

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 5102

5 Credits: 4

Program Core

Source-grounded

Print Marketing Management.

□ To provide information about the concept of quality, and quality management.

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 5102 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 5102.pdf from the uploaded official SITTTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Printing Technology
Course code	5102
Course title	Print Marketing Management.
Semester	5 Credits: 4
Course category	Program Core
Periods per week	4 (L:3, T:1, P:0) Periods per semester: 60
Periods per semester	60
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

15 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES**Objectives, outcomes and mapping****Course objectives**

- □ To provide information about the concept of quality, and quality management.
- □ To provide information about a scientific system of costing and estimation.
- □ To provide information about marketing strategies to promote the product.
- □ To provide information about the laws governing firms.

Course outcomes

CO	Official outcome	Study level
CO1	Describe quality concept. 15 Understanding	See official syllabus
CO2	Perform Costing and estimation. 14 Applying Assess Marketing strategies and Trends in	See official syllabus
CO3	15 Understanding marketing. Explain planning for print production and acts	See official syllabus
CO4	14 Understanding related to printing industry.	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 2
CO2	CO2 3 3
CO3	CO3 2
CO4	CO4 2

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Describe quality concept.	3	As specified
Module 2	Perform Costing and estimation.	4	As specified
Module 3	Assess Marketing strategies and Trends in marketing.	5	As specified
Module 4	industry.	3	As specified

MODULE 1

Describe quality concept.

This module is presented from the official syllabus scope for Print Marketing Management.. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Describe quality concept.
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ Quality-Definition

Quality-Definition is an official topic in Module 1 of Print Marketing Management.. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Quality-Definition using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, quality-definition should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Quality-Definition means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-**Quality-Definition** **മനോരമ** **മനോരമ** definition/meaning **മനോരമ**. **മനോരമ** **മനോരമ** **മനോരമ**, steps, application **മനോരമ** **മനോരമ** **മനോരമ**. Technical terms English-**മനോരമ** **മനോരമ**.

▼ Concept of quality management

Concept of quality management is an official topic in Module 1 of Print Marketing Management.. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Concept of quality management using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, concept of quality management should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 2

Perform Costing and estimation.

This module is presented from the official syllabus scope for Print Marketing Management.. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 2 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Perform Costing and estimation.
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

▼ Estimation and Costing Definition.

Estimation and Costing Definition. is an official topic in Module 2 of Print Marketing Management.. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Estimation and Costing Definition. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, estimation and costing definition. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

application Technical terms English-

▼ Consumer Behavior.

Consumer Behavior. is an official topic in Module 3 of Print Marketing Management.. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Consumer Behavior. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, consumer behavior. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

MODULE 4**industry.**

This module is presented from the official syllabus scope for Print Marketing Management.. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: industry.
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ Planning for print production.

Planning for print production. is an official topic in Module 4 of Print Marketing Management.. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Planning for print production. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, planning for print production. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Planning for print production. means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4-പ്ലാനിംഗ് for print production.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain Quality-Definition. (3 marks)**

► **Define or explain Concept of quality management. (3 marks)**

► **Define or explain Quality management Techniques 5 Understanding Customer- defined Quality management-concept. Quality: definition, element. Quality: ISO definition. Standardization - ISO definition. Need of quality control. Advantages of quality control/standardization. Quality assessment methods - subjective (visual), objective, measured. How a customer determine the quality. Customer satisfaction. Factors of influence and specifications determining the quality of the offset print. Industry standards for quality - introduction to ISO (12647 - series, 2846 - series, 13655, 15930 - series, 12640 - series, 12642 & 166614 - introduction only, 19306, 16621 & 12636, 16620 & 12218. Quality/process standardization methods & techniques: Optimization. Lean printing - Lean manufacturing concept, definition, Advantages. Lean printing definition. Lean goals. 7 types of wastes in Lean. Lean tools - 5s, standardized work instructions, value stream mapping, Total proactive maintenance, Kaizen events, Just in time management, 5 whys, etc. Six Sigma - Six Sigma concept, definition, advantages. Six Sigma team. DMAIC & DMADV process (in detail). Practical case study of Lean printing and Six Sigma. Total Quality management (TQM). Application of Lean, Six sigma, TQM etc.. (3 marks)**

Module 2

► **Define or explain Estimation and Costing Definition.. (3 marks)**

► **Define or explain Cost classification.. (3 marks)**

► **Define or explain Role of estimator.. (3 marks)**

► **Define or explain Estimation-problems. 6 Applying Estimating And Costing-Definition, Advantages. Elements of cost-Material cost, Labor cost, Expenses. Nature of cost-Fixed, variable and semi variable. Components of cost- Prime cost, Overhead cost, Total Cost. Development of cost. Breakeven Chart. Estimation- Definition, Advantages. Difference between costing and estimating. Qualification and qualities of an Estimator. Estimation of paper- selection of paper, allowance for wastage, allowance for trimming, weight of loose sheets, weight of reel of paper. Estimation of ink- Ink consumption formula, ink allowance for spoilage. Estimating of binding material- board requirement, Estimating of covering materials, Estimating of sewing thread, Estimating of stitching wire, Estimation of adhesives.. (3 marks)**

Module 3

► **Define or explain Marketing Planning and Strategies.. (3 marks)**

► **Define or explain Market segmentation.. (3 marks)**

► **Define or explain Consumer Behavior.. (3 marks)**

► **Define or explain Services Marketing.. (3 marks)**

Module 4

► **Define or explain Planning for print production.. (3 marks)**

► Define or explain Press layouts.. (3 marks)

► Define or explain Acts related to Printing Industry. 5 Understanding Planning for print production: Production system administration. Work initiation procedures. Planning Consideration - Materials purchasing and inventory control, Material Management, Production Scheduling, Production Control, Quality Control. Press layouts- layout criteria, prepress, press and post press. Role Of Supervisor And Manager in Effective management. PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Quality-Definition**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Estimation and Costing Definition..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Marketing Planning and Strategies..**

3-mark explanation: Explain one principle, process or comparison from this module.

Module 4

1-mark definition: State the meaning of **Planning for print production..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
