

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 6143B

6 Credits: 4

Open Elective

Source-grounded

Project Planning and Development

□ To impart basic knowledge in project management and sources of funds to finance a

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 6143B is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 6143B.pdf from the uploaded official SITTTTR syllabus archive.

Course code and title: preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Commercial Practice
Course code	6143B
Course title	Project Planning and Development
Semester	6 Credits: 4
Course category	Open Elective
Periods per week	4 (L:3, T:1, P:0) Periods per semester: 60
Periods per semester	60
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

20 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- To impart basic knowledge in project management and sources of funds to finance a
- To familiarize the student with project appraisal techniques in determining the
- viability of a project.

Course outcomes

CO	Official outcome	Study level
CO1	10 Applying management. Identify the techniques for determining the	See official syllabus

CO4	CO4 3 3

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	Make use of the basic concepts of project management.	6	As specified
Module 2	Identify the techniques for determining the feasibility of a project.	4	As specified
Module 3	Identify the sources of finance for funding a project.	5	As specified
Module 4	Apply project appraisal techniques to determine the viability of a project.	5	As specified

MODULE 1

Make use of the basic concepts of project management.

This module is presented from the official syllabus scope for Project Planning and Development. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Make use of the basic concepts of project management.
- Official duration: As specified
- Official topic entries captured: 6
- The full source excerpt is preserved below for coverage checking.

▼ State the meaning of project management. 2 Understanding.

State the meaning of project management. 2 Understanding. is an official topic in Module 1 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify State the meaning of project management. 2 Understanding. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, state the meaning of project management. 2 understanding. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What State the meaning of project management. 2 Understanding. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- State the meaning of project management. 2 Understanding. definition/meaning. , steps, application . Technical terms English- .

▼ Interpret the classification of project.

Interpret the classification of project. is an official topic in Module 1 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Interpret the classification of project. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, interpret the classification of project. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Malayalam support: Module 3- 2 Understanding working capital requirement. ഓരോന്നിനും നിർവ്വചനം/അർത്ഥം നൽകുക. ഓരോന്നിനും ഓരോന്നിനും, steps, application നൽകുക. Technical terms English-ൽ നൽകുക.

▼ List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term

List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term is an official topic in Module 3 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, list the various sources of finance. 1 understanding identify the sources of long-term, medium term should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3- List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term definition/meaning . steps, application . Technical terms English- .

▼ **3 Applying and short-term finance. Project financing: Classification of capital - Fixed capital and Working capital - Factors governing fixed capital and working capital requirements - Sources or means of finance - Sources of long-term fund, Short term fund and Medium-term fund.**

3 Applying and short-term finance. Project financing: Classification of capital - Fixed capital and Working capital - Factors governing fixed capital and working capital requirements - Sources or means of finance - Sources of long-term fund, Short term fund and Medium-term fund. is an official topic in Module 3 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 3 Applying and short-term finance. Project financing: Classification of capital - Fixed capital and Working capital - Factors governing fixed capital and working capital requirements - Sources or means of finance - Sources of long-term fund, Short term fund and Medium-term fund. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 3 applying and short-term finance. project financing: classification of capital - fixed capital and working capital - factors governing fixed capital and working capital requirements - sources or means of finance - sources of long-term fund, short term fund and medium-term fund. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

MODULE 4

Apply project appraisal techniques to determine the viability of a project.

This module is presented from the official syllabus scope for Project Planning and Development. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Apply project appraisal techniques to determine the viability of a project.
- Official duration: As specified
- Official topic entries captured: 5
- The full source excerpt is preserved below for coverage checking.

▼ Recall project appraisal. 3 Understanding Solve problems using traditional/ non-

Recall project appraisal. 3 Understanding Solve problems using traditional/ non- is an official topic in Module 4 of Project Planning and Development. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Recall project appraisal. 3 Understanding Solve problems using traditional/ non- using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, recall project appraisal. 3 understanding solve problems using traditional/ non- should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain State the meaning of project management. 2 Understanding.. (3 marks)**

► **Define or explain Interpret the classification of project.. (3 marks)**

► **Define or explain Identify project life cycle.. (3 marks)**

► **Define or explain Explain the phases of project management.. (3 marks)**

Module 2

► **Define or explain 3 Understanding formulation.. (3 marks)**

► **Define or explain Summarize the elements of project formulation. 5 Understanding Compare Critical Path Method (CPM) and. (3 marks)**

► **Define or explain Programme Evaluation Review Technique 7 Understanding (PERT). Explain Financial analysis and identify its. (3 marks)**

► **Define or explain 4 Applying techniques. Project formulation: Meaning - Need - Elements of project formulation - Feasibility analysis - Techno - economic analysis - Project design and network Analysis - Critical Path**

Method (CPM) and Programme Evaluation Review Technique (PERT) - Input analysis - Financial Analysis - Fund flow analysis, Cash flow analysis, Ratio analysis - Social cost benefit analysis - Pre-investment appraisal. (3 marks)

Module 3

► **Define or explain Outline project financing.. (3 marks)**

► **Define or explain Recall classification of capital. 2 Understanding Explain the factors determining fixed and. (3 marks)**

► **Define or explain 2 Understanding working capital requirement.. (3 marks)**

► **Define or explain List the various sources of finance. 1 Understanding Identify the sources of long-term, medium term. (3 marks)**

Module 4

► **Define or explain Recall project appraisal. 3 Understanding Solve problems using traditional/ non-. (3 marks)**

► **Define or explain 5 Applying discounting methods. Solve problems using modern/ discounting. (3 marks)**

► **Define or explain 5 Applying methods.. (3 marks)**

► **Define or explain Explain project evaluation.. (3 marks)**

PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **State the meaning of project management. 2 Understanding..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **3 Understanding formulation..**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **Outline project financing..**

3-mark explanation: Explain one principle, process or comparison from this module.

Module 4

1-mark definition: State the meaning of **Recall project appraisal. 3 Understanding Solve problems using traditional/ non-.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION

Exam checklist

Before writing

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
