

KERALA DIPLOMA CURRICULUM REVISION 2026

Course 6143C

6 Credits: 4

Open Elective

Source-grounded

Engineering Economics &

□ To acquire knowledge of basic economics to facilitate the process of economic

OFFICIAL SOURCE DECLARATION

How this lesson was prepared

The supplied official SITTTTR syllabus PDF for Course 6143C is the authoritative source for course information, objectives, course outcomes, CO-PO mapping, modules, topics, activities, assessment structure and references. Explanations, study prompts and Malayalam support are educational elaboration and are not presented as additional official syllabus text.

Source file: 6143C.pdf from the uploaded official SITTTTR syllabus archive.

Course code and title: preserved from the source.

COURSE DASHBOARD

Official course information

Course information

Item	Official information
Programme	Diploma in Commercial Practice
Course code	6143C
Course title	Engineering Economics &
Semester	6 Credits: 4
Course category	Open Elective
Periods per week	4 (L:3, T:1, P:0) Periods per semester: 60
Periods per semester	60
Credits	4
Prerequisite	See the official syllabus PDF
Assessment	Use the official assessment section reproduced below

Modules

4 official module sections detected.

Topic entries

11 source-aligned topic entries retained.

Study mode

Theory and application emphasis.

STUDY METHOD**How to use this lesson****First pass**

Read the official source declaration, dashboard and module transcript. Mark unfamiliar terms without changing the official terminology.

Second pass

Use each topic card to build a definition, principle, steps or components, application and exam answer. Attempt the Q&A before opening the answers.

Practical evidence

Where the course is laboratory or workshop based, maintain an observation notebook with procedure, instruments, readings, safety points and conclusion.

Revision pass

Return to the source excerpt, coverage table, activities and model paper. The generated paper is practice material, not an official examination paper.

LEARNING OUTCOMES

Objectives, outcomes and mapping

Course objectives

- □ To acquire knowledge of basic economics to facilitate the process of economic decision-making.
- □ To acquire knowledge on basic financial management aspects.
- □ To develop the basic skills to analyse financial statements.

Course outcomes

CO	Official outcome	Study level
CO1	12 business and its impact on enterprise. Interpret demand forecasting for managerial Applying	See official syllabus
CO2	14 decision making. Apply cost elements of the product and its effect Applying	See official syllabus
CO3	16 on decision making. Utilize the concepts of financial management and Applying	See official syllabus
CO4	16 investment.	See official syllabus

CO-PO mapping evidence

Row	Extracted official mapping
CO1	CO1 2
CO2	CO2 2 3
CO3	CO3 3
CO4	CO4 3 2

COVERAGE AUDIT

Complete syllabus coverage

Every detected official module is represented below. Each module contains topic cards and an expandable official syllabus transcript to preserve source terminology.

Module coverage

Module	Official heading	Topic entries	Hours
Module 1	on enterprise.	2	As specified
Module 2	Interpret demand forecasting for managerial decision making.	3	As specified
Module 3	Apply cost elements of the product and its effect on decision making.	3	As specified
Module 4	Utilize the concepts of financial management and investment.	3	As specified

MODULE 1**on enterprise.**

This module is presented from the official syllabus scope for Engineering Economics &. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 1 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: on enterprise.
- Official duration: As specified
- Official topic entries captured: 2
- The full source excerpt is preserved below for coverage checking.

▼ Meaning, Definition of Managerial Economics. 1 Understanding. Describe Relationship with other disciplines,

Meaning, Definition of Managerial Economics. 1 Understanding. Describe Relationship with other disciplines, is an official topic in Module 1 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Meaning, Definition of Managerial Economics. 1 Understanding. Describe Relationship with other disciplines, using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, meaning, definition of managerial economics. 1 understanding. describe relationship with other disciplines, should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Meaning, Definition of Managerial Economics. 1 Understanding. Describe Relationship with other disciplines, means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1-എന്നർത്ഥം, Definition of Managerial Economics. 1 Understanding. Describe Relationship with other disciplines, എന്നർത്ഥം definition/meaning എന്നർത്ഥം. എന്നർത്ഥം എന്നർത്ഥം എന്നർത്ഥം, steps, application എന്നർത്ഥം എന്നർത്ഥം എന്നർത്ഥം. Technical terms English-എന്നർത്ഥം എന്നർത്ഥം എന്നർത്ഥം.

