

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 5103C

5 Credits: 4

Program Elective

Source-grounded

Screen Printing

□ To guide the student to the basic concepts of the screen printing

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 5103C is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 5103C.pdf from the uploaded official SITTTTR syllabus archive.

Course code and title: preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Printing Technology
Course code	5103C
Course title	Screen Printing
Semester	5 Credits: 4
Course category	Program Elective
Periods per week	4 (L:4, T:0, P:0) Periods per semester: 60
Periods per semester	60
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

19 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- □ To guide the student to the basic concepts of the screen printing
- □ To provide the exposure to the essentials of screen printing and to learn how it influences the real printing world.
- □ To understand the stencil concept to the printing process.
- □ To develop idea on most exciting possibilities of screen printing in the upcoming era.

Course outcomes

CO	Official outcome	Study level
CO1	benefits, applications and various materials 15 Understanding required to achieve the screen printing process. Explain about substrates and inks used in screen	See official syllabus
CO2	printing and various ink drying methods and 14 Understanding related facilities. Explain about on contact & off contact printing,	See official syllabus
CO3	specialized areas, image transfer and registration 15 Understanding techniques. Describe about various printing press	See official syllabus
CO4	14 Understanding classifications & configurations of screen-printing.	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 2
CO2	CO2 2
CO3	CO3 2

Row	Extracted official mapping
CO4	CO4 2

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	and various materials required to achieve the screen printing process.	7	As specified
Module 2	drying methods and related facilities.	4	As specified
Module 3	transfer and registration.	4	As specified
Module 4	screen-printing.	4	As specified

MODULE 1

and various materials required to achieve the screen printing process.

This module is presented from the official syllabus scope for Screen Printing. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: and various materials required to achieve the screen printing process.
- Official duration: As specified
- Official topic entries captured: 7
- The full source excerpt is preserved below for coverage checking.

▼ History of Screening Printing, 1 Understanding Merits, Demerits and applications of screen

History of Screening Printing, 1 Understanding Merits, Demerits and applications of screen is an official topic in Module 1 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify History of Screening Printing, 1 Understanding Merits, Demerits and applications of screen using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, history of screening printing, 1 understanding merits, demerits and applications of screen should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What History of Screening Printing, 1 Understanding Merits, Demerits and applications of screen means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-എന്നു History of Screening Printing, 1 Understanding Merits, Demerits and applications of screen എന്നർത്ഥം. എന്നർത്ഥം definition/meaning എന്നർത്ഥം. എന്നർത്ഥം steps, application എന്നർത്ഥം എന്നർത്ഥം. Technical terms English-ൽ എന്നർത്ഥം എന്നർത്ഥം.

▼ 1 Understanding printing. Screen printing materials- Screen, Frame,

1 Understanding printing. Screen printing materials- Screen, Frame, is an official topic in Module 1 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 1 Understanding printing. Screen printing materials- Screen, Frame, using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 1 understanding printing. screen printing materials- screen, frame, should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What 1 Understanding printing. Screen printing materials- Screen, Frame, means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- 1 Understanding printing. Screen printing materials- Screen, Frame, definition/meaning. steps, application. Technical terms English- .

▼ 3 Understanding Squeegee and Stencil. Screens – types, selection, stretching,

3 Understanding Squeegee and Stencil. Screens – types, selection, stretching, is an official topic in Module 1 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 3 Understanding Squeegee and Stencil. Screens – types, selection, stretching, using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 3 understanding squeegee and stencil. screens – types, selection, stretching, should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What 3 Understanding Squeegee and Stencil. Screens – types, selection, stretching, means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-3 Understanding Squeegee and Stencil. Screens – types, selection, stretching, പരസ്പരം പരസ്പരം പരസ്പരം definition/meaning പരസ്പരം പരസ്പരം പരസ്പരം. പരസ്പരം പരസ്പരം പരസ്പരം, steps, application പരസ്പരം പരസ്പരം പരസ്പരം. Technical terms English-പരസ്പരം പരസ്പരം പരസ്പരം.

▼ 3 Understanding preparation & reclamation. Trouble shooting clogged screens, Care and

3 Understanding preparation & reclamation. Trouble shooting clogged screens, Care and is an official topic in Module 1 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 3 Understanding preparation & reclamation. Trouble shooting clogged screens, Care and using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 3 understanding preparation & reclamation. trouble shooting clogged screens, care and should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

On contact printing, Off contact printing. Understanding is an official topic in Module 3 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify On contact printing, Off contact printing. Understanding using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, on contact printing, off contact printing. understanding should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What On contact printing, Off contact printing. Understanding means in the official course context

Aspect	What to prepare
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-□□ On contact printing, Off contact printing. Understanding □□□□□□□□□□ □□□□ definition/meaning □□□□□□□□□□. □□□□□ □□□□□ □□□□□□, steps, application □□□□□ □□□□□□□□ □□□□□. Technical terms English-□ □□□□□ □□□□□□□□□□.

