in the 3 Remembering wool fibre. Discuss the methods adopted to process raw.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **2 Remembering of long-staple drafting Explain the methods of fibre control in long.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **and the comber preparatory processes 4 Remembering involved. Describe the general features of a rectilinear.**

Module 4

1-mark definition: State the meaning of **wool ring frame and the working 3 Understanding mechanism of woolen Ring**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

spinning frame Explain the working mechanism of Worsted.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