▼ 11 Understanding. Managerial Decisions Firms and its types. Meaning and definition of Managerial Economics - Relationship with Statistics, Mathematics, Operations research, Accounting - Firms and its types - Objectives and goals - Managerial decisions.

11 Understanding. Managerial Decisions Firms and its types. Meaning and definition of Managerial Economics - Relationship with Statistics, Mathematics, Operations research, Accounting - Firms and its types - Objectives and goals - Managerial decisions. is an official topic in Module 1 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 11 Understanding. Managerial Decisions Firms and its types. Meaning and definition of Managerial Economics - Relationship with Statistics, Mathematics, Operations research, Accounting - Firms and its types - Objectives and goals - Managerial decisions. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 11 understanding. managerial decisions firms and its types. meaning and definition of managerial economics - relationship with statistics, mathematics, operations research, accounting - firms and its types - objectives and goals - managerial decisions. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 11 Understanding. Managerial Decisions Firms and its types. Meaning and definition of Managerial Economics - Relationship with Statistics, Mathematics, Operations research, Accounting - Firms and its types - Objectives and goals - Managerial decisions. means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 1- 11 Understanding. Managerial Decisions Firms and its types. Meaning and definition of Managerial Economics - Relationship with Statistics, Mathematics, Operations research, Accounting - Firms and its types - Objectives and goals - Managerial decisions.
 ഫോർമൽ ഡിഫിനിഷൻ/മിനിമൽ ഡിഫിനിഷൻ. ഫോർമൽ ഡിഫിനിഷൻ, steps, application ഫോർമൽ ഡിഫിനിഷൻ ഫോർമൽ. Technical terms English-ൽ ഫോർമൽ ഡിഫിനിഷൻ.

► **Official syllabus detail and terminology (expand in digital version)**

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 2

Interpret demand forecasting for managerial decision making.

This module is presented from the official syllabus scope for Engineering Economics &. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 2 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Interpret demand forecasting for managerial decision making.
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ Meaning of demand and Types of Demand. 2 Understanding Describe determinants of demand, demand

Meaning of demand and Types of Demand. 2 Understanding Describe determinants of demand, demand is an official topic in Module 2 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify Meaning of demand and Types of Demand. 2 Understanding Describe determinants of demand, demand using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, meaning of demand and types of demand. 2 understanding describe determinants of demand, demand should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What Meaning of demand and Types of Demand. 2 Understanding Describe determinants of demand, demand means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 2-എന്നർത്ഥം Demand. 2 Understanding Describe determinants of demand, demand എന്നർത്ഥം definition/meaning എന്നർത്ഥം. എന്നർത്ഥം എന്നർത്ഥം എന്നർത്ഥം, steps, application എന്നർത്ഥം എന്നർത്ഥം എന്നർത്ഥം. Technical terms English-ൽ എന്നർത്ഥം എന്നർത്ഥം എന്നർത്ഥം.

▼ 6 Understanding function, Demand elasticity, Demand forecasting. Identify Supply, Determinants of supply, Supply

6 Understanding function, Demand elasticity, Demand forecasting. Identify Supply, Determinants of supply, Supply is an official topic in Module 2 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 6 Understanding function, Demand elasticity, Demand forecasting. Identify Supply, Determinants of supply, Supply using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 6 understanding function, demand elasticity, demand forecasting. identify supply, determinants of supply, supply should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 6 Understanding function, Demand elasticity, Demand forecasting. Identify Supply, Determinants of supply, Supply means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 2- 6 Understanding function, Demand elasticity, Demand forecasting. Identify Supply, Determinants of supply, Supply definition/meaning. Steps, application. Technical terms English- Malayalam.

▼ 6 Applying function, supply Elasticity. Meaning of Demand - Types of demand - determinants of demand - Demand Function - Demand Elasticity - Demand forecasting - supply - Determinants of supply - Supply Function - Supply elasticity.