▼ Specialized Areas of screen printing. 3 Understanding Image Transfer and Basic registration

Specialized Areas of screen printing. 3 Understanding Image Transfer and Basic registration is an official topic in Module 3 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Specialized Areas of screen printing. 3 Understanding Image Transfer and Basic registration using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, specialized areas of screen printing. 3 understanding image transfer and basic registration should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

► **Official syllabus detail and terminology (expand in digital version)**

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 4**screen-printing.**

This module is presented from the official syllabus scope for Screen Printing. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: screen-printing.
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

▼ Manual Printing Process

Manual Printing Process is an official topic in Module 4 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Manual Printing Process using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, manual printing process should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Manual Printing Process means in the official course context
Study lens	Principle → components or stages → result → application

Aspect	What to prepare
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4-എന്നു Manual Printing Process എന്നതിനെക്കുറിച്ച് definition/meaning എഴുതുക. എന്നതിന്റെ steps, application എന്നിവയെക്കുറിച്ച് എഴുതുക. Technical terms English-ൽ എഴുതുക.

▼ Semi automatic Screen Printing m/c.

Semi automatic Screen Printing m/c. is an official topic in Module 4 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Semi automatic Screen Printing m/c. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, semi automatic screen printing m/c. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Semi automatic Screen Printing m/c. means in the official course context

Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4- സെമി ഓട്ടോമേറ്റിക് സ്ക്രീൻ പ്രിന്റിംഗ് മ/ക. നിർവ്വചനം/അർത്ഥം, ഘട്ടങ്ങൾ, പ്രയോഗം എന്നിവയെക്കുറിച്ചുള്ള വിവരങ്ങൾ നൽകുക. Technical terms English-ൽ ഉൾപ്പെടുത്തുക.

▼ Automatic Screen Printing m/c

Automatic Screen Printing m/c is an official topic in Module 4 of Screen Printing. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Automatic Screen Printing m/c using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, automatic screen printing m/c should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain History of Screening Printing, 1 Understanding Merits, Demerits and applications of screen. (3 marks)**

► **Define or explain 1 Understanding printing. Screen printing materials- Screen, Frame,. (3 marks)**

► **Define or explain 3 Understanding Squeegee and Stencil. Screens - types, selection, stretching,. (3 marks)**

► **Define or explain 3 Understanding preparation & reclamation. Trouble shooting clogged screens, Care and. (3 marks)**

Module 2

► **Define or explain Screen-printing substrates. (3 marks)**

► **Define or explain Screen-printing inks. (3 marks)**

► **Define or explain Drying methods. (3 marks)**

► **Define or explain Drying Equipments 3 Understanding Screen-printing substrates: Features & properties of-Paper and Paper board, Wood, Textiles, Plastics, Metals, Ceramics and glass. Screen printing ink- Solvent based, Water based, Radiation Curable. Drying methods -**

Evaporation, Oxidation, Penetration, and Polymerization. Drying Equipment - Drying racks, wicket dryers, Jet dryers, Infrared dryers, Ultraviolet dryers. Flocking process. Explain about on contact & off contact printing, specialized areas, image. (3 marks)

Module 3

► **Define or explain On contact printing, Off contact printing. Understanding. (3 marks)**

► **Define or explain Specialized Areas of screen printing. 3 Understanding Image Transfer and Basic registration. (3 marks)**

► **Define or explain Understanding techniques. Method of halftone preparation for screen. (3 marks)**

► **Define or explain 4 Understanding printing. On contact printing, Off contact printing. Specialized Areas - Printed circuit boards of screen printing. Image Transfer and Basic registration techniques. Method of halftone preparation for screen printing. Describe about various printing press classifications & configurations of. (3 marks)**

Module 4

► **Define or explain Manual Printing Process. (3 marks)**

► **Define or explain Semi automatic Screen Printing m/c.. (3 marks)**

► **Define or explain Automatic Screen Printing m/c. (3 marks)**

► **Define or explain Screen Printing machines Configurations 3 Understanding Manual Printing Process, Semi automatic Screen Printing m/c. Automatic Screen Printing m/c. Screen Printing machines**

Configurations - Flat bed hinged frame, Flat bed vertical lift, Cylinder-bed presses, Container printing m/c, Rotary Screen Printing m/c, Carousel m/c. Special Machine configurations. (3 marks)

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **History of Screening Printing, 1 Understanding Merits, Demerits and applications of screen.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Screen-printing substrates.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **On contact printing, Off contact printing. Understanding.**

3-mark explanation: Explain one principle, process or comparison from

Module 4

1-mark definition: State the meaning of **Manual Printing Process.**

3-mark explanation: Explain one principle, process or comparison from this module.

this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
