

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 5181

5 Credits: 4

Program Core

Source-grounded

Town Planning

□ To explain the planning principles and urbanization

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 5181 is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 5181.pdf from the uploaded official SITTTTR syllabus archive. **Course code and title:** preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Architecture
Course code	5181
Course title	Town Planning
Semester	5 Credits: 4
Course category	Program Core
Periods per week	4 (L:3, T:1, P:0) Periods per semester: 60
Periods per semester	60
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

19 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES**Objectives, outcomes and mapping****Course objectives**

- □ To explain the planning principles and urbanization
- □ To describe urban roads, streets system, junctions and parks design.
- □ To discuss building rules /bye laws/CRZ rules
- □ To comprehend the necessity of housing, slum clearance and city planning

Course outcomes

CO	Official outcome	Study level
CO1	town planning concepts, urbanization and new 17 Understanding urbanism Discuss the importance of roads, streets,	See official syllabus
CO2	12 Applying junctions and parks	See official syllabus
CO3	Familiarize building rules /bye laws/CRZ rules 15 Understanding Identify the necessity of housing, slum	See official syllabus
CO4	14 Understanding clearance and city planning	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 3 2
CO2	CO2 3 3
CO3	CO3 3 2
CO4	CO4 3

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	zoning	4	As specified
Module 2	Discuss the importance of roads, streets, junctions and parks	6	As specified
Module 3	Familiarize building bye-laws /NBC/CRZ rules	5	As specified
Module 4	Identify the importance of housing, slum clearance and city planning	4	As specified

MODULE 1**zoning**

This module is presented from the official syllabus scope for Town Planning. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: zoning
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

▼ Describe the evolution of human settlements

Describe the evolution of human settlements is an official topic in Module 1 of Town Planning. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Describe the evolution of human settlements using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, describe the evolution of human settlements should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Describe the evolution of human settlements means in the official course context

Aspect	What to prepare
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- Describe the evolution of human settlements
 definition/meaning
 steps, application
 Technical terms English-

▼ Familiarize the town planning concepts 4 Understanding Discuss the Contributions of great town

Familiarize the town planning concepts 4 Understanding Discuss the Contributions of great town is an official topic in Module 1 of Town Planning. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Familiarize the town planning concepts 4 Understanding Discuss the Contributions of great town using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, familiarize the town planning concepts 4 understanding discuss the contributions of great town should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

▼ 5 Understanding planners

5 Understanding planners is an official topic in Module 1 of Town Planning. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 5 Understanding planners using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 5 understanding planners should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

MODULE 2

Discuss the importance of roads, streets, junctions and parks

This module is presented from the official syllabus scope for Town Planning. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 2 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Discuss the importance of roads, streets, junctions and parks
- Official duration: As specified
- Official topic entries captured: 6
- The full source excerpt is preserved below for coverage checking.

▼ 2 Understanding junctions Classify different types of urban roads, street

2 Understanding junctions Classify different types of urban roads, street is an official topic in Module 2 of Town Planning. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 2 Understanding junctions Classify different types of urban roads, street using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 2 understanding junctions classify different types of urban roads, street should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Definition/identity	What 4 Understanding submission to local bodies means in the official course context

Aspect	What to prepare
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

 .

▼ Discuss the importance of master plan

Discuss the importance of master plan is an official topic in Module 3 of Town Planning. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Discuss the importance of master plan using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, discuss the importance of master plan should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

MODULE 4

Identify the importance of housing, slum clearance and city planning

This module is presented from the official syllabus scope for Town Planning. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Identify the importance of housing, slum clearance and city planning
- Official duration: As specified
- Official topic entries captured: 4
- The full source excerpt is preserved below for coverage checking.

▼ 2 Understanding of houses

2 Understanding of houses is an official topic in Module 4 of Town Planning. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 2 Understanding of houses using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 2 understanding of houses should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain Describe the evolution of human settlements. (3 marks)**

► **Define or explain Familiarize the town planning concepts 4 Understanding Discuss the Contributions of great town. (3 marks)**

► **Define or explain 5 Understanding planners. (3 marks)**

► **Define or explain Explain urbanization and new urbanism 4 Understanding Origin and evolution of human settlements from pre - history - Human settlements as an expression of civilization - Town planning in ancient - Mesopotamia, Greece, Rome. Contribution of Ebenezer Howard, Clarence Stein and Patrick Geddes town planning. - Impact of urbanization on cities, urban environmental problems - Models of urban structure, CBD, nodes, peri-urban areas, ribbon development, Transit oriented development, Neighborhood design.. (3 marks)**

Module 2

► **Define or explain 2 Understanding junctions Classify different types of urban roads, street. (3 marks)**

► **Define or explain 2 Understanding system, traffic junctions Illustrate**

urban roads, street system, traffic. (3 marks)

► **Define or explain 2 Understanding junctions. (3 marks)**

► **Define or explain Discuss types of parking. (3 marks)**

Module 3

► **Define or explain Describe building bye-laws and NBC. (3 marks)**

► **Define or explain Compare building bye-laws and NBC 4 Understanding Familiarize drawings to be prepared for. (3 marks)**

► **Define or explain 4 Understanding submission to local bodies. (3 marks)**

► **Define or explain Discuss the importance of master plan. (3 marks)**

Module 4

► **Define or explain 2 Understanding of houses. (3 marks)**

► **Define or explain Discuss role of housing agencies 4 Understanding Discuss housing policies and programs in. (3 marks)**

► **Define or explain 2 Understanding India Explain planning of- Chandigarh, Delhi,. (3 marks)**

► **Define or explain 6 Understanding Gandhinagar and Amaravati. Importance of Housing - requirements of residential buildings - classification - design aspects - Housing agencies - Housing finance - HUDCO - Policies and programs in India - slum - causes characteristics - effects - slum clearance - prevention - Planning of - Chandigarh, Delhi,**

(3 marks)

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Describe the evolution of human settlements**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **2 Understanding junctions Classify different types of urban roads, street**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Describe building bye-laws and NBC**.

3-mark explanation: Explain one principle, process or comparison from this module.

Module 4

1-mark definition: State the meaning of **2 Understanding of houses**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