6 Applying function, supply Elasticity. Meaning of Demand - Types of demand - determinants of demand - Demand Function - Demand Elasticity - Demand forecasting - supply - Determinants of supply - Supply Function - Supply elasticity. is an official topic in Module 2 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 6 Applying function, supply Elasticity. Meaning of Demand - Types of demand - determinants of demand - Demand Function - Demand Elasticity - Demand forecasting - supply - Determinants of supply - Supply Function - Supply elasticity. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 6 applying function, supply elasticity. meaning of demand - types of demand - determinants of demand - demand function -

demand elasticity - demand forecasting - supply - determinants of supply - supply function - supply elasticity. should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 6 Applying function, supply Elasticity. Meaning of Demand - Types of demand - determinants of demand - Demand Function - Demand Elasticity - Demand forecasting - supply - Determinants of supply - Supply Function - Supply elasticity. means in the official course context

Malayalam support: Module 2- 6 Applying function, supply Elasticity. Meaning of Demand - Types of demand - determinants of demand - Demand Function - Demand Elasticity - Demand forecasting - supply - Determinants of supply - Supply Function - Supply elasticity. ഓരോന്നിനും നിർവ്വചനം/അർത്ഥം നൽകുക. ഓരോന്നിനും ഓരോന്നിനും, steps, application നൽകുക. Technical terms English-ൽ നൽകുക.

► **Official syllabus detail and terminology (expand in digital version)**

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

MODULE 3

Apply cost elements of the product and its effect on decision making.

This module is presented from the official syllabus scope for Engineering Economics &. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 3 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Apply cost elements of the product and its effect on decision making.
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ 4 Understanding Production optimization. Develop managerial uses of production function,

4 Understanding Production optimization. Develop managerial uses of production function, is an official topic in Module 3 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 4 Understanding Production optimization. Develop managerial uses of production function, using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 4 understanding production optimization. develop managerial uses of production function, should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What 4 Understanding Production optimization. Develop managerial uses of production function, means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3-4 Understanding Production optimization. Develop managerial uses of production function, definition/meaning. Steps, application. Technical terms English- Malayalam.

▼ cost concepts, cost function, types of cost, 6 Applying determinants of cost. Describe short run and long run cost curves, cost

cost concepts, cost function, types of cost, 6 Applying determinants of cost. Describe short run and long run cost curves, cost is an official topic in Module 3 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify cost concepts, cost function, types of cost, 6 Applying determinants of cost. Describe short run and long run cost curves, cost using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, cost concepts, cost function, types of cost, 6 applying determinants of cost. describe short run and long run cost curves, cost should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What cost concepts, cost function, types of cost, 6 Applying determinants of cost. Describe short run and long run cost curves, cost means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 3- cost concepts, cost function, types of cost, 6 Applying determinants of cost. Describe short run and long run cost curves, cost definition/meaning. steps, application. Technical terms English-.

▼ 6 Understanding output decision, estimation of cost. Production Function - Returns to scale - Production Optimization - Managerial uses of production function - Cost Concepts - Cost Function - Types of cost - determinants of cost - Short run and long run cost curves - Cost output Decision - Estimation of cost.

6 Understanding output decision, estimation of cost. Production Function - Returns to scale - Production Optimization - Managerial uses of production function - Cost Concepts - Cost Function - Types of cost - determinants of cost - Short run and long run cost curves - Cost output Decision - Estimation of cost. is an official topic in Module 3 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 6 Understanding output decision, estimation of cost. Production Function - Returns to scale - Production Optimization - Managerial uses of production function - Cost Concepts - Cost Function - Types of cost - determinants of cost - Short run and long run cost curves - Cost output Decision - Estimation of cost. using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

application ഏകദേശം ഏകദേശമായി ഏകദേശം. Technical terms English-ഏകദേശം
ഏകദേശമായി.

► **Official syllabus detail and terminology (expand in digital version)**

MODULE 4

Utilize the concepts of financial management and investment.

This module is presented from the official syllabus scope for Engineering Economics &. Use the topic cards for learning and the source transcript for exact coverage.

As specified
official hours

CO-linked
see outcomes

Learning goals

- Explain the official Module 4 scope and its relationship to the course outcomes.
- Recognise the terminology, sequence, components and evidence expected in examination answers.
- Connect at least one official topic to a practical, industrial, laboratory or design context.

Key facts

- Official module title: Utilize the concepts of financial management and investment.
- Official duration: As specified
- Official topic entries captured: 3
- The full source excerpt is preserved below for coverage checking.

▼ 3 Understanding and related concepts. Analyze and interpret comparative financial

3 Understanding and related concepts. Analyze and interpret comparative financial is an official topic in Module 4 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 3 Understanding and related concepts. Analyze and interpret comparative financial using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 3 understanding and related concepts. analyze and interpret comparative financial should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
--------	-----------------

Aspect	What to prepare
Definition/identity	What 3 Understanding and related concepts. Analyze and interpret comparative financial means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4- 3 Understanding and related concepts. Analyze and interpret comparative financial definition/meaning. definition/meaning. definition/meaning, steps, application. Technical terms English- definition/meaning.

▼ 6 Applying statements. Evaluate investment decision, risk and return evaluation of investment decision, average rate of

6 Applying statements. Evaluate investment decision, risk and return evaluation of investment decision, average rate of is an official topic in Module 4 of Engineering Economics &. Study the terminology first, then connect the stated purpose, sequence, components or application to the wider course outcome.

Concept and explanation

To learn this topic effectively, identify what the system, process, material, method or concept is; state its governing idea; describe the important parts or stages; and explain what changes when operating conditions change. The official source wording is retained in the module transcript so that examination answers remain aligned with the syllabus.

Study points

- Define or identify 6 Applying statements. Evaluate investment decision, risk and return evaluation of investment decision, average rate of using standard technical terminology.
- Arrange the important components, steps or characteristics in a logical sequence.
- Relate the topic to one laboratory, industrial, professional or design situation where appropriate.
- Use a labelled sketch, comparison table, formula or procedure when the question requires it.

Engineering or professional relevance

In Polytechnic practice, 6 applying statements. evaluate investment decision, risk and return evaluation of investment decision, average rate of should be discussed with attention to safe operation, correct terminology, observable evidence and the relationship between input, process and result.

Topic study guide

Aspect	What to prepare
Definition/identity	What 6 Applying statements. Evaluate investment decision, risk and return evaluation of investment decision, average rate of means in the official course context
Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4-6 Applying statements. Evaluate investment decision, risk and return evaluation of investment decision, average rate of $\frac{\text{change in value}}{\text{change in time}}$ definition/meaning $\frac{\text{change in value}}{\text{change in time}}$. $\frac{\text{change in value}}{\text{change in time}}$ $\frac{\text{change in value}}{\text{change in time}}$, steps, application $\frac{\text{change in value}}{\text{change in time}}$ $\frac{\text{change in value}}{\text{change in time}}$. Technical terms English- $\frac{\text{change in value}}{\text{change in time}}$ $\frac{\text{change in value}}{\text{change in time}}$.

▼ **7 Analyzing return, payback period, net present value, internal rate of return. Study lens	Principle → components or stages → result → application
Exam evidence	Definition, labelled explanation, comparison, procedure or example as appropriate

Exam tip: Begin with the exact term, then give an organised explanation with a diagram, table, procedure or example whenever the topic naturally supports it.

Common mistakes: Writing a memorised phrase without explaining the principle; omitting units, labels, conditions or sequence; or mixing this topic with a related but different term.

Malayalam support: Module 4-7 Analyzing return, payback period, net present value, internal rate of return. Balance Sheet, Profit & Loss related concepts- Analysis and interpretation of financial statements, Investment Decision - Risk and return evaluation of investment decision - Average rate of return - Payback Period - Net present value - Internal rate of return - Simple Problems. ► **Official syllabus detail and terminology (expand in digital version)**

Module study routine: Read the source wording, make a one-page concept map, practise one short answer and one structured answer, then review the Malayalam support notes.

RAPID REFERENCE**Concept and formula bank****Answer structure**

Definition → Principle →
Components/steps →
Application → Conclusion

Use this sequence for descriptive questions when the topic does not require a numerical formula.

Practical record

Aim → Apparatus → Procedure
→ Observation → Result →
Safety

Use this sequence for laboratory, workshop and field activities.

RAPID REVISION**Diagram and source-transcript library****Module 1 source and topic cards**

Jump to official terminology, topic explanations and study guidance.

Module 2 source and topic cards

Jump to official terminology, topic explanations and study guidance.

Module 3 source and topic cards

Jump to official terminology, topic explanations and study guidance.

Module 4 source and topic cards

Jump to official terminology, topic explanations and study guidance.

OFFICIAL SELF-LEARNING**Activities from the syllabus**

Use the extracted official activity wording as the record of required self-learning work.

The official PDF does not expose a separate activities heading in the extracted text; consult the source PDF pages for the exact activity list.

EXAMINATION PREPARATION

Assessment methodology

The following source extract preserves the assessment information detected in the official PDF. Verify mark conversions and institutional updates against the current source before an examination.

The official assessment structure is reproduced from the supplied PDF.

Practice-paper notice: The model paper below is generated for revision and is not an official examination paper.

ACTIVE RECALL

Module-wise questions and answers

These are practice questions based on official topic coverage, not official examination questions.

Module 1

► **Define or explain Meaning, Definition of Managerial Economics. 1 Understanding. Describe Relationship with other disciplines,. (3 marks)**

► **Define or explain 11 Understanding. Managerial Decisions Firms and its types. Meaning and definition of Managerial Economics - Relationship with Statistics, Mathematics, Operations research, Accounting - Firms and its types - Objectives and goals - Managerial decisions.. (3 marks)**

Module 2

► **Define or explain Meaning of demand and Types of Demand. 2 Understanding Describe determinants of demand, demand. (3 marks)**

► **Define or explain 6 Understanding function, Demand elasticity, Demand forecasting. Identify Supply, Determinants of supply, Supply. (3 marks)**

► **Define or explain 6 Applying function, supply Elasticity. Meaning of Demand - Types of demand - determinants of demand - Demand Function - Demand Elasticity - Demand forecasting - supply - Determinants of supply - Supply Function - Supply elasticity.. (3 marks)**

Module 3

► **Define or explain 4 Understanding Production optimization. Develop managerial uses of production function,. (3 marks)**

► **Define or explain cost concepts, cost function, types of cost, 6 Applying determinants of cost. Describe short run and long run cost curves, cost. (3 marks)**

► **Define or explain 6 Understanding output decision, estimation of cost. Production Function - Returns to scale - Production Optimization - Managerial uses of production function - Cost Concepts - Cost Function - Types of cost - determinants of cost - Short run and long run cost curves - Cost output Decision - Estimation of cost.. (3 marks)**

Module 4

► **Define or explain 3 Understanding and related concepts. Analyze and interpret comparative financial. (3 marks)**

► **Define or explain 6 Applying statements. Evaluate investment decision, risk and return evaluation of investment decision, average rate of. (3 marks)**

► **Define or explain 7 Analyzing return, payback period, net present value, internal rate of return. Balance Sheet, Profit & Loss related concepts- Analysis and interpretation of financial statements, Investment Decision - Risk and return evaluation of investment decision - Average rate of return - Payback Period - Net present value - Internal rate of return - Simple Problems. Text/Reference: T/R Book Title/Author Premvir Kapoor. Sociology & Economics for Engineers. Khanna Publishing T1 House, New Delhi, 2018. McGuigan, Moyer and Harris. PRACTICE ONLY

Practice Model Paper — Not an Official Examination Paper

Attempt one short definition, one structured explanation and one long answer from every module. Use the official assessment pattern reproduced above when selecting time and marks.

Module 1

1-mark definition: State the meaning of **Meaning, Definition of Managerial Economics. 1 Understanding. Describe Relationship with other disciplines,**.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 2

1-mark definition: State the meaning of **Meaning of demand and Types of Demand. 2 Understanding Describe determinants of demand, demand.**

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

Module 3

1-mark definition: State the meaning of **4 Understanding Production optimization. Develop**

Module 4

1-mark definition: State the meaning of **3 Understanding and related concepts. Analyze and interpret comparative financial.**

managerial uses of production function,.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

3-mark explanation: Explain one principle, process or comparison from this module.

7-mark answer: Write a structured answer using a labelled diagram, table, procedure, example or application.

QUICK REVISION**Exam checklist****Before writing**

- Read the command word: define, explain, compare, draw, calculate, analyse or design.
- Use the exact course terminology from the source transcript.
- Plan labels, units, sequence and marks before writing.

Before submitting

- Check every module has been revised.
- Check diagrams, tables, formula symbols and units.
- Separate official syllabus information from personal elaboration.

REFERENCE VOCABULARY

Glossary

Study glossary

Term	Meaning in this lesson
Course Outcome	A capability the student should demonstrate after completing the course.
Module	An official syllabus unit with defined topics and hours.
CIE	Continuous Internal Evaluation.
ESE	End Semester Examination.
Source transcript	A preserved extract of the official syllabus used for coverage checking.
